

Sustainability  
Mindset  
Indicator®

**/REPORT  
PREPARED FOR:  
Jean Vanhoegaerden  
26/Feb/2024**

Welcome to your Personalized Report. This Report is based on your selections on the SMI. It is meant to be a personal development tool, to highlight aspects of your understanding, behaviors and feelings related to your Sustainability Mindset (SM).

You will find observations that you may identify with, others that you vaguely recognize, and others that perhaps don't resonate with you. Keep what you need and what makes sense to you.

You will also find questions to consider, suggestions for things you can try, and information related to the aspects covered in this report, and how these are related to the Sustainability Mindset.

Take your time reading your Report. Pause, take notes, and reflect. It is all about you, and for you. There were no wrong answers in the survey. Only good options and perhaps some that you hadn't thought of.

# /WHAT YOU WILL FIND IN THE FOLLOWING PAGES

This Personalized Report is organized into several sections. The first section contains a graph, displaying how the different aspects assessed compare to each other, according to your choices in the survey. Those that occupy a larger area are your stronger ones and the narrower or missing ones are aspects of the Sustainability Mindset that are less developed or absent for you, as inferred from the combination of your answers.

The next section presents personalized descriptions of where you find yourself on your journey towards a Sustainability Mindset, in four clusters: Ecological Worldview, Systems Perspective, Emotional Intelligence, and Spiritual Intelligence.

Within each of these clusters you will find what aspects were assessed, and a graph for each aspect displaying how you connect to this topic, whether intellectually, through your actions and behaviors and/or by engaging your emotions.

If you see some areas missing within the graph, it means that either you selected "neither" for that question and therefore we don't have information to report on, or your answers suggest you don't engage in one or more particular areas (cognitive, behavioral or affective). Similarly, if you selected "neither" for all the questions within one aspect, we don't include a graph, since we don't have information to report on.

Each graph is accompanied by a box with a brief explanation, and you will find much more information in the text to include what your choices suggest, why this particular aspect is key for a sustainability mindset, and questions to ponder and suggestions to try.

***Enjoy your journey into the realm of the Sustainability Mindset - a place where you can be your best, for yourself and for the World.***

*The SMI Team*

*/ Your overall*  
**SUSTAINABILITY  
MINDSET PROFILE**

The graph below shows your personal profile, indicating how – relatively to each other – you have developed your Sustainability Mindset. The wider sections indicate your stronger areas, and vice versa.

If you see some aspects listed in the side box that are not included in the graph, it means that these are areas to be considered more closely. It may be that you didn't feel represented by any of the statements to choose from, or it might be that your reality, context, and/or habits prompt you to think, act or feel differently. You will find further comments in this report about these aspects, exploring their up- and downsides.

# /ECOLOGICAL WORLDVIEW

An ECOLOGICAL WORLDVIEW is the result of having an intellectual and affective broad understanding of the planetary challenges, how they are interrelated, and how we are contributing to them.

**/WHAT IS ASSESSED HERE:  
HOW YOU UNDERSTAND THE  
ENVIRONMENTAL AND SOCIAL  
CHALLENGES, AND HOW YOU FEEL  
ABOUT IT, AND THE IMPACT ON  
YOUR BEHAVIORS.**

**What this tells you:**

**This graph shows that your approach to the assessed topic is both cognitive and affective, but you are not necessarily translating what you know and feel into actions. You might use this information to explore new habits and daily changes for a sustainability purpose.**

**YOUR SMI RESPONSES INDICATE THAT** you have a good understanding of the complexity of the planetary challenges we are facing, and how they are interrelated.

You also seem to be socially sensitive and have empathy for the suffering of others. This may be creating some emotional stress, perhaps feelings of being overwhelmed by a reality that you think you cannot change.

But is it really so, that you cannot influence and make a difference?

**/THINK ABOUT HOW YOU CAN  
FURTHER LEVERAGE THOSE  
STRENGTHS AND MANAGE SOME OF  
THE LIMITATIONS WHICH MAY BE  
HOLDING YOU BACK:**

You understand the scope of the sustainability challenges, from the environmental and social perspective; you notice linkages, relationships and connections. The other powerful path is in your emotions. Your social sensitivity is a special gift. Yet somehow, you are not connecting what you know and how you feel, with actions or behaviors that could contribute to greater sustainability.

You have an opportunity there to put your unique gifts and passions to use for the greater good. When we allow ourselves to connect from the heart with the reality of the news and find small ways to change our behavior, we are more present and don't need to live with our divided selves. This can be more fulfilling.

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

We are definitely living in a time of information overload. It is challenging to stay on top of all that is happening, while keeping up with our own obligations and activities. Furthermore, sustainability news tends to be on the negative side, creating doomsday scenarios and scary prophecies that can trigger anxiety, make us feel bad, sad, or worried.

Yet we tend to underestimate our own power and influence in shaping a better world. As a matter of fact, if the challenges we are currently experiencing are a product of past problematic behaviors, then we are also positively shaping the future of the planet with our current mindful decisions and restorative actions. That opens an interesting path.

**/HOW ABOUT YOU TRY:**

Here are some suggestions to ponder:

What are things you are good at that you aren't incorporating into your sustainability

contributions? Who could benefit and where from your gifts and talents and possibly your passion? What do you see as your next frontier of development?

*Understanding the state of the planet allows us to be more fully aware of the challenges, the complexity of how they are linked to each other, and to explore what it means to us.*

**/WHAT IS ASSESSED HERE:  
HOW YOU SEE THE RELATION  
BETWEEN INDIVIDUAL DECISIONS  
AND PLANETARY CHALLENGES, HOW  
YOU FEEL ABOUT IT AND THE  
IMPACT ON YOUR PERSONAL  
BEHAVIORS.**

**What this tells you:**

**When the graph is well balanced, it means that you have a good understanding of the aspect of the Sustainability Mindset being assessed, that you are able to connect with your feelings about it, and that you tend to act upon what you know and feel. This is a good start, and you might want to think about circumstances or contexts in which you would like to act more, understand better or further explore your feelings.**

**YOUR SMI RESPONSES INDICATE THAT** you periodically ponder if you are personally playing a role in the world's social or environmental problems of the world. Certainly you didn't create the problems intentionally, but you seem to pause and wonder in what ways you may be contributing to them.

**/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE THOSE STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

Because you are a very sensitive person, with an open heart, realizing that you are part of the problem may bring up feelings of guilt, sadness, despair or anxiety.

Yet, are you aware that your ability to connect truthfully to your own emotions is actually a valuable skill that is much needed in the world?. Your sensitivity also helps you to feel for others, with empathy and compassion for their suffering. This is a precious quality, although at times it can be difficult to live with it.

**/YOU ARE COMFORTABLE WHEN** you find a way to convert the emotional energy into action, by taking a proactive role. Instead of remaining "the victim," you choose to act. You find small ways in which you are contributing to the problems and seek out those changes you could make to be less a "part of the problem" and become part of the solution. This is a wonderful start!

The more you observe, the more opportunities you will find to make a real difference with a few simple changes to your behavior and habits.

**/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

Thinking of how we are personally contributing to the planetary challenges may not be something we do daily. Our demanding lives have many obligations and don't leave much time for reflecting on this. We are busy getting things done! Yet when analyzing the current unsustainability of our planet, science has clearly established a link between human behaviors in past decisions and the current problems we face.

Much attention is now focused on how to repair the damage done, and how to restore endangered or depleted resources. Scientists and entrepreneurs study how to minimize current or future problems at the environmental or social level, and how to innovate to avoid negative impacts into the future.

If we collectively influenced the situation we find ourselves in now (with all of its problems), that means we also hold the key to influence where we will collectively be in the future – we meaning humankind at large, or, from a closer perspective, our families, children and grandchildren.

*When we identify the ways in which we are unintentionally contributing to the problems, we have a chance to do something about them. It also expands our consciousness, and develops social sensitivity.*

### **/HOW ABOUT YOU TRY:**

What do you see as your next developmental frontier? Consider how to make a more frequent habit of asking yourself “How am I contributing to this?” This question opens a path of inquiry, which automatically leads to expansion of your consciousness. You become more alert to take notice, and thus more open to try out new behaviors.

This same question, by the way, is also a powerful tool that can improve our relationships and interactions with others! So often we focus on what others are doing unto us, which leaves us powerless. When we learn to pay attention to what is our role in the problems we endure, we regain control and can actually do something.

Actively thinking about your contribution is definitely an important milestone in your personal development, with planetary implications.

Other possibilities to ponder: To be more creative in your actions, perhaps use more of your unique talents to make a difference.

How might you connect more from the heart with others?

Food for thought!

# /SYSTEMS PERSPECTIVE

When analyzing information and making decisions a SYSTEMS PERSPECTIVE has a major impact on the sustainability of our actions.

**/WHAT IS ASSESSED HERE:  
HOW YOU THINK ABOUT THE LONG-  
TERM IMPACT WHEN ANALYZING  
AND MAKING DECISIONS,  
COMPLEMENTING SHORT-TERM  
THINKING; HOW YOU FEEL ABOUT  
IT, AND THE IMPACT ON YOUR  
BEHAVIORS.**

**What this tells you:**

**This graph shows that your approach to the assessed topic is both cognitive and affective, but you are not necessarily translating what you know and feel into actions. You might use this information to explore new habits and daily changes for a sustainability purpose.**

**YOUR SMI RESPONSES INDICATE THAT** you have a good understanding of the long term sustainability impacts our decisions may have, even simple and daily ones, not to mention behaviors commonly accepted in our society.

In addition, this understanding is not indifferent to you: you are a sensitive person, who seems to get worried about the long term impact that your personal lifestyle or decisions may be having on the planet. It is difficult to live with that feeling!

At the same time, you are pragmatic and prefer to focus on the short term when trying to solve a

problem, because it seems more tangible, concrete and functional.

**/YOU ARE COMFORTABLE** solving problems: looking for quick ways to address a situation, and seeking to simplify matters. Acting promptly is important for you, and it provides you and others with a sense of control and direction. It saves time (so it seems).

**/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

What comes up from this combination is that there seems to be a disconnect between what you know about the long term impacts of our behaviors, and the way you solve problems, focusing rather on the short term.

Perhaps bringing your understanding into actions is easier than it may seem. For example, what would your latest decision look like if you would have considered the potential long term impacts? It takes practice to develop new mental habits, but they too, can have long term impacts – for the good.

It is because of people with your sensitivity that changes happen in the world. Any thoughts of what you could do?

**/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

There is a tacit pressure to act promptly and focus on that which needs immediate attention. This is very important, and there are many circumstances where this way of responding is the optimal, or even the only one that matters. A fire in the house, for example. We can sense the urgency and it is not a good idea to pause and reflect on the long-term implications of the fire.

But for many daily decisions, the context is different, and yet we still prioritize short term thinking, often without even pondering any medium- or long-term impacts of what we are doing. The stream of life, our colleagues, perhaps everyone with whom we interact takes for granted that we “all” act this way.

On the other hand, with greater understanding of the social and environmental problems we are facing, it has become clear that the law of cause-and-effect is always at play, even if not immediately obvious. In other words, the consequences of our daily actions do have impacts - some over time, some just in a different geography, and many on both.

As with other aspects key for a sustainability mindset, it is not a question of choosing one over the other, but a matter of balancing both views, taking both time perspectives into account.

This mental habit expands our consciousness, as we become more aware of the way we are impacting others and the world. Not thinking of it doesn't avoid it from happening. Stretching our imagination to consider potential impacts helps us make better decisions, and play an active role shaping a better world.

Something you seem to know a lot about.

### **/HOW ABOUT YOU TRY:**

How comfortable are you bringing the long-term perspective into the conversation? Do you sense that sometimes you hold back, because it is not so popular? Are you fully aware that your perspective, by not being culturally mainstream, is what we all need more? Is this something that may encourage you further to speak up?

*Every action has consequences that are not immediately visible. Considering the long-term when analyzing situations and making decisions has a positive impact on global sustainability.*

**/WHAT IS ASSESSED HERE:  
HOW YOU THINK ABOUT AND DEAL  
WITH AMBIGUITY AND PARADOXES,  
HOW YOU RECOGNIZE DIVERSITY,  
FEEL ABOUT IT AND ACT TOWARDS  
IT.**

**What this tells you:**

**If a graph shows the two dimensions - cognitive and behavioral - it means that your tendency is to distance yourself from your feelings, particularly in the aspect assessed here. You have a good understanding about it, and are acting upon it, but you might want to further explore your emotions in relation to it.**

**YOUR SMI RESPONSES INDICATE THAT** you know that it is important to listen to other perspectives, and to find solutions that can accommodate diverse needs, even compromising what is important to one or the other.

**/YOU ARE COMFORTABLE** exploring how other people arrive at their opinions and perspectives, puzzling as they may look to you. It is possible that you engage in conversations to understand them. It may almost feel like a "civilized duty".

This is very valuable, particularly in our polarized times. Your behaviors certainly are inspiring others or giving them something to ponder.

**/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

You are aware that the world is changing and you feel compelled to be more understanding with others' perspectives. Your choices in the questionnaire indicate that nevertheless, this doesn't come easy to you and you may feel frustrated or impatient. You seem to have deeply held values and points of view, which are important to you, and it becomes challenging sometimes to moderate your emotions when you have to deal with very different, perhaps unacceptable perspectives.

Welcome to life! You are not alone in the struggle to be understanding and also to feel OK with it. You already have come far in your personal journey, as you have comprehension and are seeking to act on it.

Here is a thought to ponder: Can you think of a small event, a situation, where someone with a different opinion was able to step into your shoes? Not only that, but that that person actually found a way to meet your needs, respect your interests, although it was very different, perhaps opposed to their own needs? How did it make you feel? How did it impact your behavior, your attitude? Did you feel gratitude perhaps? Have you given that feedback to the person?

It is wonderful to experience our perspective included by others. Since we cannot control what others think or do, but have control over our own way of thinking, there may be an interesting path worth exploring here.

## **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

It seems that today, more than ever, we are collectively being confronted with paradoxes and ambiguity. Increased transparency and access to information from around the world makes us aware of very different ways of thinking, being and acting with which we may not agree or be comfortable.

Challenging as this may be, there is a benefit to it: We are becoming aware of our own worldviews just by realizing that there are other ways of seeing and feeling. This is an evolutionary insight of great value, the foundation for more peaceful societies. In a way, life is prompting us to expand our understanding and our scope of caring, which go hand in hand.

When we understand something, we can begin caring. This is the start of a better world for all.

## **/HOW ABOUT YOU TRY:**

In what areas does empathy and inclusion come easier to you, and which situations are more challenging? This is your work.

There are multiple daily opportunities to expand your acceptance of differences, in new ways. Any thoughts?

*Both+and thinking allows us to understand paradoxes, and calls for creative solutions that are inclusive of all stakeholders.*

**/WHAT IS ASSESSED HERE:  
HOW YOU BALANCE YOUR CAPACITY  
TO ANALYZE AND PLAN WITH THE  
UNDERSTANDING OF NATURAL  
CYCLES, AND MAKE THEM PART OF  
YOUR MINDSET.**

**What this tells you:**

**This graph shows only one dimension – behavioral - meaning that you are action- oriented, without much engagement of your feelings and without necessarily thinking about this aspect intellectually. You might use this information to seek ways to expand your understanding and explore your emotions.**

**YOUR SMI RESPONSES INDICATE THAT** you see yourself aligned with the cyclical flow of nature, and in your behaviors you seek to express an understanding of impermanence.

**/YOU ARE COMFORTABLE** accepting that things grow, but not forever because there is also decline and death. In our day-to-day, this means accepting ageing and mortality, endings of relationships or certain phases in our life, and new beginnings as well.

In another context, it means that we see ourselves as part of nature, not as its controller-in-charge.

This is a valuable attitude, because it may make your life easier. Like swimming along with the river’s current, it increases your speed, and reduces the stress of resisting obstacles.

**/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE THOSE STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

You see the challenges life offers as opportunities to find intelligent solutions. Indeed, intellectual abilities are important for you, as they permit to control difficult situations, by crafting plans and setting goals to measure progress.

There seems to be a hesitation between the excitement of figuring out how to solve a problem, and the alternative of letting that solution go and observing what happens. A part of you likes to believe in and trust human ingenuity to figure out solutions for our environmental or social problems.

This idea gives you feelings of empowerment and control, which are nice feelings, particularly as they avoid the stress of uncertainty. Sometimes you feel more alive when making plans and implementing them, and derive a sense of fulfillment and satisfaction when you achieve goals you set for yourself.

While planning is a way to feel in control of situations, it is constantly challenged since life - with its countless variables - is too complex to be managed. It may be that same frustration, when things don’t work out as you planned or expected, that reminds you to let go and observe what the events are telling you. What happens when you do so?

## **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

You may be wondering why planning is related to several key aspects for a sustainability mindset. The connection is not in the planning as an activity per se, but in the way we think and process information when we plan. Planning is about organizing and structuring in order to control outcomes. Planning is linear by definition -one step after the other - and it assumes cause-effect relationships. But what about multi-effects, multi-causes, and feedback loops?

Contrast this with the sustainability problems we are facing. To begin with, they are complex and multidimensional by their very nature. Many are the result of our linear thinking, for example we believe that we can pursue unlimited growth, yet depletion of natural resources shows us this is not possible.

Our reliance on the human mind can create a collective assumption that we are in control, but a “small” manifestation like Covid-19 arrives as a surprise to debunk the myth of our own superiority.

Planning in itself is not the problem but rather, excessive reliance on carefully crafted steps, and forgetting the natural cycles of growth and decline.

## **/HOW ABOUT YOU TRY:**

Do you see yourself balanced in terms of making and letting go of plans? How do you balance structure and flow, organization and flexibility? What do you see as your personal development challenges in this aspect?

You may want to pay attention to when you get too attached to your plans, and experiment with letting go. Explore what you gain and what you lose by doing so. How aligned are your actions with

the understanding of natural cycles of growth and decline? What implications does this understanding have for you?

*There are no linear processes in Nature: Everything flows in cycles of birth, growth, death, and rebirth.*

*Many aspects of man-made unsustainability of the planet are a result of the misconception that we are not governed by this law of Nature.*

**/WHAT IS ASSESSED HERE:  
HOW YOU UNDERSTAND AND  
EXPERIENCE INTERCONNECTEDNESS,  
VERSUS VALUES LIKE AUTONOMY  
AND INDEPENDENCE.**

**YOUR SMI RESPONSES INDICATE THAT** you thrive in contexts where you can compete and work towards being your personal best.

You believe independence and autonomy are very important aspects of human life, perhaps as a combination of a given right, a personal goal and a precious virtue to cultivate. They signify ownership and accountability to you.

**You are comfortable when** you are faced with challenges. In fact, you enjoy the adrenaline that motivates you. The excitement of seeking to be successful, to win or to outperform others is a great feeling for you.

Recognition may be a reward, but it is not always external: it can also be for your personal satisfaction and sense of accomplishment. You feel proud of your achievements and perceive them as a validation of your autonomy and personal capabilities in action. It is important for you to be self-sufficient as much as possible. (This may come at a price).

**/THINK ABOUT HOW YOU CAN  
FURTHER LEVERAGE YOUR  
STRENGTHS AND MANAGE SOME  
OF THE LIMITATIONS WHICH MAY  
BE HOLDING YOU BACK:**

It is not always possible to live up to other people's expectations, not to mention our own, which often are even higher. Furthermore, in many settings

where teamwork or collaboration is expected, it may be challenging to balance your individual performance with the collective contributions, and your personal efforts, gifts or skills may go unrecognized, or possibly even unappreciated.

Let's pause for a moment: Can you name one achievement that was purely and authentically your own without another person playing any role in it?

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

You may not have given it much thought, but the polarities of independence vs. interconnectedness and competition vs. collaboration are of particular relevance when focusing on sustainability. To begin with, the environmental and social challenges are complex and multidimensional, making it impossible for any one person to solve on their own. It is only through collective thinking, action and the collaboration of multiple stakeholders that we will be able to develop alternatives. (This, by the way, makes sustainability a great opportunity for contributing personal skills to a larger cause).

While certain cultures have a collectivistic framework, most of the western-northern culture - widely exported and globalized - is individualistic and celebrates personal achievement. However, is this realistic and even feasible?

**/HOW ABOUT YOU TRY:**

We invite you to explore what autonomy means for you. What are the roots of this value for you, perhaps in your upbringing or in your current context? Is this authentically a priority for you, or is it something automatically inherited, or adopted without giving it much thought?

If you have identified an accomplishment that you consider authentically your merit, make a list of who may have played a role in it. Rank them, in order of relevance or impact on your success.

What does this exercise tell you about the polarity of autonomy versus interconnectedness?

*When we see interconnectedness, we understand the importance of diversity, and our decisions and actions become more inclusive, which contributes to the sustainability of the whole.*

# /EMOTIONAL INTELLIGENCE

Understanding ourselves through the anchors of our identity, the pace of our life, and how we consider our intuitive wisdom are key for a sustainability mindset.

**/WHAT IS ASSESSED HERE:  
HOW YOU INCORPORATE NON-  
RATIONAL INFORMATION, INTUITIVE  
KNOWING, CREATIVITY AND  
IMAGINATION IN ORDER TO  
BALANCE RATIONAL THINKING, AND  
HOW YOU FEEL ABOUT IT.**

**What this tells you:**

**This graph shows only one dimension – cognitive - meaning that you have an intellectual understanding about this aspect. We don't have enough data to report on your behaviors or feelings about this topic.**

**YOUR SMI RESPONSES INDICATE THAT** you have a clear understanding of the value of combining your logical and analytical thinking abilities with creative imagination.

You know that the human mind is capable of great accomplishments, as history has shown, when intuition and creative ideas are coupled with rational thinking and good strategies. You may even trust that our sustainability problems could be addressed with a good balance of these abilities.

We cannot comment on how this understanding is reflected in your behaviors or feelings, since you indicated (by choosing "neither") that you did not find yourself represented by any of the available options.

**/THINK ABOUT HOW YOU CAN  
LEVERAGE YOUR STRENGTHS AND  
MANAGE SOME OF THE LIMITATIONS  
WHICH MAY BE HOLDING YOU  
BACK:**

Your intuition and actions are not mainstream, and thus very important to drive much needed change. How happy are you with how you are sharing your valuable perspectives with others? Do you feel you are doing it as much as you could?

Let's pause for a moment.

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

How well do you balance your strategic thinking with some creative imagination? The reason for this question is that the sustainability challenges we are facing are largely new, and as COVID-19 taught us, increasingly situations arise for which we don't have previous experience or science on which to rely. We have become more aware of the complexity of our challenges, and we are skeptical of simplistic solutions.

This requires entry into uncharted territories. Resilience calls for flexibility in adapting to new situations, and this entails innovating and experimenting. Having no plans or blueprints to follow may be unsettling, and the only choice is to take some risks.

How do you feel when experimenting without knowing?

## /HOW ABOUT YOU TRY:

Here is a thought to consider: What are some situations in which you are creative, relaxed and playful? Perhaps cooking or gardening? Playing some team sports? Or around small children? Maybe planning a party?

If you can identify some of these creative and playful moments, in them you have a reservoir of imagination available to tap into. This can help you complement your strategic thinking and maximize your achievements for the benefit of all.

*Resilience is based on constant creativity, innovation, and experimentation. When we neglect the non-rational wisdom we have in us, our solutions are missing critical information, and may create negative impacts on the ecosystem and society.*

**/WHAT IS ASSESSED HERE:  
HOW YOU NOTICE YOUR OWN PACE,  
AND HOW YOU BALANCE RAPID  
RESPONSE WITH MAKING TIME TO  
PONDER AND REFLECT BEFORE  
ACTING. AND HOW THIS MAKES  
YOU FEEL.**

**What this tells you:**

**This graph shows only one dimension – cognitive - indicating that you have knowledge about this aspect, without necessarily engaging your feelings. You might use this information to explore your emotions.**

**We don't have enough data to report on your behaviors related to this topic.**

**YOUR SMI RESPONSES INDICATE THAT** you have a sense that we are collectively trapped in an accelerated pace.

Perhaps you notice your own speed, or see it in others. The fact is that you observe and seem to think about this phenomenon, and may be asking yourself about the cost of this upon you or others. How is it possible to contemplate the future

implications of decisions taken under the pressure of speed?

We cannot comment on how this understanding connects with your behaviors, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

**However, you are comfortable** multitasking, you thrive on the adrenaline of urgency and it brings out your best performance.

How do you bring together the downsides you see of our fast pace, with your own reality?

**/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

Since we are looking at these aspects from the perspective of a sustainability mindset, let's pause and think about what behaviors might be most effective as well as much needed.

While there is a call for urgent action about climate change and the related social and environmental problems, many modern sustainability challenges are actually the result of overlooked prior potential impacts. For decades, well-intended decisions were largely made by quickly identifying the best option.

But today we are understanding better that problems are complex, that solutions impact a multiplicity of future stakeholders, and that there are always consequences.

Of course, it is not possible to anticipate all scenarios, but pausing and checking assumptions can be very useful to avoid future problems. For example, what can be learned to avoid or repeat from past experiences? Can you identify, in hindsight, something that was at stake and overlooked because you were trying to act fast?

When you have more information you can better weigh alternatives.

Although this requires to slow down!

## **/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

You seem to have good endurance of tension to sustain multitasking and even enjoy it. And yet, according to your answers, you realize that something is not quite right.

Does it ever happen to you that you wish you could relax, slow down and do nothing? Does your body, your mind or perhaps your soul call for a break, less stress? What message may be there for you, waiting to be heard?

We cannot both act fast and ponder carefully. The question becomes: Is decisiveness and fast action coming at an expensive price for you and others, us, the next generations, and the ecosystem?

## **/HOW ABOUT YOU TRY:**

Here is a simple (and challenging) exercise for multitaskers like you.

Set your alarm to ring once every two hours. When the alarm goes off, pause whatever you are doing, and set the timer for 60 seconds. Close your eyes during that minute, or look out the window, just sitting in silence for a full minute. It is not a time to think of what you still need to do, or what you should be doing: it's just a gift of 60 seconds for you, to do nothing.

If this is too difficult, start setting the alarm once a day, then slowly increase the times for a pause.

Noticing your pace and finding ways to slow down may not only be good for you, but also for the decisions you make, and for the planet.

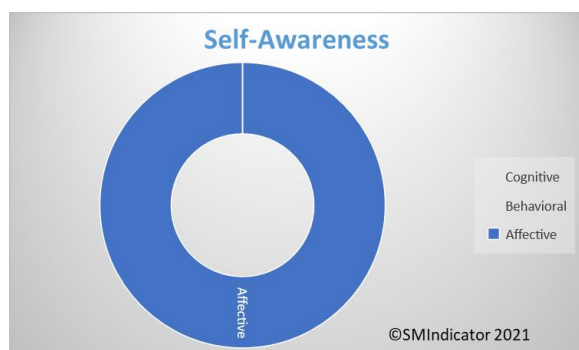

Food for thought!

*Reflective practices help to pause, and to ponder the situation and its implications before jumping into action.*

## **/WHAT IS ASSESSED HERE: HOW AWARE YOU ARE ABOUT THE ANCHORS OF YOUR IDENTITY AND YOUR VALUES; HOW YOU FEEL AND ACT IN CONSEQUENCE.**

### **What this tells you:**

**This graph shows the affective dimension, meaning that you connect emotionally with this aspect. We don't have data to report if or how these feelings relate to your understanding and behaviors.**

**YOUR SMI RESPONSES** suggest some tension, an uncomfortable feeling of misalignment between some of the things you do and how you would prefer to see yourself.

You may have been taught certain values, like being a winner, not being a loser, remaining rational at all times, having more to be more. And you became these values. Then something has begun to shift and these values don't feel entirely OK any longer. This may make you feel confused, perhaps a bit guilty at times. You may even feel more grateful or indebted to others for their help in your achievements than stubbornly proud of being a self-made person.

We cannot comment on your thinking or behaviors related to this topic, since you indicated (by choosing "neither") that you did not find yourself represented by any of the available options.

## **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

Let's pause for a moment. This survey was designed around the Sustainability Mindset, which is a way of thinking and being to optimally adapt to the moment in which we are living. This Mindset focuses on using our natural gifts to shape a better future, for ourselves and for all, the ecosystem included.

Research has proven that what may sound overwhelming, actually can be broken down into small, realistic ways to contribute to the greater good, and feel great at the same time. The first step is taking a fresh look at what surrounds us.

Undoubtedly, there are social and environment related challenges everywhere. Some happen locally, others across borders. As you know, science has been linking many of these issues to human behaviors, such as consumption of unhealthy foods, depletion of natural resources, pollution or contamination of air, soil and water. And we are left to deal with the consequences today, trapped in a paradigm that prioritizes values that have a negative impact, such as thoughtless consumption.

## **/HOW ABOUT YOU TRY:**

But what if we would realize that some our habits today are (unintentionally) contributing to more of these problems in the future? And vice versa: What if a change in a small habit today could do its part to shape a better future?

Can you think of a habit of yours that might qualify? We don't know what we can until we try. And when we put aside cynicism for a moment, we actually may feel a deep sense of joy. Sometimes we shift our values as a result of a new experience. Worth trying?

*When we explore our personal values, beliefs, assumptions and motivations, we gain greater control over our actions and we can see new alternative behaviors.*

# /SPIRITUAL INTELLIGENCE

The spiritual orientation to Nature, to ourselves and to others are key factors for a Sustainability Mindset, as they impact the quality of our actions.

**/WHAT IS ASSESSED HERE:  
HOW YOU EXPERIENCE NATURE,  
HOW YOU UNDERSTAND THE  
HUMAN RELATIONSHIP WITH  
NATURE, AND YOUR RELATED  
FEELINGS AND BEHAVIORS.**

**What this tells you:**

**This graph shows only one dimension – cognitive - meaning that you have an intellectual understanding about this aspect. You are not necessarily engaging your feelings nor converting them into actions. You might use this information to explore your emotions related to this aspect of the sustainability mindset, and perhaps find ways to convert your understanding into actions.**

**YOUR SMI RESPONSES INDICATE THAT** you think of Nature as an experience that offers more wisdom than we can intellectually grasp.

Interestingly, at the same time your behaviors seem to be based on a worldview in which humans are the most evolved and intelligent species, a superiority that seems to grant humanity a utilitarian approach to natural resources.

**/THINK ABOUT HOW YOU CAN  
LEVERAGE YOUR STRENGTHS AND  
MANAGE SOME OF THE  
LIMITATIONS WHICH MAY BE  
HOLDING YOU BACK:**

The evolution of science has shown that findings are made within the constraints of available instruments, paradigms or assumptions. Many myopic or biased conclusions have been revealed with the passage of time, the development of more precise measurement techniques and revolutionary thinking. Biomimicry, a discipline studying how Nature solves problems, has been highlighting the wisdom of billions of years of evolution, and suggesting that we may find more answers in Nature than through our human intellect.

In fact, indigenous people have demonstrated a more resilient lifestyle, based on an intuitive connection to Nature.

To complete the picture of how you experience the human relationship with Nature, you indicate some emotional distance, as if you might not have any specific feelings towards the natural world.

Do you really experience it in this way? Or is it, perhaps, that you find yourself so consumed by life's demands that there are little/no opportunities to pause, relax, and simply be with yourself in a natural environment?

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

Certainly many achievements and improvements of our quality of life have shown the power of the human mind. Yet we are increasingly aware that some betterments have come at a cost for the environment or society, and we are collectively paying the price, for example, soil erosion or waterway contamination from chemical crop

fertilizers meant to enhance soil productivity. The human-centric paradigm that we collectively adopted and believe has begun to show some shortcomings, inviting us to revisit our place and role in the larger ecosystem.

What are some undesirable consequences of human progress that you have personally experienced? What message may be in this for you?

According to a 2018 United Nations study, over 55% of the world's population lives in urban areas, a proportion that is expected to increase to 68% by 2050. As a result, for many of us, the disconnection from Nature is rather "natural." Hectic life in large cities makes it difficult for us to remember that we are more than individuals moving through traffic and buildings. The common associations with the word "Nature" may be vacation time, a park or a documentary. What about our food? Our body? The materials of every object we use? This disconnection from Nature leads to a utilitarian relationship: Nature is reduced to instrumental resources for human needs and wants.

What consequences do you see from having a utilitarian relationship with Nature?

We need to re-connect with Nature and re-establish the experience of oneness that has been lost, causing not only spiritual alienation but also the artificial separation from the ecosystem. It has been found related not only to spiritual alienation, but is the root cause for many unsustainability behaviors.

When we understand something we start caring for it. Understanding that we are one with Nature is a sensorial, intuitive experience. It is not something to be learned, but rather something that we allow to occur, and which makes us remember the sense of oneness we have always known, but had forgotten.

## /HOW ABOUT YOU TRY:

Sometimes we realize that our thinking, feeling and acting are not aligned. When we notice it, we may feel discomfort and tension- something out of sync. A sustainability mindset is not just harmony with the ecosystem, but it starts within ourselves.

It is impossible to guess your particular context, and your current priorities. But we invite you to give yourself an unusual gift: Spend an hour in Nature, on your own, without looking at your phone, and with no books, pets or other people. If you have never experienced this, you are up for a very special treat!

*Understanding that we are one with Nature, a species within species, is a powerful spiritual experience that can shape behaviors leading to a more harmonious relationship with each other and all beings.*

**/WHAT IS ASSESSED HERE:  
HOW YOU THINK ABOUT THE  
MEANING, ROLE AND VALUE OF  
MINDFULNESS AND ITS PRACTICE,  
AND HOW YOU FEEL ABOUT IT.**

**What this tells you:**

**This graph shows only one dimension – behavioral - indicating that you are action- oriented without much engagement of your feelings. You might use this information to explore your emotions.**

**We don't have enough data to report on your understanding about this aspect.**

**YOUR SMI RESPONSES ARE** quite intriguing!

You indicate that you have discovered activities that quiet your mind, and help you gain some inner peace. You may not make these a regular practice, but when you engage in them, you can recognize the positive effect they have on your wellbeing. Yet, it seems quite challenging for you to make the time and space for these moments.

On the other hand, you seem to experience the tension and stress that comes with a demanding

reality. You may notice it in your health, sleeping patterns, moods, or in how you relate to others as a result, and you try to manage in the best way you can. We cannot comment how you think about this, since you indicated (by choosing "neither") that you did not feel represented by either of the available options.

**/THINK ABOUT HOW YOU CAN LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

Sometimes we hear people say “you should do less, you should relax, you should take time for yourself, etc.,” and from your perspective, their suggestions may sound somewhere between unreal and ridiculous, since you are the one living with the challenges. Of course you know what you ‘should’ do, but we are all doing our best all the time.

It is however possible that being concentrated on our obligations we miss information available “out there” that could facilitate our task, but we just don’t see it.

For example, perseverance is an important virtue, except when it makes us miss easier or better ways to achieve our goal. Pausing and stepping away from our task clears our mind, and we can return to it with renewed energy and sharper vision.

**It's time to pause and ponder.**

How can you better listen to what your body tells you, both through the tension and through the release when you allow yourself some of those activities that give you a moment of peace? Would you like to find a way to make your life easier, more satisfying or less stressful, perhaps?

Has it ever occurred to you that the fact that “everyone lives like this” may not necessarily make it ideal? Studies show the physical and emotional consequences of a constant focus on doing while overlooking the more profound dimensions of

‘being,’ such as reflection, spiritual or religious practices, time to recharge and find ourselves, and time to connect with our deeper self.

## **/HOW ABOUT YOU TRY:**

You have experienced it firsthand: when you allow some time to nurture this neglected part of yourself you realize the positive impact that small practices of slowing down have on your peace of mind, how you relate to others and even on your health. It may be as simple as going for a walk, listening to your preferred music, dancing, practicing a sport, playing with children or your pet, gardening or creating art.

There are even certain words that, just by thinking of them, create an expansion in our heart, bringing positive feelings. From a biological perspective, they cause our system to release dopamine, the so-called happiness hormone. Can you think of some of these words? How do they make you feel? For starters, a small but powerful gift that you well deserve!

## **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

From the perspective of a sustainability mindset, mindfulness is both a key practice and an amazing result. Research has shown a direct link between individuals that have some contemplative practices not just with their physical and psychological health, but also with the emergence of feelings of empathy and compassion.

This creates a disposition towards positive social and environmental actions, and the resulting satisfaction feeds a positive reinforcing loop. In other words, the better we feel about something we’ve done, the more we seek to repeat the experience.

When we access and display a more balanced version of ourselves, we convey an unspoken message to the people with whom we interact, not just by what we say or how we behave, but through our attitude and energy. This has a proven positive influence on others, as science has identified with the phenomenon of “emotional contagion.”

In other words, when we develop a sense of peace for ourselves, we are also radiating a gift of peace to the world.

Do you want to give it a try?

*Mindfulness is being fully present, experiencing connectedness with all that is. Mindfulness enhances awareness and compassion, and predisposes to social and environmental actions.*

**/WHAT IS ASSESSED HERE:  
WHAT YOU THINK ABOUT HAVING A  
PURPOSE IN LIFE, PARTICULARLY  
SOMETHING THAT IS IN SERVICE TO  
OTHERS; HOW THIS FITS YOUR  
REALITY AND HOW YOU FEEL ABOUT  
IT.**

**What this tells you:**

**This graph shows the two dimensions of cognitive and behavioral, meaning that you have an intellectual understanding of this aspect, and you also act upon it. We don't have enough data to report if or how you connect with your feelings related to this item.**

**YOUR SMI RESPONSES INDICATE THAT** you think it is important to find a purpose in life, to identify something that, by making a difference, makes our life meaningful.

In fact, you have already found it, through actions that serve others. You may have found a cause, or it is possible that part of your obligations and responsibilities are to serve others, to attend to their needs or expectations.

Perhaps your work, family, perhaps relationships, form part of your reality and may use up your available energy – and you perceive this as your service. How does this make you feel? Do these activities feel like your “calling”, or like an obligation that lands upon you?

Sometimes we don't see that we had a choice, and that may place an extra burden on us, which is perceived very differently than when we intentionally decide and choose where and how to “serve”.

We cannot comment on how you feel about this topic, since you indicated (by choosing "neither") that you did not feel represented by either of the available options.

**/THINK ABOUT HOW YOU CAN  
FURTHER LEVERAGE YOUR  
STRENGTHS AND MANAGE SOME  
OF THE LIMITATIONS WHICH MAY  
BE HOLDING YOU BACK:**

Research has shown that individuals who engage in activities of service to the community, volunteering or some kind of initiative for the greater good have a higher sense of wellbeing than those who do not. This includes benefits to health, feelings of joy, increased self-esteem, and personal satisfaction. Is this your case?

Perhaps you have experienced that focusing on the extreme demands of your life sometimes takes a toll on your health, your mood, creating tension or anxiety, disrupts your sleep or impacts how you interact with others.

Does it happen to you, that you don't feel happy with yourself or with others? If so, have you asked yourself what you could do to feel better, to lower your stress? Perhaps you have, but the answer you found may have been that as long as your demands remain high, there is not much you can do.

## So here, again, are some questions to evaluate:

Which of the activities that you engage in are a necessity, a “must-do,” and which ones represent a choice? Who would do these activities if it were not you? What would it take to let go of some activities, or perhaps of “how” you do them?

These questions have an agenda: to help you free up some time and space to try out a different experience, one that consists of something you do for others outside your inner circle.

## /THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

The research regarding core aspects for a sustainability mindset identified the role of activities intentionally done for the “greater good.” The state of our planet is such that it requires each of us to step up and play an active role in shaping a better world.

The actions needed, whether large or small, share a similar result: they provide us with a feeling of joy, which then we want to replicate in order to feel good again, thus creating a reinforcing loop. Interestingly, we tend to think that we need to take care of ourselves first, before helping others, but the facts show that when we do small acts of kindness for others, we feel much better ourselves.

## /HOW ABOUT YOU TRY:

With this in mind, what are some new experiments you can try? What are some different things for the greater good that you already did, and perhaps could repeat, do regularly, or improve? Which of your natural gifts and skills could you put into

service for the greater good, in a cause for which you have a passion?

Don’t get intimidated by grandiose words like ‘changing the world’ or having a life mission or purpose. In fact, each small action of kindness has already an impact that we may never be able to imagine. That is also changing the world, one interaction at a time.

*Defining our purpose provides an unconscious compass, and when it is grounded in values of our higher self, we actively shape a better world.*
