

/WHAT IS ASSESSED HERE: HOW AWARE YOU ARE ABOUT THE ANCHORS OF YOUR IDENTITY AND YOUR VALUES; HOW YOU FEEL AND ACT IN CONSEQUENCE.

What this tells you:

This graph shows only the affective dimension, meaning that your predominant tendency is to connect emotionally with this aspect, without necessarily engaging in related behaviors or fully comprehending it. You might want to try and expand your understanding and explore how you might make a small difference every day.

YOUR SMI RESPONSES INDICATE THAT you see the world through a precise lens that is, and has for a long time been, the most widely shared paradigm.

In the world as you (and so many others) see it, you recognize the immense progress that humanity has made, particularly accelerated over the last century. You realize that competition has driven individuals to seek to be better than and outperform others, and the resulting inventions have vastly improved the quality of life for people on this planet.

This progress may have come at a price that we now see, particularly at the environmental or social level, but from your perspective the fallout was not intentional and was justified by the benefits. Human “can-do” spirit and individual ambition will continue developing new solutions.

As a matter of fact, you don’t even see pragmatic alternatives at hand.

You stay focused.

So, you focus on managing your own personal obligations and challenges, and you don’t have the energy to entertain what may sound like ‘philosophical’ concerns about humanity or the planet’s future. You know that your views are not always “politically correct”, but this is how it is for you today.

/HERE IS A NOTEWORTHY FINDING:

Through the selections you made in the survey, you suggest some tension, an uncomfortable feeling of misalignment between some of the things you do and how you would prefer to see yourself. You may have been taught certain values, like being a winner, not being a loser, always remaining rational, having more to be more. And you became these values.

But then something began to shift, and these values don’t feel entirely OK any longer. This may make you feel confused, perhaps a bit guilty at times. You may even feel more grateful or indebted to others for their help in your achievements than stubbornly proud of being a self-made person.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

Let's pause for a moment. This survey was designed around the Sustainability Mindset, which is a way of thinking and being, to optimally adapt to the moment in which we are living. This Mindset focuses on using our natural gifts to shape a better future, for ourselves and for all, the ecosystem included.

Research has proven that what may sound overwhelming, actually can be broken down into small, realistic ways to contribute to the greater good, and, as you well know, feel great at the same time. The first step is taking a fresh look at what surrounds us.

Undoubtedly, there are social and environmentally related challenges everywhere. Some happen locally, others across borders. Science has been linking many of these issues to human behaviors, such as consumption of unhealthy foods, depletion of natural resources, pollution or contamination of air, soil, and water. And we are left to deal with the consequences today, trapped in a paradigm that prioritizes values that have a negative impact, such as thoughtless consumption.

But what if we realized that some of our habits today are (unintentionally) contributing to more of these problems in the future? And vice versa: What if a change in a small habit today could do its part to shape a better future?

/HOW ABOUT YOU TRY:

Can you think of a habit of yours that might qualify? We don't know what we can do until we try. And when we put aside cynicism for a moment, we actually may feel a deep sense of joy. Sometimes we shift our values because of a new experience. Worth trying?

When we explore our personal values, beliefs, assumptions, and motivations, we gain greater control over our actions, and we can see new alternative behaviors.
