

# /EMOTIONAL INTELLIGENCE

Understanding ourselves through the anchors of our identity, the pace of our life, and how we consider our intuitive wisdom are key for a sustainability mindset.

## **/WHAT IS ASSESSED HERE: HOW YOU INCORPORATE NON- RATIONAL INFORMATION, INTUITIVE KNOWING, CREATIVITY AND IMAGINATION IN ORDER TO BALANCE RATIONAL THINKING, AND HOW YOU FEEL ABOUT IT.**

### **What this tells you:**

**This graph shows the affective dimension, meaning that you connect emotionally with this aspect, without necessarily having full understanding about it. We don't have enough data to report if or how your feelings impact your behaviors related to this aspect.**

**YOUR SMI RESPONSES INDICATE THAT** you have a clear understanding of the value of your logical and analytical thinking abilities.

You know that the human mind is capable of great accomplishments, as history has shown. And you trust that our sustainability problems might be addressed with rational thinking and good strategies.

We cannot comment on how your thinking impacts your behaviors, since you indicated (by choosing

"neither") that you did not find yourself represented by either of the available options.

Yet, your other selections **indicate something interesting:** There is a part of you that actually finds uncertainty exciting! You enjoy the fact that reality presents you with plenty of unknowns.

You may be channeling the adventure-ready aspects of your personality into specific contexts - perhaps your free time or your vacation. This is where your creativity and perhaps your intuitive wisdom can be expressed.

## **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

You may notice that the sustainability challenges we are facing are largely new, and as COVID-19 taught us, increasingly situations arise for which we don't have previous experience or science on which to rely. We have become more aware of the complexity of our challenges, and we are skeptical of simplistic solutions.

However, this also requires entry into uncharted territories. Resilience calls for flexibility in adapting to new situations, and this entails innovating and experimenting. Having no plans or blueprints to follow may be unsettling, and the only choice is to take some risks.

## **/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

This seems to be your current challenge: How can you feel a bit more comfortable bringing your rich creativity and risk tolerance into other situations, beyond where you are expressing them now? You

have a very valuable asset – the acceptance of uncertainty and the ability to unleash your imagination. Can you imagine if you could expand these and bring them out more frequently? Here is a thought to ponder: What would have to be true and how can you influence this?

It seems that you have a reservoir of imagination available to tap into, and perhaps intuitive wisdom as well. This can help complement your strategic thinking, and maximize your achievements for the benefit of all.

*Resilience is based on constant creativity, innovation, and experimentation. When we neglect the non-rational wisdom we have in us, our solutions are missing critical information, and may create negative impacts on the ecosystem and society.*
