

WHAT YOU CAN DO WITH THIS INFORMATION

After identifying the strengths and potential development areas of your group, explore the overall trends: Are they mostly cognitive? Do they engage sufficiently in actions? Do they tend to connect with their feelings? These data will give you insights regarding where to focus to maximize the support and development of your group. You will be able to select activities, exercises and interventions that challenge your audience while offering a safe and nurturing atmosphere.

Remember that this report is an aggregate, and individuals score in different ways. You can invite your group to go back to their Personalized Report and share with you what they found most interesting and what they would like to work on. If they are willing to indicate what support or activities they might find most valuable, it will help you help them even more.
