SUSTAINABILITY MINDSET INDICATOR

© SMIndicator 2025

SMIndicator.com

If for every dollar in minute that we invest in AI, we invest another dollar in developing our own consciousness, our own mind, we will be ok.

Yuval Noah Harari

FOOD FOR THOUGHT.

How ready do you feel you are to deal with the complexity we are living in? How do you respond to the increasing polarization, to the need to expand our attention to stakeholders impacted by our daily decisions? How comfortable are you planning and yet letting go of your plans as you consider the feedback that reality is giving you? How easy is it for you to adapt, revisit your assumptions, unleash your creativity, and innovate? **These are some of the key indicators of resilience.**

We find comfort in our plans, in the 'known and tried out' ways of doing things. Yet this may also be the obstacle that slows us down when we need to find new ways of acting that have a better impact on the world. While much is talked about the future that awaits us, it's easy to forget that it is us, each one of us, who is shaping this future with our daily decisions and actions. Yet, rushed as we all live in these demanding times, we may not take the moment to pause, observe where we are, what our most precious goals and values are, and how our day, today, is reflecting those values, leading us to those goals. And what course corrections we may want to do!

This is the Era of Purpose. How mindful are you of your larger purpose? Setting a purpose becomes the compass offering certainty in a world filled with uncertainty. Are you giving yourself the gift of a pause, to ask yourself what your larger, higher purpose could be?

You may recognize in these lines some aspects that were addressed in the statements offered to you in the Sustainability Mindset Indicator, as you were invited to reflect and choose which best represented you. This report constitutes a picture, a map of your personal journey towards a resilient, purposeful, creative mindset for flourishing as an individual that is making a difference in the world. Which is sustainability at its best.

WELCOME TO YOUR PERSONALIZED REPORT

This Report is based on your selections on the SMI. It is meant to be a personal development tool, to highlight aspects of your understanding, behaviors and feelings related to your Sustainability Mindset (SM).

You will find observations that you may identify with, others that you vaguely recognize, and others that perhaps don't resonate with you. Keep what you need and what makes sense to you.

You will also find questions to consider, suggestions for things you can try, and information related to the aspects covered in this report, and how these are related to the Sustainability Mindset.

Take your time reading your Report. Pause, take notes, and reflect. It is all about you, and for you. There were no wrong answers in the survey. Only good options and perhaps some that you hadn't thought of.

WHAT YOU WILL FIND IN THE FOLLOWING PAGES

This Personalized Report is organized into several sections. The first section contains a graph, displaying how the different aspects assessed compare to each other, according to your choices in the survey. Those that occupy a larger area are your stronger ones and the narrower or missing ones are aspects of the Sustainability Mindset that are less developed or absent for you, as inferred from the combination of your answers.

The next section presents personalized descriptions of where you find yourself on your journey towards a Sustainability Mindset, in four clusters: Ecological Worldview, Systems Perspective, Emotional Intelligence, and Spiritual Intelligence.

Within each of these clusters you will find what aspects were assessed, and a graph for each aspect displaying how you connect to this topic, whether intellectually, through your actions and behaviors and/or by engaging your emotions.

If you see some areas missing within the graph, it means that either you selected "neither" for that question and therefore we don't have information to report on, or your answers suggest you don't engage in one or more particular areas (cognitive, behavioral or affective). Similarly, if you selected "neither" for all the questions within one aspect, we don't include a graph, since we don't have information to report on.

Each graph is accompanied by a box with a brief explanation, and you will find much more information in the text to include what your choices suggest, why this particular aspect is key for a sustainability mindset, and questions to ponder and suggestions to try.

Enjoy your journey into the realm of the Sustainability Mindset - a place where you can be your best, for yourself and for the World.

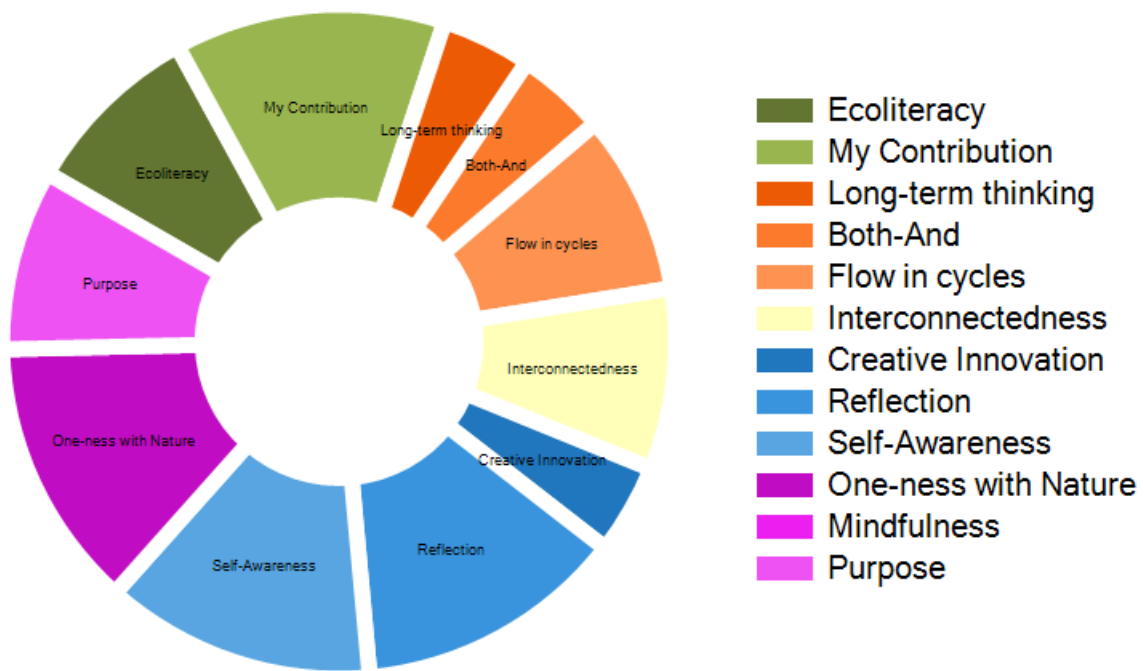

SUSTAINABILITY MINDSET INDICATOR

/ YOUR OVERALL **SUSTAINABILITY MINDSET PROFILE**

SUSTAINABILITY MINDSET INDICATOR

**THIS PAGE IS HERE FOR YOU TO
NOTE YOUR REFLECTIONS,
INSIGHTS, AND QUESTIONS.**

The graph below shows your personal profile, indicating how – relatively to each other – you have developed your Sustainability Mindset. The wider sections indicate your stronger areas, and vice versa.

/ECOLOGICAL WORLDVIEW

An ECOLOGICAL WORLDVIEW is the result of having an intellectual and affective broad understanding of the planetary challenges, how they are interrelated, and how we are contributing to them.

**/WHAT IS ASSESSED HERE:
HOW YOU UNDERSTAND THE
ENVIRONMENTAL AND SOCIAL
CHALLENGES, AND HOW YOU FEEL
ABOUT IT, AND THE IMPACT ON
YOUR BEHAVIORS.**

What this tells you:

This graph shows only the affective dimension, meaning that your predominant tendency is to connect emotionally with this aspect, without necessarily engaging in related behaviors or fully comprehending it. You might want to try and expand your understanding and also explore how you might make a small difference every day.

YOUR SMI RESPONSES INDICATE THAT in terms of Ecoliteracy, you are aware of some facts, but perhaps do not see the larger picture of how different data connect or impact each other.

As a consequence, your sense of urgency is limited and your need to personally change behaviors towards achieving greater sustainability is moderate at best.

This said, you seem to be socially sensitive and have empathy for the suffering of others. This may be creating some emotional stress, perhaps feelings of being overwhelmed by a reality that you think you cannot change. But is it really so, that you cannot influence and make a difference?

**/THOUGHTS TO PONDER WHEN YOU
CONSIDER THE SM:**

We are definitely living in a time of information overload. It is challenging to stay on top of all that is happening, while keeping up with our own obligations and activities. Furthermore, sustainability news tends to be on the negative side, creating doomsday scenarios and scary prophecies that can trigger anxiety, and not precisely inspiring us to act. We may avoid the news because they make us feel bad, sad, or concerned.

Yet we tend to underestimate our own power and influence in shaping a better world. As a matter of fact, if the challenges we are currently experiencing are a product of past problematic behaviors, then we are also positively shaping the future of the planet with our current mindful decisions and restorative actions. Understanding the scope of the sustainability challenges, from the environmental and social perspective, allows us to start noticing linkages, relationships and connections.

**/THINK ABOUT HOW YOU CAN FURTHER
LEVERAGE THOSE STRENGTHS AND MANAGE
SOME OF THE LIMITATIONS WHICH MAY BE
HOLDING YOU BACK:**

The other powerful path is in our emotions. You are already gifted with social sensitivity, a valuable asset. When we allow ourselves to connect from the heart with the reality of the news and find small ways to change our behavior, we are more present and don't need to live with our divided selves. This can be more fulfilling.

Understanding the state of the planet allows us to be more fully aware of the challenges, the complexity of how they are linked to each other, and to explore what it means to us.

This page is here for you to note your reflections, insights, and questions.

**/WHAT IS ASSESSED HERE:
HOW YOU SEE THE RELATION
BETWEEN INDIVIDUAL DECISIONS
AND PLANETARY CHALLENGES, HOW
YOU FEEL ABOUT IT AND THE
IMPACT ON YOUR PERSONAL
BEHAVIORS.**

What this tells you:

This graph shows that your approach to the assessed topic is both cognitive and affective, but you are not necessarily translating what you know and feel into actions. You might use this information to explore new habits and daily changes for a sustainability purpose.

YOUR SMI RESPONSES INDICATE THAT you seem to periodically ponder if you are personally playing a role in the social or environmental problems of the world. Certainly, you didn't create the problems intentionally, but you seem to pause and wonder in what ways you may be contributing to them.

/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE THOSE STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

Because you are a very sensitive person, with an open heart, realizing that you are part of the

problem may bring up feelings of guilt, sadness, despair, or anxiety. Yet are you aware that your ability to connect truthfully to your own emotions is actually a valuable skill that is much needed in the world? Your sensitivity also helps you to feel for others, with empathy and compassion for their suffering. This is a precious quality, although at times it can be difficult to live with it.

/YOU ARE COMFORTABLE WHEN you can convert the emotional energy into actions. But you may think that the problems are too large for you to be able to make a difference. So, you hope someone will eventually intervene.

Yet, this perspective also can cause stress, as it assumes we are at the mercy of powerful external forces or individuals.

There may be another way to look at this: What if you could identify small ways in which you realize that you are contributing to the problem, and then, begin to explore changes that are within your control?

Certainly, you will not solve the bigger problems, but you may feel more empowered, less at the mercy of others, and playing a role that you may actually enjoy. Food for thought!

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

Thinking of how we are personally contributing to the planetary challenges may not be something we do daily. Our demanding lives have many obligations and don't leave much time for reflecting on this. We are busy getting things done!

Yet when analyzing the current un-sustainability of our planet, science has clearly established a link between human behaviors in past decisions and the current problems we face. Much attention is now focused on how to repair the damage done, and how to restore damaged, depleted, or endangered resources. Scientists and

entrepreneurs study how to minimize current or future problems at the environmental or social level, and how to innovate to avoid negative impacts into the future.

If we collectively influenced the place, we find ourselves in now (with all its problems), that means we also hold the key to influence where we will collectively be in the future – we: meaning humankind at large, or, from a closer perspective, our families, children, and grandchildren.

/HOW ABOUT YOU TRY:

What if we could develop the habit of asking ourselves periodically: how am I contributing to this problem? This question opens a path of inquiry, which automatically leads to expansion of our consciousness. We become more alert to take notice, and thus more open to try out new behaviors.

This same question, by the way, is also a powerful tool that can improve our relationships and interactions with others! So often we focus on what others are doing unto us, which leaves us powerless. When we learn to pay attention to what is our role in the problems we endure, we regain control and can actually do something.

Actively thinking about your contribution is definitely an important milestone in your personal development, with planetary implications.

When we identify the ways in which we are unintentionally contributing to the problems, we have a chance to do something about them. It also expands our consciousness and develops social sensitivity.

/SYSTEMS PERSPECTIVE

When analyzing information and making decisions a SYSTEMS PERSPECTIVE has a major impact on the sustainability of our actions.

**/WHAT IS ASSESSED HERE:
HOW YOU THINK ABOUT THE LONG-TERM IMPACT WHEN ANALYZING AND MAKING DECISIONS, COMPLEMENTING SHORT-TERM THINKING; HOW YOU FEEL ABOUT IT, AND THE IMPACT ON YOUR BEHAVIORS.**

What this tells you:

This graph shows only one dimension – cognitive - meaning that you have an intellectual understanding about this aspect. You are not necessarily engaging your feelings nor converting them into actions. You might use this information to explore your emotions related to this aspect of the sustainability mindset, and perhaps find ways to convert your understanding into actions.

YOUR SMI RESPONSES INDICATE THAT you have a good understanding of the long-term sustainability impacts that our decisions may have, even the simple and daily ones, not to mention behaviors commonly accepted in our society.

At the same time, **you are comfortable** focusing on the short term when trying to solve a problem, because it seems more tangible, concrete and functional. You are pragmatic and prefer to save time, or so it seems.

You are a good problem solver – looking for quick and efficient ways to address a situation and seeking to simplify matters. Acting promptly is important for you, and it provides you and others with a sense of control and direction.

/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

In this sense, you diminish uncertainty for yourself and others, which may be welcome since uncertainty can create anxiety. Furthermore, trying to imagine future consequences may be puzzling because it requires a stretch of the imagination, and can make us feel responsible for future impacts that we can't quite conceive.

That said, this same decisiveness may impede the consideration of long-term impacts of the solution proposed, which could mean sustainability issues in the future. Much of the unsustainability problems originate in the focus on the short term when making decisions.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

There is a tacit pressure to act promptly and focus on that which needs immediate attention. This is very important, and there are many circumstances where this way of responding is the optimal, or even the only one that matters. A fire in the house, for example. We can sense the urgency and it is not a good idea to pause and reflect on the long-term implications of the fire.

But for many daily decisions, the context is different, and yet we still prioritize short term thinking, often without even pondering any medium- or long-term impacts of what we are doing. The stream of life, our

colleagues, perhaps everyone with whom we interact takes for granted that we “all” act this way.

On the other hand, with greater understanding of the social and environmental problems we are facing, it has become clear that the law of cause-and-effect is always at play, even if not immediately obvious. In other words, the consequences of our daily actions do have impacts - some over time, some just in a different geography, and many on both.

As with other aspects which are key for a sustainability mindset, it is not a question of choosing one over the other, but a matter of balancing both views and taking both time horizons into account.

/HOW ABOUT YOU TRY:

This mental habit expands our consciousness, as we become more aware of the way we are impacting others and the world. Not thinking about this doesn't stop it from happening. Rather, stretching our imagination to consider potential impacts across time helps us make better decisions, and play a more active role in shaping a better world.

For example, what might be some long-term consequences on sustainability of a purchasing decision you recently made? What would your latest decision look like if you would have considered those potential long-term impacts?

It takes practice to develop new mental habits, but they too, can have long term impacts – for the better.

Every action has consequences that are not immediately visible. Considering the long-term when analyzing situations and making decisions has a positive impact on global sustainability.

**/WHAT IS ASSESSED HERE:
HOW YOU THINK ABOUT AND DEAL
WITH AMBIGUITY AND PARADOXES,
HOW YOU RECOGNIZE DIVERSITY,
FEEL ABOUT IT AND ACT TOWARDS
IT.**

What this tells you:

This graph shows only one dimension – behavioral - meaning that you are action- oriented, without much engagement of your feelings and without necessarily thinking about this aspect intellectually. You might use this information to seek ways to expand your understanding and explore your emotions.

YOUR SMI RESPONSES INDICATE THAT you might frequently ask yourself how other people arrive at their opinions and perspectives, puzzling as they may look to you. It is possible that you even become curious and engage in conversations to better understand them.

At the same time, it is clear to you that when one starts to be inclusive of other people's perspectives, we may lose sight of what we hold

true and right, thus not fully honoring the responsibility we feel to champion these values.

/YOU ARE COMFORTABLE when your heart remains true to values you were taught and respect. This may cause you a certain amount of tension, as you realize that you may be perceived as not being inclusive.

/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

Because much of the world is changing, you may feel compelled to be more understanding with others' perspectives, but this doesn't come easy to you, and you may feel frustrated or impatient. Of course, you wish there would be a solution that might make everyone happy, one that accommodates diverse ways of seeing the economy, ecosystems, humans, and the planet, but you don't think this is as simple as it sounds.

Since we cannot control what others think or do but do have control over our own way of thinking, there may be an interesting path worth exploring here. Your behavior tends towards inclusion, and this is very valuable. Are you aware of it? Do you help others notice it, particularly the benefits of inclusion?

/HOW ABOUT YOU TRY:

Here is a question to consider: Can you think of an event or situation, however minor, where someone with a different opinion was able to step into your shoes? How did it make you feel? How did it impact your attitude and your behavior?

What if we could shape a world that makes room for different perspectives, where people acknowledge others' points of view, the way you frequently include theirs?

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

It seems that today, more than ever, we are collectively being confronted with paradoxes and ambiguity. Increased transparency and access to information from around the world makes us aware of very different ways of thinking, being and acting with which we may not agree or be comfortable.

Challenging as this may be, there is a benefit to it: We are becoming aware of our own worldviews just by realizing that there are other ways of seeing and feeling. This is an evolutionary insight of great value, the foundation for more peaceful societies. In a way, life is prompting us to expand our understanding and our scope of caring, which go hand in hand.

When we understand something, we can begin caring. This is the start of a better world for all.

Both+and thinking allows us to understand paradoxes and calls for creative solutions that are inclusive of all stakeholders.

**/WHAT IS ASSESSED HERE:
HOW YOU BALANCE YOUR CAPACITY
TO ANALYZE AND PLAN WITH THE
UNDERSTANDING OF NATURAL
CYCLES, AND MAKE THEM PART OF
YOUR MINDSET.**

What this tells you:

If a graph shows the two dimensions - cognitive and behavioral - it means that your tendency is to distance yourself from your feelings, particularly in the aspect assessed here. You have a good understanding about it, and are acting upon it, but you might want to further explore your emotions in relation to it.

YOUR SMI RESPONSES INDICATE THAT you are aware of the commonly shared belief that humans are the most intelligent species, the apex of creation, with the intellectual ability to control nature. And you have come to realize this assumption is most frequently contradicted by reality, particularly when we think in a linear way, acting outside the cycles of Nature.

/YOU ARE COMFORTABLE when you can express an understanding of impermanence and act in alignment with the cyclical flow of Nature,

which means accepting that things grow, but not forever because there is also decline and death.

In our day-to-day this may mean accepting ageing and mortality, endings of relationships or certain phases in our life, and new beginnings as well. In another context, it means that we see ourselves as part of Nature, not as its controller-in-charge. This is a valuable attitude, because it may make your life easier. Like swimming along with the river's current, it increases your speed, and reduces the stress of resisting obstacles.

**/THINK ABOUT HOW YOU CAN
FURTHER LEVERAGE THOSE
STRENGTHS AND MANAGE SOME
OF THE LIMITATIONS WHICH MAY
BE HOLDING YOU BACK:**

At the same time, you seem to feel a tension between this understanding, and feelings of empowerment and control when you actually make a plan and achieve a tangible goal. The sense of accomplishment is a feeling you enjoy, particularly since letting go of plans can bring you stressful uncertainty.

It seems that in this phase of your life you are in a transition, going back and forth between two ways of being in the world.

In one, you derive great pleasure in planning as a way to feel in control; in the other, you know that flexibility and flow is ultimately more efficient, and you try to practice this. In this back and forth, it may be that the frustration, when things don't work out as you planned or expected, reminds you to let go of your plans and observe what life is telling you.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

You may be wondering why planning is related to several key aspects for a sustainability mindset. The connection is not in the planning as an activity per se, but in the way we think and process information when we plan. Planning is about organizing and structuring in order to control outcomes. Planning is linear by definition -one step after the other - and it assumes cause-effect relationships. But what about multi-effects, multi-causes, and feedback loops?

Contrast this with the sustainability problems we are facing. To begin with, they are complex and multidimensional by their very nature. Many are the result of our linear thinking, for example we believe that we can pursue unlimited growth, yet depletion of natural resources shows us this is not possible.

Our reliance on the human mind can create a collective assumption that we are in control, but a “small” manifestation like Covid-19 arrives as a surprise to debunk the myth of our own superiority.

Planning in itself is not the problem but rather, excessive reliance on carefully crafted steps, and forgetting the natural cycles of growth and decline.

/HOW ABOUT YOU TRY:

Here a few thoughts to ponder. Do you see yourself balanced in terms of making and letting go of plans? How do you balance structure and flow, organization and flexibility? What do you see as your personal development challenges in this aspect?

There are no linear processes in Nature: Everything flows in cycles of birth, growth, death, and rebirth.

Many aspects of man-made unsustainability of the planet are a result of the misconception that we are not governed by this law of Nature.

**/WHAT IS ASSESSED HERE:
HOW YOU UNDERSTAND AND
EXPERIENCE INTERCONNECTEDNESS,
VERSUS VALUES LIKE AUTONOMY
AND INDEPENDENCE.**

What this tells you:

This graph shows the affective dimension, meaning that you connect emotionally with this aspect, without necessarily engaging into action. We don't have enough data to report on your understanding of this topic.

YOUR SMI RESPONSES INDICATE THAT you work well in contexts where you can compete and strive towards being your personal best.

Interestingly, **you are also comfortable** asking for and appreciating other people's input and support. It may be that a part of you adapts well to competing environments, but your heart would rather collaborate if that would be possible.

We cannot comment on how you think about this topic, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

**/THINK ABOUT HOW YOU CAN
FURTHER LEVERAGE YOUR
STRENGTHS AND MANAGE SOME
OF THE LIMITATIONS WHICH MAY
BE HOLDING YOU BACK:**

The combination of your answers seem to indicate that your perspectives are evolving and changing. This is very appropriate since there is an increasing need for collaborative teamwork, and you will have an advantage adapting to those settings that already feel better for you now.

While certain cultures have a collectivistic framework, most of the western-northern culture - widely exported and globalized - is individualistic and celebrates personal achievement. However, is this realistic and even feasible? Let's pause for a moment: Can you name one achievement that was purely and authentically your own without another person playing any role in it?

As you further develop your empathy and social sensitivity, you may become more conscious of the many ways in which we are interconnected, and the positive impact of paying attention to this in your everyday decisions. You will be able to share your new perspectives with others, and it may expand their thinking horizon.

**/THOUGHTS TO PONDER WHEN YOU
CONSIDER THE SM:**

You may not have given it much thought, but the polarities of independence vs. interconnectedness and competition vs. collaboration are of particular relevance when focusing on sustainability. To begin with, the environmental and social challenges are complex and multidimensional, making it impossible for any one person to solve on their own. It is only through collective thinking, action and the collaboration of multiple stakeholders that we will be able to develop alternatives. (This, by the way, makes

sustainability a great opportunity for contributing personal skills to a larger cause).

/HOW ABOUT YOU TRY:

If you have identified an accomplishment that you consider authentically your merit, make a list of who may have played a role in it. Rank them, in order of relevance or impact on your success. What does this exercise tell you about the polarity of autonomy versus interconnectedness?

We invite you to explore what autonomy means for you. What are the roots of this value for you, perhaps in your upbringing or in your current context? Is this authentically a priority for you, or is it something automatically inherited, or adopted without giving it much thought?

When we see interconnectedness, we understand the importance of diversity, and our decisions and actions become more inclusive, which contributes to the sustainability of the whole.

/EMOTIONAL INTELLIGENCE

Understanding ourselves through the anchors of our identity, the pace of our life, and how we consider our intuitive wisdom are key for a sustainability mindset.

**/WHAT IS ASSESSED HERE:
HOW YOU INCORPORATE NON-
RATIONAL INFORMATION, INTUITIVE
KNOWING, CREATIVITY AND
IMAGINATION IN ORDER TO
BALANCE RATIONAL THINKING, AND
HOW YOU FEEL ABOUT IT.**

What this tells you:

This graph shows only one dimension – cognitive - indicating that you have knowledge about this aspect, without necessarily connecting it with your behaviors. You might use this information to seek ways to convert your understanding into action.

We don't have enough data to report about your feelings on this topic.

YOUR SMI RESPONSES INDICATE THAT you have a clear understanding of the value of combining your logical and analytical thinking abilities with creative imagination.

You know that the human mind is capable of great accomplishments, as history has shown, when intuition and creative ideas are coupled with rational thinking and good strategies. You may even trust that

our sustainability problems could be addressed with a good balance of these abilities.

At the same time, **you feel most comfortable** being the contributor of rational thinking when analyzing a problem. You may find yourself in the role of the defender of structure and stability, and the keeper of the status quo. You are careful to avoid what you consider as unnecessary risks.

We cannot comment on your feelings about this topic, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

How well do you balance your strategic thinking with some creative imagination?

**/THOUGHTS TO PONDER WHEN YOU
CONSIDER THE SM:**

The reason for this question is that the sustainability challenges we are facing are largely new, and as COVID-19 taught us, increasingly situations arise for which we don't have previous experience or science on which to rely.

We have become more aware of the complexity of our challenges, and we are skeptical of simplistic solutions. This requires entry into uncharted territories. Resilience calls for flexibility in adapting to new situations, and this entails innovating and experimenting. Having no plans or blueprints to follow may be unsettling, and the only choice is to take some risks.

**/THINK ABOUT HOW YOU CAN FURTHER
LEVERAGE YOUR STRENGTHS AND
MANAGE SOME OF THE LIMITATIONS
WHICH MAY BE HOLDING YOU BACK:**

How comfortable do you feel when experimenting without knowing? Here is a thought to consider: What are some situations in which you are creative, relaxed and playful? Perhaps cooking or gardening? Playing some team sports? Or around small children? Maybe planning a party?

If you can identify some of these creative and playful moments, in them you have a reservoir of imagination available to tap into. This can help you complement your strategic thinking and maximize your achievements for the benefit of all.

*Resilience is based on constant
creativity, innovation, and
experimentation. When we neglect
the non-rational wisdom we have in
us, our solutions are missing critical
information, and may create negative
impacts on the ecosystem and
society.*

**/WHAT IS ASSESSED HERE:
HOW YOU NOTICE YOUR OWN PACE,
AND HOW YOU BALANCE RAPID
RESPONSE WITH MAKING TIME TO
PONDER AND REFLECT BEFORE
ACTING. AND HOW THIS MAKES
YOU FEEL.**

What this tells you:

This graph shows that your approach to the assessed topic is both cognitive and affective. We don't enough have data to report about your behaviors and whether or how your understanding and feelings are converted into actions.

/YOUR SMI CHOICES INDICATE THAT you have a sense that we are collectively trapped in an accelerated pace.

Perhaps you notice your own speed, or see it in others. The fact is that you observe and seem to think about this phenomenon, and may be asking yourself about the cost of this upon you or others. How is it possible to contemplate the future implications of decisions taken under the pressure of speed?

You are comfortable seeking a slower pace of life. It makes you feel better, more relaxed or lowers your stress levels.

We cannot comment further on your behaviors related to this topic, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

**/THOUGHTS TO PONDER WHEN YOU
CONSIDER THE SM:**

Since we are looking at these aspects from the perspective of a sustainability mindset, let's pause and think about what behaviors might be most effective as well as much needed.

While there is a call for urgent action about climate change and the related social and environmental problems, many modern sustainability challenges are actually the result of overlooked potential impacts.

For decades, well-intended decisions were largely made by quickly identifying the best option. But today we are understanding better that problems are complex, that solutions impact a multiplicity of future stakeholders, and that there are always consequences. Of course, it is not possible to anticipate all scenarios, but pausing and checking assumptions as you do it can be very useful to avoid future problems.

**/THINK ABOUT HOW YOU CAN
LEVERAGE YOUR STRENGTHS AND
MANAGE SOME OF THE
LIMITATIONS WHICH MAY BE
HOLDING YOU BACK:**

For example, what can you learn to avoid or repeat from past experiences? Can you identify, in hindsight, something that was at stake and

overlooked because you were trying to act fast? When we have more information we can better weigh alternatives.

All of this, however, is at odds with speed. We cannot both act fast and ponder carefully. What might be new ways of combining urgently needed actions with careful exploration of their impacts? What role could you see there for you? Do you think you could be more vocal and perhaps find more courage to offer a perspective that certainly is not mainstream?

Reflective practices help to pause, and to ponder the situation and its implications before jumping into action.

/HOW ABOUT YOU TRY:

According to your answers, you seem to be gifted with an intuition that something is not quite right. Does it sometimes happen to you that you wish you could relax more, slow down or do nothing? Does your body, your mind or perhaps your soul call for a break, less stress? What message may be there for you, waiting to be heard and acted upon? And how can you more confidently share this different way of being and living with others?

A lot of food for thought!

/WHAT IS ASSESSED HERE: HOW AWARE YOU ARE ABOUT THE ANCHORS OF YOUR IDENTITY AND YOUR VALUES; HOW YOU FEEL AND ACT IN CONSEQUENCE.

What this tells you:

This graph shows that your approach to the assessed topic is both cognitive and affective, but you are not necessarily translating what you know and feel into actions. You might use this information to explore new habits and daily changes for a sustainability purpose.

YOUR SMI RESPONSES INDICATE THAT you believe the paradigm we have long been living with is due for a revision, because values like growth and progress may be linked to an assumption of unlimited resources, which may not be realistic.

But, according to the selections you made in the instrument, this understanding is not easily translated into behaviors. The reason is that you don't see pragmatic alternatives at hand.

You stay focused:

So, you focus on managing your own personal obligations and challenges, and you don't have the

energy to entertain what may sound as 'philosophical' concerns about humanity or the planet's future. You know that your views are not always "politically correct", but this is how it is for you today.

/A VALUABLE (AND UNCOMFORTABLE) TENSION.

At the same time, this creates an uncomfortable feeling of misalignment between some of the things you do and how you would prefer to see yourself. You may have been taught certain values, like being a winner, not being a loser, always remaining rational, having more to be more. And you became these values.

But then something began to shift, and these values don't feel entirely OK any longer. This may make you feel confused, perhaps a bit guilty at times. You may even feel more grateful or indebted to others for their help in your achievements than stubbornly proud of being a self-made person.

Well, this is a very important moment of awareness, because change starts with our noticing some discomfort about something, and we want to do something about it to feel better (or at least less bad). In this case, you seem to have achieved this very important step. Of course it can be overwhelming to think about the complex problems. But what if you start small?

/ THINK ABOUT HOW YOU CAN LEVERAGE THOSE STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

Your understanding and intuition are not mainstream, and thus very important to drive

much needed change. How happy are you with how you are sharing your valuable perspectives with others? Do you feel you are doing it as much as you can?

Let's pause for a moment.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

This survey was designed around the Sustainability Mindset, which is a way of thinking and being, to optimally adapt to the moment in which we are living. This Mindset focuses on using our natural gifts to shape a better future, for ourselves and for all, the ecosystem included.

Research has proven that what may sound overwhelming, actually can be broken down into small, realistic ways to contribute to the greater good, and, as you well know, feel great at the same time. The first step is taking a fresh look at what surrounds us.

Undoubtedly, there are social and environmentally related challenges everywhere. Some happen locally, others across borders. Science has been linking many of these issues to human behaviors, such as consumption of unhealthy foods, depletion of natural resources, pollution or contamination of air, soil, and water. And we are left to deal with the consequences today, trapped in a paradigm that prioritizes values that have a negative impact, such as thoughtless consumption.

/HOW ABOUT YOU TRY:

Have you identified some of your activities that may not live up to your personal expectations of living in a 'sustainable' way? In what new ways could you make some changes? Sometimes we do

not have the power to control a situation, but we always have unlimited power to influence, with our words, attitudes, talking or writing.

How about exploring a few of your unused possibilities?

Another suggestion is that you explore the roots of some values that are important for you, such as success, winning, and outperforming others. Where can you trace their origins? Perhaps in your upbringing, or in your current context? What do they represent for you, which makes them important? Are they authentically yours, or are they perhaps inherited, adopted without giving much thought to it?

When we explore our personal values, beliefs, assumptions, and motivations, we gain greater control over our actions, and we can see new alternative behaviors.

/SPIRITUAL INTELLIGENCE

The spiritual orientation to Nature, to ourselves and to others are key factors for a Sustainability Mindset, as they impact the quality of our actions.

**/WHAT IS ASSESSED HERE:
HOW YOU EXPERIENCE NATURE,
HOW YOU UNDERSTAND THE
HUMAN RELATIONSHIP WITH
NATURE, AND YOUR RELATED
FEELINGS AND BEHAVIORS.**

What this tells you:

This graph shows the two dimensions of affective and behavioral, meaning that you have an emotional connection with this aspect, and you also act upon it. We don't have enough data to report whether or how your knowledge and understanding is related to or might support this aspect.

YOUR SMI RESPONSES INDICATE THAT you tend to act in ways that acknowledge a relationship characterized by respect and sensitivity toward other living things.

You are comfortable caring for others or the ecosystem. This may be the result of some special moments, when you stood in awe admiring Nature, your heart perhaps filled with joy and some kind of wordless experience of beauty.

We cannot comment on your thinking about this topic, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

/THINK ABOUT HOW YOU CAN LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

The combination of your choices in this questionnaire seem to show that those powerful moments created a disposition towards empathy. How do you manage the tensions of living in a context that mostly rewards rational thinking and intellectual capabilities?

You may be aware that progress has frequently come at a cost for the environment or society, and we are collectively paying that price, for example, soil erosion or waterways contamination due to products that provide chemical fertilizers of crops meant to enhance soil productivity. The human-centric paradigm that we collectively adopted and believe has begun to show some shortcomings, inviting us to revisit our place and role in the larger ecosystem.

What are some undesirable consequences of human progress that you have personally experienced? What were your reactions?

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

According to a 2018 United Nations study, over 55% of the world's population lives in urban areas, a proportion that is expected to increase to 68% by 2050. As a result, for many of us, the disconnection from Nature is rather "natural." Hectic life in large cities makes it difficult for us to remember that we are more than individuals moving through traffic and buildings. The common associations with the word "Nature" may be vacation time, a park or a

documentary. What about our food? Our body? The materials of every object we use?

We collectively rely and praise scientific progress, but in the history of science findings are always within the constraints of available instruments, paradigms or assumptions. Many myopic or biased conclusions have been revealed with the passage of time, the development of more precise measurement techniques and revolutionary thinking. Biomimicry, a discipline studying how Nature solves problems, has been highlighting the wisdom of billions of years of evolution, and suggesting that we may find more answers in Nature than through our human intellect.

In fact, indigenous people have demonstrated a more resilient lifestyle, based on an intuitive connection to Nature, something that you seem to have experienced yourself.

/HOW ABOUT YOU TRY:

Sometimes we realize that our thinking, feeling and acting are not fully aligned. When we notice it, we may feel discomfort and tension- something out of sync. A sustainability mindset is not just harmony with the ecosystem, but rather starts with harmony within ourselves.

How do you describe your own balance between what you think and value, how you feel and act with respect to Nature? Is there something you need to revise, to feel more authentically who you are? Is there a part of you that is still clinging to an old paradigm? Why might that be so?

Understanding that we are one with Nature, a species within species, is a powerful spiritual experience that can shape behaviors leading to a more harmonious relationship with each other and all beings.

**/WHAT IS ASSESSED HERE:
HOW YOU THINK ABOUT THE
MEANING, ROLE AND VALUE OF
MINDFULNESS AND ITS PRACTICE,
AND HOW YOU FEEL ABOUT IT.**

YOUR SMI RESPONSES INDICATE THAT your current reality is challenging, and poses a high demand on your physical, emotional and psychological well-being, which you try to manage in the best way you can.

/ALIGNED WITH THIS REALITY you are very aware that society rewards action and its ensuing achievements, rather than inaction and passivity, which is kind of what mindfulness practice seems to you. You personally do not see particular value in the concept of mindfulness, or perhaps it is just not a part of your life at this time.

You may be aware that other cultures have different behavioral patterns from the one in which you live, but you are cognizant of the importance of adapting to the culture to which you belong. As the saying goes, “when in Rome do as the Romans do”.

We cannot further comment on your behaviors since you indicated (by choosing "neither") that you did not feel represented by either of the available options. However your other choices indicate that at times you experience the tension and stress that comes with your demanding reality. You may notice it in your health, sleeping patterns, moods, or in how you relate to others as a result.

**/THINK ABOUT HOW YOU CAN
LEVERAGE YOUR STRENGTHS AND
MANAGE SOME OF THE LIMITATIONS
WHICH MAY BE HOLDING YOU BACK:**

You hear people say “you should do less, you should relax, you should take time for yourself, etc.,” and from your perspective, their suggestions may sound somewhere between unreal and ridiculous, since you are the one living with the challenges. They don’t always realize that we are all doing our best all of the time.

At the same time, being very concentrated on your obligations rarely leaves time or space to look around, and oftentimes information is available “out there” that could facilitate your task, but you just don’t see it.

/HOW ABOUT YOU TRY:

For example, perseverance is an important virtue, except when it makes us miss easier or better ways to achieve our goal. Pausing and stepping away from our task clears our mind, and we can return to it with renewed energy and sharper vision.

So here are some questions for you to contemplate.

Has it ever occurred to you that the fact that everyone lives like this” may not necessarily make it ideal? Studies show the physical and emotional consequences of a constant focus on doing while overlooking the more profound dimensions of ‘being,’ such as reflection, spiritual or religious practices, time to recharge and find ourselves, and time to connect with our deeper self.

Furthermore, individuals that dedicate time to nurture this ignored or neglected part of themselves soon realize the positive impact that small practices of slowing down have on their peace of mind, how they relate to others and even on their health. It may be as simple as going for a walk, listening to your preferred music, dancing,

practicing a sport, playing with children or your pet, gardening or creating art.

There are certain words that, just by thinking of them create an expansion in our heart, bringing positive feelings. From a biological perspective, they cause our system to release dopamine, the so-called happiness hormone.

Can you think of some of these words? How do they make you feel? For starters, a small but powerful gift that you well deserve!

Mindfulness is being fully present, experiencing connectedness with all that is. Mindfulness enhances awareness and compassion, and predisposes to social and environmental actions.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

From the perspective of a sustainability mindset, mindfulness is both a key practice and an amazing result. Research has shown a direct link between individuals that have some contemplative practices not just with their physical and psychological health, but also with the emergence of feelings of empathy and compassion.

This creates a disposition towards positive social and environmental actions, and the resulting satisfaction feeds a positive reinforcing loop. In other words, the better we feel about something we've done, the more we seek to repeat the experience.

When we access and display a more balanced version of ourselves, we convey an unspoken message to the people with whom we interact, not just by what we say or how we behave, but through our attitude and energy. This has a proven positive influence on others, as science has identified with the phenomenon of "emotional contagion."

In other words, when we develop a sense of peace for ourselves, we are also radiating a gift of peace to the world.

Do you want to give it a try?

**/WHAT IS ASSESSED HERE:
WHAT YOU THINK ABOUT HAVING A
PURPOSE IN LIFE, PARTICULARLY
SOMETHING THAT IS IN SERVICE TO
OTHERS; HOW THIS FITS YOUR
REALITY AND HOW YOU FEEL ABOUT
IT.**

What this tells you:

If a graph shows the two dimensions - cognitive and behavioral - it means that your tendency is to distance yourself from your feelings, particularly in the aspect assessed here. You have a good understanding about it, and are acting upon it, but you might want to further explore your emotions in relation to it.

YOUR SMI RESPONSES INDICATE THAT you think it is important to find a purpose in life, to identify something that, by making a difference, makes our life meaningful.

In fact, you have already found it, through actions that serve others. You may have found a cause, or it is possible that part of your obligations and responsibilities are to serve others, to attend to their needs or expectations. Your work, family, perhaps relationships, form part of your reality and may use

up your available energy – and you perceive this as your service.

How does this make you feel? Do these activities feel like your “calling”, or like an obligation that lands upon you? Sometimes we don’t see that we had a choice, and that may place an extra burden on us, which is perceived very differently than when we intentionally decide and choose where and how to “serve”.

**/THINK ABOUT HOW YOU CAN FURTHER
LEVERAGE YOUR STRENGTHS AND
MANAGE SOME OF THE LIMITATIONS
WHICH MAY BE HOLDING YOU BACK:**

You indicated that you tend to get impatient with people who talk about having a purpose or a mission in life, of ‘changing the world’. You confront those words with your current reality, and it sounds rosy or grandiose, unreal. Perhaps those people don’t have the same challenges you have to manage, or just want to look good.

All that said, research has shown that individuals who engage in activities of service to the community, volunteering or some kind of initiative for the greater good have a higher sense of wellbeing than those who do not. This includes benefits to health, feelings of joy, increased self-esteem, and personal satisfaction.

In contrast, perhaps you have experienced that focusing on the extreme demands of your life sometimes takes a toll on your health, your mood, creating tension or anxiety, disrupting your sleep or impacting how you interact with others.

Does it happen to you that you don’t feel happy with yourself or with others? If so, have you asked yourself what you could do to feel better, to lower your stress? Perhaps you have, but the answer you found may have been that as long as your demands remain high, there is not much you can do.

So here, again, some thoughts to evaluate:

Which of the activities that you engage in are a necessity, a “must-do,” and which ones represent a choice? Who would do these activities if it were not you? What would it take to let go of some activities, or perhaps of “how” you do them?

These questions have an agenda: to help you free up some time and space to try out a different experience, one that consists of something you do for others outside your inner circle.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

The research regarding core aspects for a sustainability mindset identified the role of activities intentionally done for the “greater good.” The state of our planet is such that it requires each of us to step up and play an active role in shaping a better world.

The actions needed, whether large or small, share a similar result: they provide us with a feeling of joy, which then we want to replicate to feel good again, thus creating a reinforcing loop. Interestingly, we tend to think that we need to take care of ourselves first, before helping others, but the facts show that when we do small acts of kindness for others, we feel much better ourselves.

/HOW ABOUT YOU TRY:

With this in mind, what are some new experiments you can try? What are some different things for the greater good that you already did, and perhaps could repeat, do regularly, or improve? Which of your natural gifts and skills could you put into service for the greater good, in a cause for which you have a passion?

Don't get intimidated by grandiose words like ‘changing the world’ or having a life mission or purpose. In fact, each small action of kindness has already an impact that we may never be able to imagine. That is also changing the world, one interaction at a time.

Defining our purpose provides an unconscious compass, and when it is grounded in values of our higher self, we actively shape a better world.
