

Sustainability  
Mindset  
Indicator®

**/REPORT  
PREPARED FOR:  
YEYET  
14/Jun/2023**

Welcome to your Personalized Report. This Report is based on your selections on the SMI. It is meant to be a personal development tool, to highlight aspects of your understanding, behaviors and feelings related to your Sustainability Mindset (SM).

You will find observations that you may identify with, others that you vaguely recognize, and others that perhaps don't resonate with you. Keep what you need and what makes sense to you.

You will also find questions to consider, suggestions for things you can try, and information related to the aspects covered in this report, and how these are related to the Sustainability Mindset.

Take your time reading your Report. Pause, take notes, and reflect. It is all about you, and for you. There were no wrong answers in the survey. Only good options and perhaps some that you hadn't thought of.

# /WHAT YOU WILL FIND IN THE FOLLOWING PAGES

This Personalized Report is organized into several sections. The first section contains a graph, displaying how the different aspects assessed compare to each other, according to your choices in the survey. Those that occupy a larger area are your stronger ones and the narrower or missing ones are aspects of the Sustainability Mindset that are less developed or absent for you, as inferred from the combination of your answers.

The next section presents personalized descriptions of where you find yourself on your journey towards a Sustainability Mindset, in four clusters: Ecological Worldview, Systems Perspective, Emotional Intelligence, and Spiritual Intelligence.

Within each of these clusters you will find what aspects were assessed, and a graph for each aspect displaying how you connect to this topic, whether intellectually, through your actions and behaviors and/or by engaging your emotions.

If you see some areas missing within the graph, it means that either you selected "neither" for that question and therefore we don't have information to report on, or your answers suggest you don't engage in one or more particular areas (cognitive, behavioral or affective). Similarly, if you selected "neither" for all the questions within one aspect, we don't include a graph, since we don't have information to report on.

Each graph is accompanied by a box with a brief explanation, and you will find much more information in the text to include what your choices suggest, why this particular aspect is key for a sustainability mindset, and questions to ponder and suggestions to try.

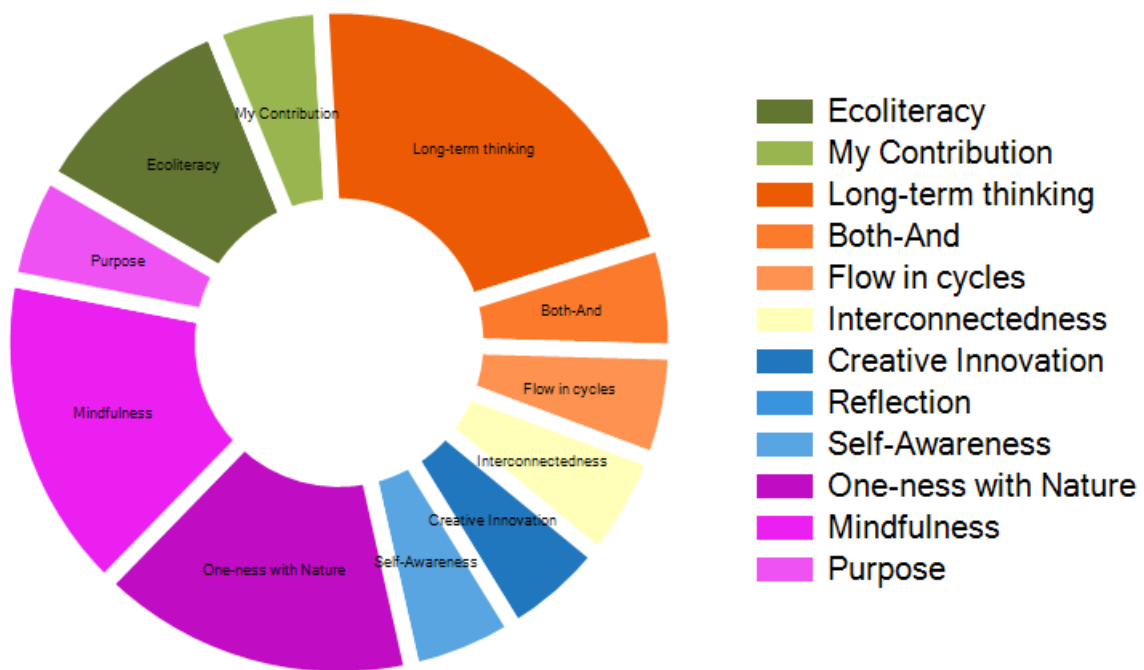

***Enjoy your journey into the realm of the Sustainability Mindset  
- a place where you can be your best, for yourself and for the  
World.***

*The SMI Team*

*/ Your overall*  
**SUSTAINABILITY  
MINDSET PROFILE**

The graph below shows your personal profile, indicating how – relatively to each other – you have developed your Sustainability Mindset. The wider sections indicate your stronger areas, and vice versa.

If you see some aspects listed in the side box that are not included in the graph, it means that these are areas to be considered more closely. It may be that you didn't feel represented by any of the statements to choose from, or it might be that your reality, context, and/or habits prompt you to think, act or feel differently. You will find further comments in this report about these aspects, exploring their up- and downsides.

# /ECOLOGICAL WORLDVIEW

An ECOLOGICAL WORLDVIEW is the result of having an intellectual and affective broad understanding of the planetary challenges, how they are interrelated, and how we are contributing to them.

## **/WHAT IS ASSESSED HERE: HOW YOU UNDERSTAND THE ENVIRONMENTAL AND SOCIAL CHALLENGES, AND HOW YOU FEEL ABOUT IT, AND THE IMPACT ON YOUR BEHAVIORS.**

### **What this tells you:**

**This graph shows the two dimensions of cognitive and behavioral, meaning that you have an intellectual understanding of this aspect, and you also act upon it. We don't have enough data to report if or how you connect with your feelings related to this item.**

**YOUR SMI RESPONSES INDICATE THAT** you have a good understanding of the complexity of the planetary challenges we are facing, and how they are interrelated.

**/YOU ARE COMFORTABLE WHEN** you act in ways that can minimize your ecological or social footprint, and/or help the sustainability of our planet with your daily decisions. We cannot comment on your feelings, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

### **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

We are definitely living in a time of information overload. It is challenging to stay on top of all that

is happening, while keeping up with our own obligations and activities. Furthermore, sustainability news tends to be on the negative side, creating doomsday scenarios and scary prophecies that can trigger anxiety, make us feel bad, sad, or worried.

Yet we tend to underestimate our own power and influence in shaping a better world. As a matter of fact, if the challenges we are currently experiencing are a product of past problematic behaviors, then we are also positively shaping the future of the planet with our current mindful decisions and restorative actions. That opens an interesting path.

You understand the scope of the sustainability challenges, from the environmental and social perspective; you notice linkages, relationships and connections.

The other powerful path is in our emotions. When we allow ourselves to connect from the heart with the reality of the news and find small ways to change our behavior, we are more present and don't need to live with our divided selves.

This can be more fulfilling.

### **/HOW ABOUT YOU TRY:**

Here are some suggestions to ponder: What are things you are good at that you aren't incorporating into your sustainability contributions? Who could benefit and where from your gifts and talents and possibly your passion?

*Understanding the state of the planet allows us to be more fully aware of the challenges, the complexity of how they are linked to each other, and to explore what it means to us.*

**/WHAT IS ASSESSED HERE:  
HOW YOU SEE THE RELATION  
BETWEEN INDIVIDUAL DECISIONS  
AND PLANETARY CHALLENGES, HOW  
YOU FEEL ABOUT IT AND THE  
IMPACT ON YOUR PERSONAL  
BEHAVIORS.**

**What this tells you:**

**This graph shows only one dimension – cognitive - indicating that you have knowledge about this aspect, without necessarily connecting it with your behaviors. You might use this information to seek ways to convert your understanding into action.**

**We don't have enough data to report about your feelings on this topic.**

**YOUR SMI RESPONSES INDICATE THAT** you periodically ponder if you are personally playing a role in the world's social or environmental problems of the world. Certainly you don't contribute to the problems intentionally, but you seem to pause and wonder in what ways you may be contributing to them.

This is not a pleasant thought, however, and it seems you realize that the problems are too large, too complex, and too long in the making, for you to possibly have responsibility for them. This thought may help calm distressing feelings and can

be a useful coping strategy. Perhaps you sense that you would be overwhelmed by emotions while feeling powerless to solve the problems.

**/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE THOSE STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

We cannot comment on your feelings related to this topic, since you indicated (by choosing "neither") that you did not feel represented by either of the available options. However, you indicate that you hope someone will eventually intervene to address those social or environmental problems. This perspective can also cause stress, as it assumes we are at the mercy of powerful external forces or individuals.

There may be another way to look at this: What if you could identify small ways in which you realize that you are contributing to the problems, and then, begin to explore changes that are within your control?

**/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

Thinking of how we are personally contributing to the planetary challenges may not be something we do daily. Our demanding lives have many obligations and don't leave much time for reflecting on this. We are busy getting things done!

Yet when analyzing the current un-sustainability of our planet, science has clearly established a link between human behaviors in past decisions and the current problems we face. Much attention is now focused on how to repair the damage done, and how to restore damaged, depleted or endangered resources. Scientists and entrepreneurs study how to minimize current or future problems at the environmental or social level, and how to innovate to avoid negative impacts into the future.

If we collectively influenced the place we find ourselves in now (with all of its problems), that means we also hold the key to influence where we will collectively be in the future – we meaning humankind at large, or, from a closer perspective, our families, children and grandchildren.

### **/HOW ABOUT YOU TRY:**

You are already asking yourself: *how am I contributing to this problem?* This question opens a path of inquiry, which automatically leads to expansion of your consciousness. You become more alert to take notice, and thus more open to try out new behaviors.

This same question, by the way, is also a powerful tool that can improve your relationships and interactions with others! So often we focus on what others are doing unto us, which leaves us powerless. When we learn to pay attention to what is our role in the problems we endure, we regain control and can actually do something.

Actively thinking about your contribution is definitely an important milestone in your personal development, with planetary implications.

So what are some habits that you are willing to change, to lower your contribution to the problems?

Certainly you will not solve the bigger problems, but you may feel more empowered, less at the mercy of others, and playing a role that you may actually enjoy. Food for thought.

*When we identify the ways in which we are unintentionally contributing to the problems, we have a chance to do something about them. It also expands our consciousness, and develops social sensitivity.*

# /SYSTEMS PERSPECTIVE

When analyzing information and making decisions a SYSTEMS PERSPECTIVE has a major impact on the sustainability of our actions.

**/WHAT IS ASSESSED HERE:  
HOW YOU THINK ABOUT THE LONG-  
TERM IMPACT WHEN ANALYZING  
AND MAKING DECISIONS,  
COMPLEMENTING SHORT-TERM  
THINKING; HOW YOU FEEL ABOUT  
IT, AND THE IMPACT ON YOUR  
BEHAVIORS.**

**What this tells you:**

**When the graph is well balanced, it means that you have a good understanding of the aspect of the Sustainability Mindset being assessed, that you are able to connect with your feelings about it, and that you tend to act upon what you know and feel. This is a good start, and you might want to think about circumstances or contexts in which you would like to act more, understand better or further explore your feelings.**

**YOUR SMI RESPONSES INDICATE THAT** you have a good understanding of the long-term sustainability impacts that our decisions may have, even the simple and daily ones, not to mention behaviors commonly accepted in our society.

In addition, this understanding is not indifferent to you: You are a sensitive person who seems to get worried about the long-term impact that your

decisions or lifestyle may be having on the planet. It is difficult to live with this feeling!

**/YOU ARE COMFORTABLE WHEN** you convert the emotional motivation into actions. In this case, you seem to have a natural tendency to think of “what ifs” and the long-term consequences of possible decisions before taking them.

This may not always be welcome in a team setting, but from the perspective of shaping a sustainable world, this contribution is a great asset to yourself and to your working groups. Your perspective will likely enrich actions, as they result from considering potential impacts in the longer term.

You probably sense that the world around demands a fast pace, decisiveness, focusing just on the tangible short term and continues as if no such thing as a long-term impact would be realistic. But change never starts as mainstream, and you may be showing a new way of doing things – for the sustainability of the whole.

**/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

There is definitely a tacit pressure to act promptly and focus on that which needs immediate attention. This is very important, and there are many circumstances where this way of responding is the optimal, or even the only one that matters. A fire in the house, for example. We can sense the urgency and it is not a good idea to pause and reflect on the long-term implications of the fire.

But for many daily decisions the context is different, and yet we still prioritize short-term thinking, often without even weighing any medium- or long-term impacts of what we are doing. The stream of life, our colleagues, perhaps everyone with whom we interact takes for granted that we “all” act this way.

On the other hand, with greater understanding of the social and environmental problems we are facing, it has become clear that the law of cause-and-effect is always at play, even if not immediately obvious. In other words, the consequences of our daily actions do have impacts - some over time, some just in a different geography, and many on both.

As with other aspects which are key for a sustainability mindset, it is not a question of choosing one over the other, but a matter of balancing both views and taking both time horizons into account.

This mental habit expands our consciousness, as we become more aware of the way we are impacting others and the world. Not thinking about this doesn't stop it from happening. Stretching our imagination to consider potential impacts across time helps us make better decisions, and play a more active role in shaping a better world.

This is something about which you seem to know quite a lot.

### **/HOW ABOUT YOU TRY:**

How comfortable are you bringing the long-term perspective into the conversation? Do you sense that sometimes you hold back, because it is not so popular? Are you fully aware that your perspective, by not being culturally mainstream, is what we all need more? Is this something that may encourage you further to speak up?

*Every action has consequences that are not immediately visible. Considering the long-term when analyzing situations and making decisions has a positive impact on global sustainability.*

**/WHAT IS ASSESSED HERE:  
HOW YOU THINK ABOUT AND DEAL  
WITH AMBIGUITY AND PARADOXES,  
HOW YOU RECOGNIZE DIVERSITY,  
FEEL ABOUT IT AND ACT TOWARDS  
IT.**

**What this tells you:**

**This graph shows only one dimension – cognitive - indicating that you have knowledge about this aspect, without necessarily connecting it with your behaviors. You might use this information to seek ways to convert your understanding into action.**

**We don't have enough data to report about your feelings on this topic.**

**YOUR SMI RESPONSES INDICATE THAT** you know that it is important to listen to others' perspectives, and to find solutions that can accommodate diverse needs, even compromising what is important to one or the other. At the same time, you are a pragmatic person that likes clarity in life.

**/YOU ARE COMFORTABLE** when you have clear choices - black and white options - and find a sense of stability and reassurance in holding onto

your values and your worldview. When faced with a new situation, you seek to rapidly frame it within what you have learned is "right" or "wrong."

This may be useful for avoiding gray areas, but perhaps you also miss understanding the complexities of the situation.

**/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

Many of our world's sustainability challenges originate in choices such as: "either the planet or the economy" and "either protect the wolves or the farmer." Yet, either-or choices can be misleading, and have us believe there are win-lose solutions that work. But do they really? If the cost is high, do they still work? When we find ourselves in a situation where we see it the right way, and others are wrong, what may we be missing that these others are seeing? How could we all benefit from having a fuller picture?

We cannot comment on your feelings related to this topic, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

But because much of the world is changing, you may feel compelled to be more understanding with others' perspectives, although this doesn't come easy to you and you may feel frustrated or impatient. Of course you wish there would be a solution that might make everyone happy, one that accommodates diverse ways of seeing the economy, ecosystems, the human race and the planet, but you don't think this may be realistic.

## /HOW ABOUT YOU TRY:

Here is a question to consider: Can you think of an event or situation, however minor, where someone with a different opinion was able to step into your shoes? How did it make you feel? How did it impact your attitude and your behavior? What if we could shape a world that makes room for different perspectives? Where you acknowledge others' points of view, and yours are also included by others?

Since we cannot control what others think or do, but do have control over our own way of thinking, there may be an interesting path worth exploring here.

## /THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

It seems that today, more than ever, we are collectively being confronted with paradoxes and ambiguity. Increased transparency and access to information from around the world makes us aware of very different ways of thinking, being and acting with which we may not agree or be comfortable.

Challenging as this may be, there is a benefit to it: We are becoming aware of our own worldviews just by realizing that there are other ways of seeing and feeling. This is an evolutionary insight of great value, the foundation for more peaceful societies. In a way, life is prompting us to expand our understanding and our scope of caring, which go hand in hand.

When we understand something, we can begin caring. This is the start of a better world for all.

*Both+and thinking allows us to understand paradoxes, and calls for creative solutions that are inclusive of all stakeholders.*

**/WHAT IS ASSESSED HERE:  
HOW YOU BALANCE YOUR CAPACITY  
TO ANALYZE AND PLAN WITH THE  
UNDERSTANDING OF NATURAL  
CYCLES, AND MAKE THEM PART OF  
YOUR MINDSET.**

**What this tells you:**

**This graph shows only one dimension – behavioral - meaning that you are action- oriented, without much engagement of your feelings and without necessarily thinking about this aspect intellectually. You might use this information to seek ways to expand your understanding and explore your emotions.**

**YOUR SMI RESPONSES INDICATE THAT** you see yourself aligned with the cyclical flow of nature, and in your behaviors you seek to express an understanding of impermanence.

**/YOU ARE COMFORTABLE** accepting that things grow, but not forever because there is also decline and death. In our day-to-day, this means accepting ageing and mortality, endings of relationships or certain phases in our life, and new beginnings as well.

In another context, it means that we see ourselves as part of nature, not as its controller-in-charge.

This is a valuable attitude, because it may make your life easier. Like swimming along with the river’s current, it increases your speed, and reduces the stress of resisting obstacles.

**/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE THOSE STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

You see the challenges life offers as opportunities to find intelligent solutions. Indeed, intellectual abilities are important for you, as they permit to control difficult situations, by crafting plans and setting goals to measure progress.

There seems to be a hesitation between the excitement of figuring out how to solve a problem, and the alternative of letting that solution go and observing what happens. A part of you likes to believe in and trust human ingenuity to figure out solutions for our environmental or social problems.

This idea gives you feelings of empowerment and control, which are nice feelings, particularly as they avoid the stress of uncertainty. Sometimes you feel more alive when making plans and implementing them, and derive a sense of fulfillment and satisfaction when you achieve goals you set for yourself.

While planning is a way to feel in control of situations, it is constantly challenged since life - with its countless variables - is too complex to be managed. It may be that same frustration, when things don’t work out as you planned or expected, that reminds you to let go and observe what the events are telling you. What happens when you do so?

## **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

You may be wondering why planning is related to several key aspects for a sustainability mindset. The connection is not in the planning as an activity per se, but in the way we think and process information when we plan. Planning is about organizing and structuring in order to control outcomes. Planning is linear by definition -one step after the other - and it assumes cause-effect relationships. But what about multi-effects, multi-causes, and feedback loops?

Contrast this with the sustainability problems we are facing. To begin with, they are complex and multidimensional by their very nature. Many are the result of our linear thinking, for example we believe that we can pursue unlimited growth, yet depletion of natural resources shows us this is not possible.

Our reliance on the human mind can create a collective assumption that we are in control, but a “small” manifestation like Covid-19 arrives as a surprise to debunk the myth of our own superiority.

Planning in itself is not the problem but rather, excessive reliance on carefully crafted steps, and forgetting the natural cycles of growth and decline.

## **/HOW ABOUT YOU TRY:**

Do you see yourself balanced in terms of making and letting go of plans? How do you balance structure and flow, organization and flexibility? What do you see as your personal development challenges in this aspect?

You may want to pay attention to when you get too attached to your plans, and experiment with letting go. Explore what you gain and what you lose by doing so. How aligned are your actions with

the understanding of natural cycles of growth and decline? What implications does this understanding have for you?

*There are no linear processes in Nature: Everything flows in cycles of birth, growth, death, and rebirth.*

*Many aspects of man-made unsustainability of the planet are a result of the misconception that we are not governed by this law of Nature.*

## **/WHAT IS ASSESSED HERE: HOW YOU UNDERSTAND AND EXPERIENCE INTERCONNECTEDNESS, VERSUS VALUES LIKE AUTONOMY AND INDEPENDENCE.**

### **What this tells you:**

**This graph shows only one dimension – cognitive - meaning that you have an intellectual understanding about this aspect. You are not necessarily engaging your feelings nor converting them into actions. You might use this information to explore your emotions related to this aspect of the sustainability mindset, and perhaps find ways to convert your understanding into actions.**

**YOUR SMI RESPONSES INDICATE THAT** you thrive in contexts where you can compete and work towards being your personal best.

You believe independence and autonomy are very important aspects of human life, perhaps as a combination of a given right, a personal goal and a precious virtue to cultivate. They signify ownership and accountability to you. You like to be faced with challenges. In fact, you enjoy the adrenaline that motivates you.

At the same time, you have a clear understanding that we are all interconnected, even in non-obvious ways, and that no one is really fully independent.

## **/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

The excitement of seeking to be successful, to win or to outperform others is a great feeling for you. Recognition may be a reward, but it is not always external: it can also be for your personal satisfaction and sense of accomplishment. You feel proud of your achievements and perceive them as a validation of your autonomy and personal capabilities in action. It is important for you to be self-sufficient as much as possible. This may come at a price.

It is not always possible to live up to other people's expectations, not to mention our own, which often are even higher!

Furthermore, in many settings where teamwork or collaboration is expected, it may be challenging to balance your individual performance with the collective contributions, and your personal efforts, gifts or skills may go unrecognized, or possibly even unappreciated.

## **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

You may not have given it much thought, but the polarities of independence vs. interconnectedness and competition vs. collaboration are of particular relevance when focusing on sustainability. To begin with, the environmental and social challenges are complex and multidimensional, making it impossible for any one person to solve

on their own. It is only through collective thinking, action and the collaboration of multiple stakeholders that we will be able to develop alternatives. (This, by the way, makes sustainability a great opportunity for contributing personal skills to a larger cause).

While certain cultures have a collectivistic framework, most of the western-northern culture - widely exported and globalized - is individualistic and celebrates personal achievement. However, is this realistic and even feasible?

### **/HOW ABOUT YOU TRY:**

We invite you to explore what autonomy means for you. What are the roots of this value for you, perhaps in your upbringing or in your current context? Is this authentically a priority for you, or is it something automatically inherited, or adopted without giving it much thought?

If you have identified an accomplishment that you consider authentically your merit, make a list of who may have played a role in it. Rank them, in order of relevance or impact on your success. What does this exercise tell you about the polarity of autonomy versus interconnectedness?

*When we see interconnectedness, we understand the importance of diversity, and our decisions and actions become more inclusive, which contributes to the sustainability of the whole.*

# /EMOTIONAL INTELLIGENCE

Understanding ourselves through the anchors of our identity, the pace of our life, and how we consider our intuitive wisdom are key for a sustainability mindset.

## **/WHAT IS ASSESSED HERE: HOW YOU INCORPORATE NON- RATIONAL INFORMATION, INTUITIVE KNOWING, CREATIVITY AND IMAGINATION IN ORDER TO BALANCE RATIONAL THINKING, AND HOW YOU FEEL ABOUT IT.**

### **What this tells you:**

**This graph shows only one dimension – cognitive - indicating that you have knowledge about this aspect, without necessarily connecting it with your behaviors. You might use this information to seek ways to convert your understanding into action.**

**We don't have enough data to report about your feelings on this topic.**

**YOUR SMI RESPONSES INDICATE THAT** you have a clear understanding of the value of combining your logical and analytical thinking abilities with creative imagination.

You know that the human mind is capable of great accomplishments, as history has shown, when intuition and creative ideas are coupled with rational thinking and good strategies. You may even trust that our sustainability problems could

be addressed with a good balance of these abilities.

At the same time, **you feel most comfortable** being the contributor of rational thinking when analyzing a problem. You may find yourself in the role of the defender of structure and stability, and the keeper of the status quo. You are careful to avoid what you consider as unnecessary risks.

We cannot comment on your feelings about this topic, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

How well do you balance your strategic thinking with some creative imagination?

## **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

The reason for this question is that the sustainability challenges we are facing are largely new, and as COVID-19 taught us, increasingly situations arise for which we don't have previous experience or science on which to rely.

We have become more aware of the complexity of our challenges, and we are skeptical of simplistic solutions. This requires entry into uncharted territories. Resilience calls for flexibility in adapting to new situations, and this entails innovating and experimenting. Having no plans or blueprints to follow may be unsettling, and the only choice is to take some risks.

**/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

How comfortable do you feel when experimenting without knowing? Here is a thought to consider: What are some situations in which you are creative, relaxed and playful? Perhaps cooking or gardening? Playing some team sports? Or around small children? Maybe planning a party?

If you can identify some of these creative and playful moments, in them you have a reservoir of imagination available to tap into. This can help you complement your strategic thinking and maximize your achievements for the benefit of all.

*Resilience is based on constant creativity, innovation, and experimentation. When we neglect the non-rational wisdom we have in us, our solutions are missing critical information, and may create negative impacts on the ecosystem and society.*

**/WHAT IS ASSESSED HERE:  
HOW YOU NOTICE YOUR OWN PACE,  
AND HOW YOU BALANCE RAPID  
RESPONSE WITH MAKING TIME TO  
PONDER AND REFLECT BEFORE  
ACTING. AND HOW THIS MAKES  
YOU FEEL.**

**/YOUR SMI CHOICES INDICATE THAT** you see the importance of swift actions in a world that you believe is unforgiving of slow-movers. You know that the present day pace is fast or highly accelerated, depending upon who you ask. You are a true citizen of our times!

**YOU ARE COMFORTABLE.** This fits you well, as you have no concerns about making a quick assessment of a situation and acting promptly. You are a quick thinker, and while you may overlook some details, you consider that your decisiveness also helps stimulate those that are more hesitant. Speed is justified.

As a matter of fact, you thrive on the adrenaline of urgency. You find multitasking very stimulating and are gifted with endurance. You enjoy the tension which brings out your best performance.

**/THINK ABOUT HOW YOU CAN  
FURTHER LEVERAGE YOUR  
STRENGTHS AND MANAGE SOME  
OF THE LIMITATIONS WHICH MAY  
BE HOLDING YOU BACK:**

Does it ever happen that you wish you could relax, slow down and do nothing? Does your body, your mind or perhaps your soul call for less stress, or

even a break? What message might be there for you, waiting to be heard?

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

Since we are looking at these aspects from the perspective of a sustainability mindset, let's pause and think about what behaviors might be most effective as well as much needed.

While there is a call for urgent action about climate change and the related social and environmental problems, many modern sustainability challenges are actually the result of overlooked potential impacts.

For decades, well-intended decisions were largely made by quickly identifying the best option. But today we are understanding better that problems are complex, that solutions impact a multiplicity of future stakeholders, and that there are always consequences.

Of course, it is not possible to anticipate all scenarios, but pausing and checking assumptions as you do it can be very useful to avoid future problems.

**/HOW ABOUT YOU TRY:**

For example, what can you learn to avoid or repeat from past experiences? Can you identify in hindsight, what was at stake? When we have more information we can better weigh alternatives. All of this, however, is at odds with speed. We cannot both act fast and ponder carefully.

The question becomes: Is decisiveness and fast action coming at an expensive price for you and others, us, the next generations, and the ecosystem? Food for thought!

*Reflective practices help to pause,  
and to ponder the situation and its  
implications before jumping into  
action.*

## **/WHAT IS ASSESSED HERE: HOW AWARE YOU ARE ABOUT THE ANCHORS OF YOUR IDENTITY AND YOUR VALUES; HOW YOU FEEL AND ACT IN CONSEQUENCE.**

### **What this tells you:**

**This graph shows only one dimension – cognitive - meaning that you have an intellectual understanding about this aspect. You are not necessarily engaging your feelings nor converting them into actions. You might use this information to explore your emotions related to this aspect of the sustainability mindset, and perhaps find ways to convert your understanding into actions.**

**YOUR SMI RESPONSES INDICATE THAT** you believe the paradigm we have long been living with is due for a revision, because values like growth and progress may be linked to an assumption of unlimited resources, which may not be realistic.

At the same time, you don't see any pragmatic alternatives at hand. Your selections in the questionnaire indicate that you are focused on addressing your many personal obligations and challenges, and you don't have the bandwidth to

entertain seemingly 'philosophical' concerns about the future of humanity, our personal or modern values, or the planet. You are aware that your views may not be "politically correct," but this is how you see things today.

**You are well aware:** Certainly, you are aware that there is an increasing trend to highlight the negative consequences of progress, of capitalism, or of society in general, and this seems to make you feel uncomfortable, even upset. It is possible that you, yourself, sense a personal tension between the gravity of what we are facing as humanity and your individual bewilderment about what you might actually do to help prevent or solve the problems. For example, you may feel that climate change is too complex to be attributed to our mere daily behaviors.

In addition, the tension may put into question the values with which you were raised or grew up, and this is likely an uncomfortable experience, particularly if these values have been important for you, or are an important part of your identity. For instance, achievement, competition, being a winner, not being a loser, and success may have been important foundations of who you are. You may wonder what makes them suddenly feel wrong!?

These may be difficult dilemmas for you right now.

## **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

Let's pause for a moment. This survey was designed around the Sustainability Mindset, which is a way of thinking and being, to optimally adapt to the moment in which we are living. This Mindset focuses on using our natural gifts to shape a better future, for ourselves and for all, the ecosystem included.

Research has proven that what may sound overwhelming, actually can be broken down into small, realistic ways to contribute to the greater good, and, as you well know, feel great at the same time. The first step is taking a fresh look at what surrounds us.

Undoubtedly, there are social and environment related challenges everywhere. Some happen locally, others across borders. Science has been linking many of these issues to human behaviors, such as consumption of unhealthy foods, depletion of natural resources, pollution or contamination of air, soil and water. And we are left to deal with the consequences today, trapped in a paradigm that prioritizes values that have a negative impact, such as thoughtless consumption.

But what if we would realize that some our habits today are (unintentionally) contributing to more of these problems in the future? And vice versa: What if a change in a small habit today could do its part to shape a better future?

### **/HOW ABOUT YOU TRY:**

Can you think of a habit of yours that might qualify? We don't know what we can until we try. And when we put aside cynicism for a moment, we actually may feel a deep sense of joy. Sometimes we shift our values as a result of a new experience. Worth trying?

*When we explore our personal values, beliefs, assumptions and motivations, we gain greater control over our actions and we can see new alternative behaviors.*

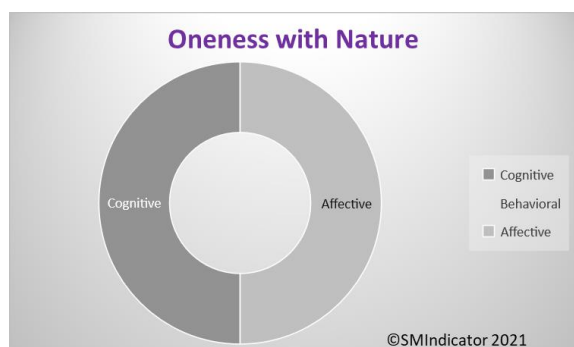

# /SPIRITUAL INTELLIGENCE

The spiritual orientation to Nature, to ourselves and to others are key factors for a Sustainability Mindset, as they impact the quality of our actions.

**/WHAT IS ASSESSED HERE:  
HOW YOU EXPERIENCE NATURE,  
HOW YOU UNDERSTAND THE  
HUMAN RELATIONSHIP WITH  
NATURE, AND YOUR RELATED  
FEELINGS AND BEHAVIORS.**

**What this tells you:**

**This graph shows that your approach to the assessed topic is both cognitive and affective. We don't enough have data to report about your behaviors and whether or how your understanding and feelings are converted into actions.**

**YOUR SMI RESPONSES INDICATE**

**THAT** you think of Nature as an experience that offers more wisdom than we can intellectually grasp. You see the limitations of pure rationality, and realize that the intellectual capability is valuable for building scientific knowledge, but also frequently overstated.

You realize that our comprehension of the natural world, including our bodies, has certainly advanced over time, but in the history of science findings are always within the constraints of available instruments, paradigms or assumptions. It is clear to you that over time, the development of more precise measurement techniques or

revolutionary thinking has revealed the myopic or biased conclusions of the past!

**/THINK ABOUT HOW YOU CAN  
LEVERAGE YOUR STRENGTHS AND  
MANAGE SOME OF THE LIMITATIONS  
WHICH MAY BE HOLDING YOU  
BACK:**

Your understanding may be the result of some special moments, when you stood in awe admiring Nature, your heart perhaps filled with joy and some kind of wordless experience of beauty. We cannot comment on the impact that this understanding has upon your behaviors, since you indicated (by choosing "neither") that you did not feel represented by either of the available options.

However the combination of your choices in this questionnaire seem to show that those powerful moments created a disposition towards empathy. How do you manage the tensions of living in a context that mostly rewards rational thinking and intellectual capabilities?

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

Research has indicated that the experience of oneness with Nature has a direct connection to shaping a more sustainable society and planet. However you know this is not yet mainstream.

According to a 2018 United Nations study, over 55% of the world's population lives in urban areas, a proportion that is expected to increase to 68% by 2050. As a result, for many of us, the disconnection from Nature is rather "natural." Hectic life in large cities makes it difficult for us to remember that we are more than individuals moving through traffic and buildings.

You know it well: We need to re-connect with Nature and re-establish the experience of oneness that has been lost, causing not only spiritual alienation but also the artificial separation from the ecosystem. It has been found related not only to spiritual alienation, but is the root cause for many unsustainability behaviors.

When we understand something we start caring for it. Understanding that we are one with Nature is a sensorial, intuitive experience. It is not something to be learned, but rather something that we allow to occur, and which makes us remember the sense of oneness we have always known, but had forgotten.

### **/HOW ABOUT YOU TRY:**

Sometimes we realize that our thinking, feeling and acting are not fully aligned. When we notice it, we may feel discomfort and tension- something out of sync. A sustainability mindset is not just harmony with the ecosystem, but rather starts with harmony within ourselves.

How do you describe your own balance between what you think and value, how you feel and act with respect to Nature? Is there something you need to revise, to feel more authentically who you are? Is there a part of you that is still clinging to an old paradigm? Why might that be so?

*Understanding that we are one with Nature, a species within species, is a powerful spiritual experience that can shape behaviors leading to a more harmonious relationship with each other and all beings.*

**/WHAT IS ASSESSED HERE:  
HOW YOU THINK ABOUT THE  
MEANING, ROLE AND VALUE OF  
MINDFULNESS AND ITS PRACTICE,  
AND HOW YOU FEEL ABOUT IT.**

**What this tells you:**

**This graph shows two dimensions, the behavioral and affective. This means that you connect emotionally with this aspect, and act upon it, perhaps without a full understanding of why it is important. You may find it interesting to deepen your understanding of this principle.**

**YOUR SMI RESPONSES INDICATE THAT** you have a pragmatic approach to life.

You are very aware that society rewards action and its ensuing achievements, rather than inaction and passivity, which is kind of what mindfulness practice seems to you. You may be aware that other cultures have different behavioral patterns from the one in which you live, but you are cognizant of the importance of adapting to the culture to which you belong. As the saying goes, “when in Rome do as the Romans do”.

You realize there may be an impact on our health and wellness, like being in a race to pursue the moving targets of our goals.

You indicate that you have discovered activities that quiet your mind, and help you gain some inner peace. You may not make these a regular practice, but when you engage in them, you can recognize the positive effect they have on your wellbeing. At the same time, it seems quite challenging for you to make the time and space for these moments.

**/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

Studies show the physical and emotional consequences of a constant focus on doing while overlooking the more profound dimensions of “being,” such as reflection, spiritual or religious practices, time to recharge and find ourselves, and time to connect with our deeper self.

You have experienced it firsthand: When you allow some time to nurture this neglected part of yourself, you experience a positive impact on how you feel about yourself, and how you interact with others. At the same time, it seems quite challenging to make the time and space for those moments.

Sometimes you hear people say “you should do less, you should relax, you should take time for yourself”, and these suggestions may sound anywhere from unreal to ridiculous from your perspective, since you are the one living with the challenges. Of course you know what you ‘should’ do, but you are doing your best all the time.

Pausing and stepping away from our task clears our mind, and we can get back with renewed energy. Is this something you remember to do when you need it? If not, how could you help yourself remember it just in time?

## /HOW ABOUT YOU TRY:

So here are some questions for you to contemplate.

Has it ever occurred to you that the fact that “everyone lives like this” may not necessarily make it ideal? Have you ever reflected on the high value our world gives to consumption, linking “who we are” with “what we have or own”? How do these thoughts align with your experience, and with your values? Does your reality reflect the priorities that are important for you? If not, what are some small changes you can make?

*Mindfulness is being fully present, experiencing connectedness with all that is. Mindfulness enhances awareness and compassion, and predisposes to social and environmental actions.*

## /THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

From the perspective of a sustainability mindset, mindfulness is both a key practice and an amazing result. Research has shown a direct link between individuals that have some contemplative practices not just with their physical and psychological health, but also with the emergence of feelings of empathy and compassion.

This creates a disposition towards positive social and environmental actions, and the resulting satisfaction feeds a positive reinforcing loop. In other words, the better we feel about something we’ve done, the more we seek to repeat the experience.

When we access and display a more balanced version of ourselves, we convey an unspoken message to the people with whom we interact, not just by what we say or how we behave, but through our attitude and energy. This has a proven positive influence on others, as science has identified with the phenomenon of “emotional contagion.”

In other words, when we develop a sense of peace for ourselves, we are also radiating a gift of peace to the world. What are some ideas to try out?

**/WHAT IS ASSESSED HERE:  
WHAT YOU THINK ABOUT HAVING A  
PURPOSE IN LIFE, PARTICULARLY  
SOMETHING THAT IS IN SERVICE TO  
OTHERS; HOW THIS FITS YOUR  
REALITY AND HOW YOU FEEL ABOUT  
IT.**

**What this tells you:**

**This graph shows only one dimension – cognitive - meaning that you have an intellectual understanding about this aspect. You are not necessarily engaging your feelings nor converting them into actions. You might use this information to explore your emotions related to this aspect of the sustainability mindset, and perhaps find ways to convert your understanding into actions.**

**YOUR SMI RESPONSES INDICATE THAT** you think it is important to find a purpose in life, to identify something that, by making a difference, makes our life meaningful.

At the same time, you know how to set priorities, because what is urgent needs attention before what sounds important, like thinking about what is our purpose in life. This is an important skill in times when there seem to be more obligations and

things we are expected to take care of, than hours in a day.

Work, family, relationships, career or health issues can use up all your available energy, often even leaving you with the feeling that nothing you do is enough. When topics arise like contributing to society, you believe this may be something to do once your other obligations diminish and you free up some time, hopefully in retirement.

Because of this combination, you tend to get impatient with people who talk about having a purpose or a mission in life, or “changing the world.” You compare these words with your current reality, and they sounds overoptimistic, grandiose, or unrealistic. Perhaps these people don’t have the same challenges you have to manage, or maybe they just want to look good. Either way, it’s not your reality.

**/THINK ABOUT HOW YOU CAN  
LEVERAGE YOUR STRENGTHS AND  
MANAGE SOME OF THE  
LIMITATIONS WHICH MAY BE  
HOLDING YOU BACK:**

All that said, research has shown that individuals who engage in activities of service to the community, volunteering or some kind of initiative for the greater good have a higher sense of wellbeing than those who do not. This includes benefits to health, feelings of joy, increased self-esteem, and personal satisfaction.

In contrast, you may have personally experienced that focusing on the extreme demands of your life sometimes takes a toll on your health, your mood, creating tension or anxiety, disrupts your sleep or impacts how you interact with others. Oftentimes, you don’t feel happy with yourself or with others. Have you asked yourself what you could do to feel better, to lower your stress? Perhaps you have, but the answer you found may have been as long as

your demands remain high, there is not much you can do.

### **So here, again, some thoughts to evaluate:**

Which of the activities that you engage in are a necessity, a “must-do,” and which ones represent a choice? Who would do these activities if it were not you? What would it take to let go of some activities, or perhaps of “how” you do them?

These questions have an agenda: to help you free up some time and space to try out a different experience, one that consists of something you do for others outside your inner circle.

### **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

The research regarding core aspects for a sustainability mindset identified the role of activities intentionally done for the “greater good.” The state of our planet is such that it requires each of us to step up and play an active role in shaping a better world.

The actions needed, whether large or small, share a similar result: they provide us with a feeling of joy, which then we want to replicate in order to feel good again, thus creating a reinforcing loop. Interestingly, we tend to think that we need to take care of ourselves first, before helping others, but the facts show that when we do small acts of kindness for others, we feel much better ourselves.

### **/HOW ABOUT YOU TRY:**

With this in mind, what are some new experiments you can try? What are some different things for the greater good that you already did, and perhaps could repeat, do regularly, or improve? Which of your natural gifts and skills could you put into service for the greater good, in a cause for which you have a passion?

Don’t get intimidated by grandiose words like ‘changing the world’ or having a life mission or purpose. In fact, each small action of kindness has already an impact that we may never be able to imagine. That is also changing the world, one interaction at a time.

*Defining our purpose provides an unconscious compass, and when it is grounded in values of our higher self, we actively shape a better world.*
