

Sustainability
Mindset
Indicator®

**/REPORT
PREPARED FOR:
Danny
11/Jan/2024**

Welcome to your Personalized Report. This Report is based on your selections on the SMI. It is meant to be a personal development tool, to highlight aspects of your understanding, behaviors and feelings related to your Sustainability Mindset (SM).

You will find observations that you may identify with, others that you vaguely recognize, and others that perhaps don't resonate with you. Keep what you need and what makes sense to you.

You will also find questions to consider, suggestions for things you can try, and information related to the aspects covered in this report, and how these are related to the Sustainability Mindset.

Take your time reading your Report. Pause, take notes, and reflect. It is all about you, and for you. There were no wrong answers in the survey. Only good options and perhaps some that you hadn't thought of.

/WHAT YOU WILL FIND IN THE FOLLOWING PAGES

This Personalized Report is organized into several sections. The first section contains a graph, displaying how the different aspects assessed compare to each other, according to your choices in the survey. Those that occupy a larger area are your stronger ones and the narrower or missing ones are aspects of the Sustainability Mindset that are less developed or absent for you, as inferred from the combination of your answers.

The next section presents personalized descriptions of where you find yourself on your journey towards a Sustainability Mindset, in four clusters: Ecological Worldview, Systems Perspective, Emotional Intelligence, and Spiritual Intelligence.

Within each of these clusters you will find what aspects were assessed, and a graph for each aspect displaying how you connect to this topic, whether intellectually, through your actions and behaviors and/or by engaging your emotions.

If you see some areas missing within the graph, it means that either you selected "neither" for that question and therefore we don't have information to report on, or your answers suggest you don't engage in one or more particular areas (cognitive, behavioral or affective). Similarly, if you selected "neither" for all the questions within one aspect, we don't include a graph, since we don't have information to report on.

Each graph is accompanied by a box with a brief explanation, and you will find much more information in the text to include what your choices suggest, why this particular aspect is key for a sustainability mindset, and questions to ponder and suggestions to try.

***Enjoy your journey into the realm of the Sustainability Mindset
- a place where you can be your best, for yourself and for the
World.***

The SMI Team

/ Your overall
**SUSTAINABILITY
MINDSET PROFILE**

The graph below shows your personal profile, indicating how – relatively to each other – you have developed your Sustainability Mindset. The wider sections indicate your stronger areas, and vice versa.

If you see some aspects listed in the side box that are not included in the graph, it means that these are areas to be considered more closely. It may be that you didn't feel represented by any of the statements to choose from, or it might be that your reality, context, and/or habits prompt you to think, act or feel differently. You will find further comments in this report about these aspects, exploring their up- and downsides.

/ECOLOGICAL WORLDVIEW

An ECOLOGICAL WORLDVIEW is the result of having an intellectual and affective broad understanding of the planetary challenges, how they are interrelated, and how we are contributing to them.

**/WHAT IS ASSESSED HERE:
HOW YOU UNDERSTAND THE
ENVIRONMENTAL AND SOCIAL
CHALLENGES, AND HOW YOU FEEL
ABOUT IT, AND THE IMPACT ON
YOUR BEHAVIORS.**

YOUR SMI RESPONSES INDICATE THAT your need to personally change behaviors towards achieving greater sustainability is moderate, as you have a limited sense of urgency.

/YOU ARE COMFORTABLE distancing yourself from a challenging reality, which allows you to avoid disturbing feelings about the state of our planet, the ecosystem, or social injustice. The emotional distance helps you stay focused on your daily reality.

**/THINK ABOUT HOW YOU CAN FURTHER
LEVERAGE THOSE STRENGTHS AND
MANAGE SOME OF THE LIMITATIONS
WHICH MAY BE HOLDING YOU BACK:**

The downside is that you may miss engaging from the heart, and connecting with your deeper values and with others suffering or in need, which can be a very powerful experience. If you connected a bit more with your feelings, there might be an opportunity to make a difference with modest decisions and actions that could impact your future, your loved ones or the next generation.

We cannot comment further on how you think about this aspect, since you indicated (by choosing "neither") that you did not feel represented by either of the available options.

**/THOUGHTS TO PONDER WHEN YOU
CONSIDER THE SM:**

We are definitely living in a time of information overload. It is challenging to stay on top of all that is happening, while keeping up with our own

obligations and activities. Furthermore, news about sustainability tends to be on the negative side, creating doomsday scenarios and scary prophecies that can trigger anxiety, and are not precisely inspiring us to act. We may tend to avoid the news because it makes us feel bad, sad, or concerned.

Yet we tend to underestimate our own power and influence in shaping a better world. As a matter of fact, if the challenges we are currently experiencing are a product of past problematic behaviors, then we are also positively shaping the future of the planet with our current mindful decisions and restorative actions. That opens up one interesting path.

/HOW ABOUT YOU TRY:

The other powerful path is in our emotions. When you allow yourself to connect from the heart with the reality of the news and find small ways to change your behavior, you might feel more present, and have a very fulfilling experience.

Understanding the state of the planet allows us to be more fully aware of the challenges, the complexity of how they are linked to each other, and to explore what it means to us.

**/WHAT IS ASSESSED HERE:
HOW YOU SEE THE RELATION
BETWEEN INDIVIDUAL DECISIONS
AND PLANETARY CHALLENGES, HOW
YOU FEEL ABOUT IT AND THE
IMPACT ON YOUR PERSONAL
BEHAVIORS.**

YOUR SMI RESPONSES INDICATE THAT you maintain an emotional distance with the planet's social or environmental problems, by expecting others to fix. After all, you didn't cause them.

This can be a useful coping strategy. Perhaps you sense that you would be overwhelmed by emotions while feeling powerless to solve those problems.

/YOU ARE MOST COMFORTABLE WHEN you can keep a pragmatic approach to the world.

We cannot comment on your thinking about this topic, since you indicated (by choosing "neither") that you did not feel represented by either of the available options.

/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE THOSE STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

When problems seem exceedingly large, you hope that someone will eventually intervene. Yet, this perspective also can cause stress, as it assumes we are victims at the mercy of powerful external forces or individuals.

There may be another way to look at this: What if you could identify small ways in which you realize that you are contributing to the problem, and then, begin to explore changes that are within your control? Certainly you will not solve the bigger problems, but to begin with you may feel

more empowered, less at the mercy of others, and playing a role that you may actually enjoy. Food for thought.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

Thinking of how we are personally contributing to the planetary challenges may not be something we do daily. Our demanding lives have many obligations and don't leave much time for reflecting on this. We are busy getting things done!

Yet when analyzing the current un-sustainability of our planet, science has clearly established a link between human behaviors in past decisions and the current problems we face. Much attention is now focused on how to repair the damage done, and how to restore damaged, depleted or endangered resources. Scientists and entrepreneurs study how to minimize current or future problems at the environmental or social level, and how to innovate to avoid negative impacts into the future.

If we collectively influenced the place we find ourselves in now (with all of its problems), that means we also hold the key to influence where we will collectively be in the future – we meaning humankind at large, or, from a closer perspective, our families, children and grandchildren.

/HOW ABOUT YOU TRY:

What if you could develop the habit of asking yourself periodically: *how am I contributing to this problem?* This question opens a path of inquiry, which automatically leads to expansion of your consciousness. You become more alert to take notice, and thus more open to try out new behaviors.

This same question, by the way, is also a powerful tool that can improve your relationships and interactions with others! So often we focus on what others are doing unto us, which leaves us powerless. When we learn to pay attention to

what is our role in the problems we endure, we regain control and can actually do something.

Actively thinking about how we might be contributing to environmental or social problems makes us better planetary citizens. At the same time, this enhanced awareness is an important milestone in our broader personal development.

When we identify the ways in which we are unintentionally contributing to the problems, we have a chance to do something about them. It also expands our consciousness, and develops social sensitivity.

/SYSTEMS PERSPECTIVE

When analyzing information and making decisions a SYSTEMS PERSPECTIVE has a major impact on the sustainability of our actions.

**/WHAT IS ASSESSED HERE:
HOW YOU THINK ABOUT THE LONG-
TERM IMPACT WHEN ANALYZING
AND MAKING DECISIONS,
COMPLEMENTING SHORT-TERM
THINKING; HOW YOU FEEL ABOUT
IT, AND THE IMPACT ON YOUR
BEHAVIORS.**

YOUR SMI RESPONSES INDICATE THAT you are a good problem solver.

/YOU ARE COMFORTABLE looking for quick and efficient ways to address a situation, seeking to simplify matters. Acting promptly is important for you, and it provides you and others with a sense of control and direction.

We cannot comment on your thinking or feelings related to this topic, since you indicated (by choosing "neither") that you did not feel represented by any of the available options.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

There is a tacit pressure to act promptly and focus on that which needs immediate attention. This is very important, and there are many circumstances where this way of responding is the optimal, or even the only one that matters. A fire in the house, for example. We can sense the urgency and it is not a good idea to pause and reflect on the long-term implications of the fire. But for many daily decisions, the context is different, and yet we still prioritize short term thinking, often without even pondering any medium- or long-term impacts of what we are doing. The stream of life, our colleagues, perhaps everyone with whom we interact takes for granted that we "all" act this way.

On the other hand, with greater understanding of the social and environmental problems we are facing, it has become clear that the law of cause-and-effect is always at play, even if not immediately obvious. In other words, the consequences of our daily actions do have impacts - some over time, some just in a different geography, and many on both.

As with other aspects which are key for a sustainability mindset, it is not a question of choosing one over the other, but a matter of balancing both views and taking both time horizons into account.

/HOW ABOUT YOU TRY:

This mental habit expands our consciousness, as we become more aware of the way we are impacting others and the world. Not thinking about this doesn't stop it from happening. Stretching our imagination to consider potential impacts across time helps us make better decisions, and play a more active role in shaping a better world.

For example, what might be some long-term consequences for sustainability of a purchasing decision you recently made? What would your latest decision look like if you had considered these potential long-term impacts? It takes practice to develop new mental habits, but they too, can have long term impacts - for the better.

Every action has consequences that are not immediately visible. Considering the long-term when analyzing situations and making decisions has a positive impact on global sustainability.

**/WHAT IS ASSESSED HERE:
HOW YOU THINK ABOUT AND DEAL
WITH AMBIGUITY AND PARADOXES,
HOW YOU RECOGNIZE DIVERSITY,
FEEL ABOUT IT AND ACT TOWARDS
IT.**

What this tells you:

This graph shows that your approach to the assessed topic is both cognitive and affective, but you are not necessarily translating what you know and feel into actions. You might use this information to explore new habits and daily changes for a sustainability purpose.

YOUR SMI RESPONSES INDICATE THAT you are an empathic person who knows how important it is to listen to other perspectives, and to find solutions that can accommodate diverse needs.

Not being inclusive may also make you feel guilty, selfish, righteous, or irresponsible. This is your internal compass!

At the same time, you are a pragmatic person that likes clarity in life. **You are most comfortable** with clear choices - black and white options - and find a sense of stability and reassurance in holding onto your values and your worldview. When faced

with a new situation, you seek to rapidly frame it within what you have learned is "right" or "wrong."

This may be useful for avoiding gray areas, although it may also create a tension: is it possible to balance honoring your values, what "feels right", with accepting very opposite positions?

/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

Welcome to life! You are not alone in the struggle. You already have come far in your personal journey, as you can empathize with others and take a glance into their world.

What are the boundaries? In what areas is inclusive thinking and acting easy for you, and which situations are more challenging? This is your work.

You have a very valuable characteristic, particularly in our sustainability-challenged times, where the solutions to our environmental or social problems have to be found considering a wide array of interests and needs.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

Many of our world's sustainability challenges originate in choices such as: "either the planet or the economy" and "either protect the wolves or the farmer." Yet, *either-or* choices can be misleading, and have us believe there are win-lose solutions that work.

But do they really? If the cost is high, do they still work? When we find ourselves in a situation where

we see it the right way, and others are wrong, what may we be missing that these others are seeing? How could we all benefit from having a fuller picture?

It seems that today, more than ever, we are collectively being confronted with paradoxes and ambiguity. Increased transparency and access to information from around the world makes us aware of very different ways of thinking, being and acting with which we may not agree or be comfortable.

Challenging as this may be, there is a benefit to it: We are becoming aware of our own worldviews just by realizing that there are other ways of seeing and feeling. This is an evolutionary insight of great value, the foundation for more peaceful societies.

In a way, life is prompting us to expand our understanding and our scope of caring, which go hand in hand. When we understand something, we can begin caring. This is the start of a better world for all.

It is wonderful to experience our perspective included by others. Since we cannot control what others think or do, but have control over our own way of thinking, there may be an interesting path worth exploring here.

/HOW ABOUT YOU TRY:

Which are situations where either-or thinking is appropriate, and when do we need a creative both-and solution?

There are multiple daily opportunities to convert your natural empathy into inclusive behaviors. Any thoughts?

Both+and thinking allows us to understand paradoxes, and calls for creative solutions that are inclusive of all stakeholders.

**/WHAT IS ASSESSED HERE:
HOW YOU BALANCE YOUR CAPACITY
TO ANALYZE AND PLAN WITH THE
UNDERSTANDING OF NATURAL
CYCLES, AND MAKE THEM PART OF
YOUR MINDSET.**

What this tells you:

This graph shows two dimensions, the behavioral and affective. This means that you connect emotionally with this aspect, and act upon it, perhaps without a full understanding of why it is important. You may find it interesting to deepen your understanding of this principle.

YOUR SMI RESPONSES INDICATE THAT you have an interesting combination of perspectives that impact your way of thinking and acting.

On the one hand, you recognize a world in which challenges are presented as opportunities to find intelligent solutions. Indeed, intellectual abilities are very important, as they allow people to control difficult situations by crafting plans and setting goals to measure their progress. And when a problem is beyond individuals' control or capacity, as many sustainability-related problems are, they rely on others to solve them.

You are aware that the most common belief is trust in human ingenuity to figure out solutions for our environmental or social problems.

On the other hand, you sense that planning may just be a way to feel in control of situations, constantly challenged, since life - with its countless variables - is too complex to be managed.

It may be this same frustration, when things don't work out as you or others plan or expect, that makes you wonder: Shouldn't we let go of plans and observe what the events are telling us? That thought alone seems to bring you a welcome sense of peace.

/YOU ARE COMFORTABLE reminding yourself to take plans lightly, and listening to the feedback life gives you. You try to act in alignment with the cyclical flow of nature, which means that you accept that things grow, but not forever because there is also decline and death.

In our day-to-day this means accepting ageing and mortality, endings of relationships or certain phases in our life, and new beginnings as well. In another context, it means that you see humanity as part of Nature, not as its controller-in-charge.

This is a valuable attitude, because it may make your life easier. Like swimming along with the river's current, it increases your speed, and reduces the stress of resisting obstacles.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

You may be wondering why planning is related to several key aspects for a sustainability mindset. The connection is not in the planning as an activity per se, but in the way we think and process

information when we plan. Planning is about organizing and structuring in order to control outcomes. Planning is linear by definition -one step after the other - and it assumes cause-effect relationships. But what about multi-effects, multi-causes, and feedback loops?

Contrast this with the sustainability problems we are facing. To begin with, they are complex and multidimensional by their very nature. Many are the result of our linear thinking, for example we believe that we can pursue unlimited growth, yet depletion of natural resources shows us this is not possible.

Our reliance on the human mind can create a collective assumption that we are in control, but a “small” manifestation like Covid-19 arrives as a surprise to debunk the myth of our own superiority.

There are no linear processes in Nature: Everything flows in cycles of birth, growth, death, and rebirth.

Many aspects of man-made unsustainability of the planet are a result of the misconception that we are not governed by this law of Nature.

/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE THOSE STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

Planning in itself is not the problem, but rather the excessive reliance on carefully crafted steps is. You may be in a valuable transition, going back and forth between the desire to control and the impulse to let go of plans.

Here a few thoughts to ponder. Do you see yourself balanced in terms of making and letting go of plans? How do you balance structure and flow, organization and flexibility? What do you see as your next personal development challenges in this aspect?

**/WHAT IS ASSESSED HERE:
HOW YOU UNDERSTAND AND
EXPERIENCE INTERCONNECTEDNESS,
VERSUS VALUES LIKE AUTONOMY
AND INDEPENDENCE.**

YOUR SMI RESPONSES INDICATE THAT you thrive in contexts where you can compete and work towards being your personal best.

You believe independence and autonomy are very important aspects of human life, perhaps as a combination of a given right, a personal goal and a precious virtue to cultivate. They signify ownership and accountability to you.

You are comfortable when you are faced with challenges. In fact, you enjoy the adrenaline that motivates you. The excitement of seeking to be successful, to win or to outperform others is a great feeling for you.

Recognition may be a reward, but it is not always external: it can also be for your personal satisfaction and sense of accomplishment. You feel proud of your achievements and perceive them as a validation of your autonomy and personal capabilities in action. It is important for you to be self-sufficient as much as possible. (This may come at a price).

**/THINK ABOUT HOW YOU CAN
FURTHER LEVERAGE YOUR
STRENGTHS AND MANAGE SOME
OF THE LIMITATIONS WHICH MAY
BE HOLDING YOU BACK:**

It is not always possible to live up to other people's expectations, not to mention our own, which often are even higher. Furthermore, in many settings

where teamwork or collaboration is expected, it may be challenging to balance your individual performance with the collective contributions, and your personal efforts, gifts or skills may go unrecognized, or possibly even unappreciated.

Let's pause for a moment: Can you name one achievement that was purely and authentically your own without another person playing any role in it?

**/THOUGHTS TO PONDER WHEN YOU
CONSIDER THE SM:**

You may not have given it much thought, but the polarities of independence vs. interconnectedness and competition vs. collaboration are of particular relevance when focusing on sustainability. To begin with, the environmental and social challenges are complex and multidimensional, making it impossible for any one person to solve on their own. It is only through collective thinking, action and the collaboration of multiple stakeholders that we will be able to develop alternatives. (This, by the way, makes sustainability a great opportunity for contributing personal skills to a larger cause).

While certain cultures have a collectivistic framework, most of the western-northern culture - widely exported and globalized - is individualistic and celebrates personal achievement. However, is this realistic and even feasible?

/HOW ABOUT YOU TRY:

We invite you to explore what autonomy means for you. What are the roots of this value for you, perhaps in your upbringing or in your current context? Is this authentically a priority for you, or is it something automatically inherited, or adopted without giving it much thought?

If you have identified an accomplishment that you consider authentically your merit, make a list of who may have played a role in it. Rank them, in order of relevance or impact on your success.

What does this exercise tell you about the polarity of autonomy versus interconnectedness?

When we see interconnectedness, we understand the importance of diversity, and our decisions and actions become more inclusive, which contributes to the sustainability of the whole.

/EMOTIONAL INTELLIGENCE

Understanding ourselves through the anchors of our identity, the pace of our life, and how we consider our intuitive wisdom are key for a sustainability mindset.

/WHAT IS ASSESSED HERE: HOW YOU INCORPORATE NON- RATIONAL INFORMATION, INTUITIVE KNOWING, CREATIVITY AND IMAGINATION IN ORDER TO BALANCE RATIONAL THINKING, AND HOW YOU FEEL ABOUT IT.

What this tells you:

This graph shows the two dimensions of affective and behavioral, meaning that you have an emotional connection with this aspect, and you also act upon it. We don't have enough data to report whether or how your knowledge and understanding is related to or might support this aspect.

YOUR SMI RESPONSES INDICATE THAT you that find uncertainty exciting!

You enjoy the fact that reality presents you with plenty of unknowns. This personal preference is expressed in your actions.

You are comfortable when you can contribute by putting your "creative hat" on, and being playful by not preemptively censoring your ideas. You have a good tolerance of the uncertainty of not knowing how something can work out. You are

able to live with a certain degree of risk-taking. What a valuable asset for these times!

We cannot comment on your thoughts about this topic, as you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

You may notice that the sustainability challenges we are facing are largely new, and as COVID-19 taught us, increasingly situations arise for which we don't have previous experience or science on which to rely. We have become more aware of the complexity of our challenges, and we are skeptical of simplistic solutions.

However this also requires entry into uncharted territories. Resilience calls for flexibility in adapting to new situations, and this entails innovating and experimenting, as you indicate you sometimes do. Definitely having no clear blueprints to follow may be disturbing, yet there are no choices but to take some risks. And fortunately you can handle them.

/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

You have a very valuable asset – the tolerance of uncertainty, the ability to unleash your imagination, something that is not very common in our culture and yet much needed. So the question arises: how do you balance rational thinking and structure with the uncertainty of your innovative ideas? What aspects do you think you need to develop a bit further, to maximize your contributions for the benefit of all?

Resilience is based on constant creativity, innovation, and experimentation. When we neglect the non-rational wisdom we have in us, our solutions are missing critical information, and may create negative impacts on the ecosystem and society.

/WHAT IS ASSESSED HERE: HOW YOU NOTICE YOUR OWN PACE, AND HOW YOU BALANCE RAPID RESPONSE WITH MAKING TIME TO PONDER AND REFLECT BEFORE ACTING. AND HOW THIS MAKES YOU FEEL.

We cannot comment on your thinking, behaviors or feelings about this topic, since you indicated (by choosing "neither") that you did not find yourself represented by any of the available options.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

Since we are looking at these aspects from the perspective of a sustainability mindset, let's pause and think about what behaviors might be most effective as well as much needed. While there is a call for urgent action about climate change and the related social and environmental problems, many modern sustainability challenges are actually the result of overlooked potential impacts.

For decades, well-intended decisions were largely made by quickly identifying the best option. But today we are understanding better that problems are complex, that solutions impact a multiplicity of future stakeholders, and that there are always consequences.

Of course, it is not possible to anticipate all scenarios, but pausing and checking assumptions can be very useful to avoid future problems.

/HOW ABOUT YOU TRY:

For example, what can you learn to avoid or repeat from past experiences? Can you identify in

hindsight, what was at stake? When we have more information we can better weigh alternatives. All of this, however, is at odds with speed. We cannot both act fast and ponder carefully. The question becomes: Is decisiveness and fast action coming at an expensive price for you and others, us, the next generations, and the ecosystem?

Food for thought.

*Reflective practices help to pause,
and to ponder the situation and its
implications before jumping into
action.*

/WHAT IS ASSESSED HERE: HOW AWARE YOU ARE ABOUT THE ANCHORS OF YOUR IDENTITY AND YOUR VALUES; HOW YOU FEEL AND ACT IN CONSEQUENCE.

What this tells you:

This graph shows the affective dimension, meaning that you connect emotionally with this aspect, without necessarily having full understanding about it. We don't have enough data to report if or how your feelings impact your behaviors related to this aspect.

YOUR SMI RESPONSES INDICATE THAT you see the world through a precise lens that is, and has for a long time been, the most widely shared paradigm.

In the world as you (and so many others) see it, you recognize the immense progress that humanity has made, particularly accelerated over the last century. You realize that competition has driven individuals to seek to be better than and outperform others, and the resulting inventions have vastly improved the quality of life for people on this planet.

This progress may have come at a price that we now see, particularly at the environmental or

social level, but from your perspective the fallout was not intentional and was justified by the benefits. Human “can-do” spirit and individual ambition will continue developing new solutions.

We cannot comment on your behaviors related to this topic, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

/A NOTEWORTHY FINDING:

Through the selections you made in the survey, you suggest some tension, an uncomfortable feeling of misalignment between some of the things you do and how you would prefer to see yourself. You may have been taught certain values, like being a winner, not being a loser, remaining rational at all times, having more to be more. And you became these values.

But then something has begun to shift and these values don't feel entirely OK any longer. This may make you feel confused, perhaps a bit guilty at times. You may even feel more grateful or indebted to others for their help in your achievements than stubbornly proud of being a self-made person.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

Let's pause for a moment. This survey was designed around the Sustainability Mindset, which is a way of thinking and being, to optimally adapt to the moment in which we are living. This Mindset focuses on using our natural gifts to shape a better future, for ourselves and for all, the ecosystem included.

Research has proven that what may sound overwhelming, actually can be broken down into small, realistic ways to contribute to the greater

good, and feel great at the same time. The first step is taking a fresh look at what surrounds us.

Undoubtedly, there are social and environment related challenges everywhere. Some happen locally, others across borders. As you know, science has been linking many of these issues to human behaviors, such as consumption of unhealthy foods, depletion of natural resources, pollution or contamination of air, soil and water. And we are left to deal with the consequences today, trapped in a paradigm that prioritizes values that have a negative impact, such as thoughtless consumption.

/HOW ABOUT YOU TRY:

But what if we would realize that some our habits today are (unintentionally) contributing to more of these problems in the future? And vice versa: What if a change in a small habit today could do its part to shape a better future?

Can you think of a habit of yours that might qualify? We don't know what we can until we try. And when we put aside cynicism for a moment, we actually may feel a deep sense of joy. Sometimes we shift our values as a result of a new experience. Worth trying?

When we explore our personal values, beliefs, assumptions and motivations, we gain greater control over our actions and we can see new alternative behaviors.

/SPIRITUAL INTELLIGENCE

The spiritual orientation to Nature, to ourselves and to others are key factors for a Sustainability Mindset, as they impact the quality of our actions.

**/WHAT IS ASSESSED HERE:
HOW YOU EXPERIENCE NATURE,
HOW YOU UNDERSTAND THE
HUMAN RELATIONSHIP WITH
NATURE, AND YOUR RELATED
FEELINGS AND BEHAVIORS.**

**YOUR SMI RESPONSES INDICATE
THAT** you see yourself as a rational individual.

You are comfortable opting for an intellectual approach to Nature and you value efforts to build scientific and objective knowledge about it. This is certainly how our understanding of the natural world, including our bodies, has advanced over time!

We cannot comment on your feelings about this topic, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

**/THINK ABOUT HOW YOU CAN
LEVERAGE YOUR STRENGTHS AND
MANAGE SOME OF THE LIMITATIONS
WHICH MAY BE HOLDING YOU BACK:**

That said, the evolution of science has also shown that findings are made within the constraints of available instruments, paradigms or assumptions and many myopic or biased conclusions have been revealed with the passage of time, the development of more precise measurement techniques and revolutionary thinking.

Biomimicry, a discipline studying how Nature solves problems, has been highlighting the wisdom of billions of years of evolution, and suggesting that we may find more answers in Nature than through our human intellect.

In fact, indigenous people have demonstrated a more resilient lifestyle, based on an intuitive connection to Nature.

Have you ever reflected upon some moments when you connected with Nature, perhaps in a non-verbal but memorable experience?

**/EXPLORING BELIEFS AND
ASSUMPTIONS:**

According to your choices in the questionnaire, your behaviors are based on a worldview in which humans are the most evolved and intelligent species, proven through many achievements and improvements in our quality of life.

Yet we are increasingly aware that some betterments have come at a cost for the environment or society, and we are collectively paying the price, for example, soil erosion or waterway contamination from chemical crop fertilizers meant to enhance soil productivity.

The human-centric paradigm that we collectively adopted and believe has begun to show some shortcomings, inviting us to revisit our place and role in the larger ecosystem.

What are some undesirable consequences of human progress that you have personally experienced? What message may be in this for you?

**/THOUGHTS TO PONDER WHEN YOU
CONSIDER THE SM:**

According to a 2018 United Nations study, over 55% of the world's population lives in urban areas, a proportion that is expected to increase to 68% by 2050. As a result, for many of us, the disconnection from Nature is rather "natural." Hectic life in large cities makes it difficult for us to remember that we are more than individuals

moving through traffic and buildings. The common associations with the word “Nature” may be vacation time, a park or a documentary. What about our food? Our body? The materials of every object we use? This disconnection from Nature leads to a utilitarian relationship: Nature is reduced to instrumental resources for human needs and wants.

What consequences do you see from having a utilitarian relationship with Nature?

Here is a thought to ponder: The artificial separation of the individual from the ecosystem has been found as causing not only spiritual alienation, but is the root cause for many unsustainability behaviors. When we understand something we start caring for it.

Understanding that we are one with Nature is a sensorial, intuitive experience. It is not something to be learned, but rather something that we allow to occur, and which makes us remember the sense of oneness we have always known, but had forgotten.

/HOW ABOUT YOU TRY:

It is impossible to guess your particular context, and your current priorities. But we invite you to give yourself an unusual gift: Spend an hour in Nature, on your own, without looking at your phone, and with no books, pets or other people. If you have never experienced this, you are up for a very special treat!

Understanding that we are one with Nature, a species within species, is a powerful spiritual experience that can shape behaviors leading to a more harmonious relationship with each other and all beings.

**/WHAT IS ASSESSED HERE:
HOW YOU THINK ABOUT THE
MEANING, ROLE AND VALUE OF
MINDFULNESS AND ITS PRACTICE,
AND HOW YOU FEEL ABOUT IT.**

What this tells you:

This graph shows the affective dimension, meaning that you connect emotionally with this aspect. We don't have data to report if or how these feelings relate to your understanding and behaviors.

YOUR SMI RESPONSES INDICATE THAT when your reality is challenging and poses a high demand on your physical, emotional and psychological systems, you try to manage the best you can and seek to gain inner peace.

It is not clear from the information you shared what, if any, strategies you have found that work to help you lower your stress or find some balance.

We cannot comment on how you think and behave in relation to this topic, since you indicated (by choosing "neither") that you did not feel represented by any of the available options.

**/THINK ABOUT HOW YOU CAN
FURTHER LEVERAGE YOUR
STRENGTHS AND MANAGE SOME
OF THE LIMITATIONS WHICH MAY
BE HOLDING YOU BACK:**

Here are some questions for you to contemplate. Has it ever occurred to you that the fact that “everyone lives like this” may not necessarily make it ideal? Studies show the physical and emotional consequences of a constant focus on doing while overlooking the more profound dimensions of ‘being,’ such as reflection, spiritual or religious practices, time to recharge and find ourselves, and time to connect with our deeper self.

Have you ever reflected on the high value our world gives to consumption, linking “who we are” with “what we have or own”? Have you ever felt like being trapped in a race to pursue a perhaps elusive and short-lived happiness?

Individuals that balance their tasks with contemplative practices realize the positive impact this has on their peace of mind, how they relate to others and even on their health. It may be as simple as going for a walk, listening to your preferred music dancing, practicing a sport, playing with children or your pet, gardening or creating art.

If these are some of the activities that help you unwind, you are on the right path already. They are called “contemplative practices” because they engage a different part of our brain, creating a “buffer zone” that permits the release of tensions, after which, often we end up seeing our challenges in a different light.

**/THOUGHTS TO PONDER WHEN YOU
CONSIDER THE SM:**

From the perspective of a sustainability mindset, mindfulness is both a key practice and an amazing result. Research has shown a direct link between

individuals that have some contemplative practices not just with their physical and psychological health, but also with the emergence of feelings of empathy and compassion.

This creates a disposition towards positive social and environmental actions, and the resulting satisfaction feeds a positive reinforcing loop. In other words, the better we feel about something we've done, the more we seek to repeat the experience.

When we access and display a more balanced version of ourselves, we convey an unspoken message to the people with whom we interact, not just by what we say or how we behave, but through our attitude and energy. This has a proven positive influence on others, as science has identified with the phenomenon of "emotional contagion."

In other words, when we develop a sense of peace for ourselves, we are also radiating a gift of peace to the world.

You already know that.

/HOW ABOUT YOU TRY:

What is mindfulness for you today: Is it a practice or a does it form a part of your lifestyle?

What would need to be true for you to take it to the next level, and what might that look like for you?

How easy is it for you to "catch yourself" in the moment when you are not fully present, not mindfully listening, or letting your emotional reactions control you, as opposed to your wiser self?

Mindfulness is being fully present, experiencing connectedness with all that is. Mindfulness enhances awareness and compassion, and predisposes to social and environmental actions.

/WHAT IS ASSESSED HERE:
WHAT YOU THINK ABOUT HAVING A PURPOSE IN LIFE, PARTICULARLY SOMETHING THAT IS IN SERVICE TO OTHERS; HOW THIS FITS YOUR REALITY AND HOW YOU FEEL ABOUT IT.

YOUR SMI RESPONSES INDICATE THAT you know how to set priorities, because what is urgent needs attention before what sounds important, like thinking about what is our purpose in life.

This is an important skill in times when there seem to be more obligations and things we are expected to take care of, than hours in a day. Work, family, relationships, career or health issues can use up all your available energy, often even leaving you with the feeling that nothing you do is enough. When topics arise like contributing to society, you believe this may be something to do once your other obligations diminish and you free up some time, hopefully in retirement.

We cannot comment on how you think about this topic, since you indicated (by choosing "neither") that you did not feel represented by either of the available options.

Because of this situation, you tend to get impatient with people who talk about having a purpose or a mission in life, or "changing the world." You compare these words with your current reality, and they sounds overoptimistic, grandiose, or unrealistic. Perhaps these people don't have the same challenges you have to manage, or maybe they just want to look good. Either way, it's not your reality.

/THINK ABOUT HOW YOU CAN LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

All that said, research has shown that individuals who engage in activities of service to the community, volunteering or some kind of initiative for the greater good have a higher sense of wellbeing than those who do not. This includes benefits to health, feelings of joy, increased self-esteem, and personal satisfaction.

In contrast, you may have personally experienced that focusing on the extreme demands of your life sometimes takes a toll on your health, your mood, creating tension or anxiety, disrupts your sleep or impacts how you interact with others. Oftentimes, you don't feel happy with yourself or with others. Have you asked yourself what you could do to feel better, to lower your stress? Perhaps you have, but the answer you found may have been as long as your demands remain high, there is not much you can do.

So here, again, are some questions to evaluate:

Which of the activities that you engage in are a necessity, a "must-do," and which ones represent a choice? Who would do these activities if it were not you? What would it take to let go of some activities, or perhaps of "how" you do them?

These questions have an agenda: to help you free up some time and space to try out a different experience, one that consists of something you do for others outside your inner circle.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

The research regarding core aspects for a sustainability mindset identified the role of

activities intentionally done for the “greater good.” The state of our planet is such that it requires each of us to step up and play an active role in shaping a better world.

The actions needed, whether large or small, share a similar result: they provide us with a feeling of joy, which then we want to replicate in order to feel good again, thus creating a reinforcing loop. Interestingly, we tend to think that we need to take care of ourselves first, before helping others, but the facts show that when we do small acts of kindness for others, we feel much better ourselves.

/HOW ABOUT YOU TRY:

With this in mind, what are some experiments you are willing to try? What are some things for the greater good that you have already done, and perhaps could repeat, do regularly, or improve?

Don't be intimidated by lofty phrases like “changing the world” or having a life's mission or purpose. In fact, each small act of kindness comes with an impact that we may never be able to imagine. That also changes the world, one positive interaction at a time.

Defining our purpose provides an unconscious compass, and when it is grounded in values of our higher self, we actively shape a better world.
