

Sustainability
Mindset
Indicator®

**/REPORT
PREPARED FOR:
Upin Haryanti
24/May/2023**

Welcome to your Personalized Report. This Report is based on your selections on the SMI. It is meant to be a personal development tool, to highlight aspects of your understanding, behaviors and feelings related to your Sustainability Mindset (SM).

You will find observations that you may identify with, others that you vaguely recognize, and others that perhaps don't resonate with you. Keep what you need and what makes sense to you.

You will also find questions to consider, suggestions for things you can try, and information related to the aspects covered in this report, and how these are related to the Sustainability Mindset.

Take your time reading your Report. Pause, take notes, and reflect. It is all about you, and for you. There were no wrong answers in the survey. Only good options and perhaps some that you hadn't thought of.

/WHAT YOU WILL FIND IN THE FOLLOWING PAGES

This Personalized Report is organized into several sections. The first section contains a graph, displaying how the different aspects assessed compare to each other, according to your choices in the survey. Those that occupy a larger area are your stronger ones and the narrower or missing ones are aspects of the Sustainability Mindset that are less developed or absent for you, as inferred from the combination of your answers.

The next section presents personalized descriptions of where you find yourself on your journey towards a Sustainability Mindset, in four clusters: Ecological Worldview, Systems Perspective, Emotional Intelligence, and Spiritual Intelligence.

Within each of these clusters you will find what aspects were assessed, and a graph for each aspect displaying how you connect to this topic, whether intellectually, through your actions and behaviors and/or by engaging your emotions.

If you see some areas missing within the graph, it means that either you selected "neither" for that question and therefore we don't have information to report on, or your answers suggest you don't engage in one or more particular areas (cognitive, behavioral or affective). Similarly, if you selected "neither" for all the questions within one aspect, we don't include a graph, since we don't have information to report on.

Each graph is accompanied by a box with a brief explanation, and you will find much more information in the text to include what your choices suggest, why this particular aspect is key for a sustainability mindset, and questions to ponder and suggestions to try.

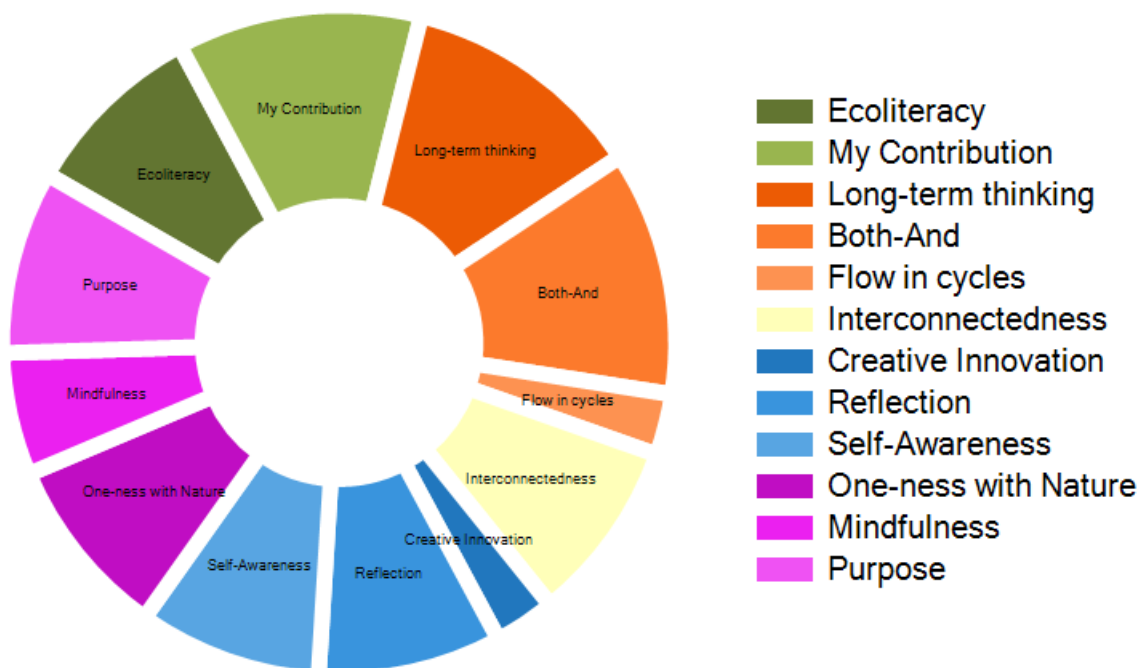

Enjoy your journey into the realm of the Sustainability Mindset - a place where you can be your best, for yourself and for the World.

The SMI Team

/ Your overall
**SUSTAINABILITY
MINDSET PROFILE**

The graph below shows your personal profile, indicating how – relatively to each other – you have developed your Sustainability Mindset. The wider sections indicate your stronger areas, and vice versa.

If you see some aspects listed in the side box that are not included in the graph, it means that these are areas to be considered more closely. It may be that you didn't feel represented by any of the statements to choose from, or it might be that your reality, context, and/or habits prompt you to think, act or feel differently. You will find further comments in this report about these aspects, exploring their up- and downsides.

**/WHAT IS ASSESSED HERE:
HOW YOU SEE THE RELATION
BETWEEN INDIVIDUAL DECISIONS
AND PLANETARY CHALLENGES, HOW
YOU FEEL ABOUT IT AND THE
IMPACT ON YOUR PERSONAL
BEHAVIORS.**

What this tells you:

When the graph is well balanced, it means that you have a good understanding of the aspect of the Sustainability Mindset being assessed, that you are able to connect with your feelings about it, and that you tend to act upon what you know and feel. This is a good start, and you might want to think about circumstances or contexts in which you would like to act more, understand better or further explore your feelings.

YOUR SMI RESPONSES INDICATE THAT you periodically ponder if you are personally playing a role in the world's social or environmental problems of the world. Certainly you didn't create the problems intentionally, but you seem to pause and wonder in what ways you may be contributing to them.

/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE THOSE STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

Because you are a very sensitive person, with an open heart, realizing that you are part of the problem may bring up feelings of guilt, sadness, despair or anxiety.

Yet, are you aware that your ability to connect truthfully to your own emotions is actually a valuable skill that is much needed in the world?. Your sensitivity also helps you to feel for others, with empathy and compassion for their suffering. This is a precious quality, although at times it can be difficult to live with it.

/YOU ARE COMFORTABLE WHEN you find a way to convert the emotional energy into action, by taking a proactive role. Instead of remaining "the victim," you choose to act. You find small ways in which you are contributing to the problems and seek out those changes you could make to be less a "part of the problem" and become part of the solution. This is a wonderful start!

The more you observe, the more opportunities you will find to make a real difference with a few simple changes to your behavior and habits.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

Thinking of how we are personally contributing to the planetary challenges may not be something we do daily. Our demanding lives have many obligations and don't leave much time for reflecting on this. We are busy getting things done! Yet when analyzing the current unsustainability of our planet, science has clearly established a link between human behaviors in past decisions and the current problems we face.

Much attention is now focused on how to repair the damage done, and how to restore endangered or depleted resources. Scientists and entrepreneurs study how to minimize current or future problems at the environmental or social level, and how to innovate to avoid negative impacts into the future.

If we collectively influenced the situation we find ourselves in now (with all of its problems), that means we also hold the key to influence where we will collectively be in the future – we meaning humankind at large, or, from a closer perspective, our families, children and grandchildren.

When we identify the ways in which we are unintentionally contributing to the problems, we have a chance to do something about them. It also expands our consciousness, and develops social sensitivity.

/HOW ABOUT YOU TRY:

What do you see as your next developmental frontier? Consider how to make a more frequent habit of asking yourself “How am I contributing to this?” This question opens a path of inquiry, which automatically leads to expansion of your consciousness. You become more alert to take notice, and thus more open to try out new behaviors.

This same question, by the way, is also a powerful tool that can improve our relationships and interactions with others! So often we focus on what others are doing unto us, which leaves us powerless. When we learn to pay attention to what is our role in the problems we endure, we regain control and can actually do something.

Actively thinking about your contribution is definitely an important milestone in your personal development, with planetary implications.

Other possibilities to ponder: To be more creative in your actions, perhaps use more of your unique talents to make a difference.

How might you connect more from the heart with others?

Food for thought!

/SYSTEMS PERSPECTIVE

When analyzing information and making decisions a SYSTEMS PERSPECTIVE has a major impact on the sustainability of our actions.

**/WHAT IS ASSESSED HERE:
HOW YOU THINK ABOUT THE LONG-
TERM IMPACT WHEN ANALYZING
AND MAKING DECISIONS,
COMPLEMENTING SHORT-TERM
THINKING; HOW YOU FEEL ABOUT
IT, AND THE IMPACT ON YOUR
BEHAVIORS.**

What this tells you:

When the graph is well balanced, it means that you have a good understanding of the aspect of the Sustainability Mindset being assessed, that you are able to connect with your feelings about it, and that you tend to act upon what you know and feel. This is a good start, and you might want to think about circumstances or contexts in which you would like to act more, understand better or further explore your feelings.

YOUR SMI RESPONSES INDICATE THAT you have a good understanding of the long-term sustainability impacts that our decisions may have, even the simple and daily ones, not to mention behaviors commonly accepted in our society.

In addition, this understanding is not indifferent to you: You are a sensitive person who seems to get worried about the long-term impact that your

decisions or lifestyle may be having on the planet. It is difficult to live with this feeling!

/YOU ARE COMFORTABLE WHEN you convert the emotional motivation into actions. In this case, you seem to have a natural tendency to think of “what ifs” and the long-term consequences of possible decisions before taking them.

This may not always be welcome in a team setting, but from the perspective of shaping a sustainable world, this contribution is a great asset to yourself and to your working groups. Your perspective will likely enrich actions, as they result from considering potential impacts in the longer term.

You probably sense that the world around demands a fast pace, decisiveness, focusing just on the tangible short term and continues as if no such thing as a long-term impact would be realistic. But change never starts as mainstream, and you may be showing a new way of doing things – for the sustainability of the whole.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

There is definitely a tacit pressure to act promptly and focus on that which needs immediate attention. This is very important, and there are many circumstances where this way of responding is the optimal, or even the only one that matters. A fire in the house, for example. We can sense the urgency and it is not a good idea to pause and reflect on the long-term implications of the fire.

But for many daily decisions the context is different, and yet we still prioritize short-term thinking, often without even weighing any medium- or long-term impacts of what we are doing. The stream of life, our colleagues, perhaps everyone with whom we interact takes for granted that we “all” act this way.

On the other hand, with greater understanding of the social and environmental problems we are facing, it has become clear that the law of cause-and-effect is always at play, even if not immediately obvious. In other words, the consequences of our daily actions do have impacts - some over time, some just in a different geography, and many on both.

As with other aspects which are key for a sustainability mindset, it is not a question of choosing one over the other, but a matter of balancing both views and taking both time horizons into account.

This mental habit expands our consciousness, as we become more aware of the way we are impacting others and the world. Not thinking about this doesn't stop it from happening. Stretching our imagination to consider potential impacts across time helps us make better decisions, and play a more active role in shaping a better world.

This is something about which you seem to know quite a lot.

/HOW ABOUT YOU TRY:

How comfortable are you bringing the long-term perspective into the conversation? Do you sense that sometimes you hold back, because it is not so popular? Are you fully aware that your perspective, by not being culturally mainstream, is what we all need more? Is this something that may encourage you further to speak up?

Every action has consequences that are not immediately visible. Considering the long-term when analyzing situations and making decisions has a positive impact on global sustainability.

**/WHAT IS ASSESSED HERE:
HOW YOU BALANCE YOUR CAPACITY
TO ANALYZE AND PLAN WITH THE
UNDERSTANDING OF NATURAL
CYCLES, AND MAKE THEM PART OF
YOUR MINDSET.**

What this tells you:

This graph shows only one dimension – behavioral - meaning that you are action- oriented, without much engagement of your feelings and without necessarily thinking about this aspect intellectually. You might use this information to seek ways to expand your understanding and explore your emotions.

YOUR SMI RESPONSES INDICATE THAT you see yourself aligned with the cyclical flow of nature, and in your behaviors you seek to express an understanding of impermanence.

/YOU ARE COMFORTABLE accepting that things grow, but not forever because there is also decline and death. In our day-to-day, this means accepting ageing and mortality, endings of relationships or certain phases in our life, and new beginnings as well.

In another context, it means that we see ourselves as part of nature, not as its controller-in-charge.

This is a valuable attitude, because it may make your life easier. Like swimming along with the river’s current, it increases your speed, and reduces the stress of resisting obstacles.

/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE THOSE STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

You see the challenges life offers as opportunities to find intelligent solutions. Indeed, intellectual abilities are important for you, as they permit to control difficult situations, by crafting plans and setting goals to measure progress.

There seems to be a hesitation between the excitement of figuring out how to solve a problem, and the alternative of letting that solution go and observing what happens. A part of you likes to believe in and trust human ingenuity to figure out solutions for our environmental or social problems.

This idea gives you feelings of empowerment and control, which are nice feelings, particularly as they avoid the stress of uncertainty. Sometimes you feel more alive when making plans and implementing them, and derive a sense of fulfillment and satisfaction when you achieve goals you set for yourself.

While planning is a way to feel in control of situations, it is constantly challenged since life - with its countless variables - is too complex to be managed. It may be that same frustration, when things don’t work out as you planned or expected, that reminds you to let go and observe what the events are telling you. What happens when you do so?

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

You may be wondering why planning is related to several key aspects for a sustainability mindset. The connection is not in the planning as an activity per se, but in the way we think and process information when we plan. Planning is about organizing and structuring in order to control outcomes. Planning is linear by definition -one step after the other - and it assumes cause-effect relationships. But what about multi-effects, multi-causes, and feedback loops?

Contrast this with the sustainability problems we are facing. To begin with, they are complex and multidimensional by their very nature. Many are the result of our linear thinking, for example we believe that we can pursue unlimited growth, yet depletion of natural resources shows us this is not possible.

Our reliance on the human mind can create a collective assumption that we are in control, but a “small” manifestation like Covid-19 arrives as a surprise to debunk the myth of our own superiority.

Planning in itself is not the problem but rather, excessive reliance on carefully crafted steps, and forgetting the natural cycles of growth and decline.

/HOW ABOUT YOU TRY:

Do you see yourself balanced in terms of making and letting go of plans? How do you balance structure and flow, organization and flexibility? What do you see as your personal development challenges in this aspect?

You may want to pay attention to when you get too attached to your plans, and experiment with letting go. Explore what you gain and what you lose by doing so. How aligned are your actions with

the understanding of natural cycles of growth and decline? What implications does this understanding have for you?

There are no linear processes in Nature: Everything flows in cycles of birth, growth, death, and rebirth.

Many aspects of man-made unsustainability of the planet are a result of the misconception that we are not governed by this law of Nature.

**/WHAT IS ASSESSED HERE:
HOW YOU UNDERSTAND AND
EXPERIENCE INTERCONNECTEDNESS,
VERSUS VALUES LIKE AUTONOMY
AND INDEPENDENCE.**

What this tells you:

This graph shows two dimensions, the behavioral and affective. This means that you connect emotionally with this aspect, and act upon it, perhaps without a full understanding of why it is important. You may find it interesting to deepen your understanding of this principle.

YOUR SMI RESPONSES INDICATE THAT

you believe independence and autonomy are very important aspects of human life, perhaps as a combination of a given right, a personal goal and a precious virtue to cultivate. They signify ownership and accountability to you.

Interestingly, your choices in the questionnaire also indicate that you are a person who is appreciative about other people's input, feeling gratitude in your heart for their support even to your personal accomplishments.

You are comfortable paying attention to the input of stakeholders when analyzing a problem

and seeking effective solutions, seeing yourself as part of a larger whole.

/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

While certain cultures have a collectivistic framework, most of the western-northern culture - widely exported and globalized - is individualistic and celebrates personal achievement. Do you experience this unspoken expectation in your daily life - to be independent, to outperform others, to be self-reliant or perhaps to demonstrate your value in competitive settings? Have you sensed the contradiction between these two paradigms, one valuing competition and self-reliance, the other promoting collaboration and inclusion?

How realistic and even feasible is this idea of autonomy? Let's pause for a moment: Can you name one achievement that was purely and authentically your own without another person playing any role in it?

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

The polarities of independence vs. interconnectedness and competition vs. collaboration are of particular relevance when focusing on sustainability. The environmental and social challenges are complex and multidimensional, making it impossible for any person to solve on their own. It is only through collective thinking, action and collaboration of multiple stakeholders that we will be able to develop alternatives. (This, by the way, makes sustainability a great opportunity for contributing personal skills to a larger cause).

The combination of your responses seem to indicate that your heart and your actions have embraced collaboration, stakeholder inclusion and participatory solutions. You are on the right track – the old paradigm of competition and individual achievement may be outdated soon, particularly with the planetary sustainability challenges.

/HOW ABOUT YOU TRY:

We invite you to explore what autonomy means for you. What are the roots of this value for you, perhaps in your upbringing or in your current context? Is this a priority for you, or is it something automatically inherited, or maybe adopted without giving it much thought?

Are you able to share your perspectives with others? How can you bring your collaborative spirit to new contexts, where it might be much needed? You might help expand other people's thinking horizon.

That can be an interesting task ahead.

*When we see interconnectedness,
we understand the importance of
diversity, and our decisions and
actions become more inclusive,
which contributes to the
sustainability of the whole.*

/EMOTIONAL INTELLIGENCE

Understanding ourselves through the anchors of our identity, the pace of our life, and how we consider our intuitive wisdom are key for a sustainability mindset.

/WHAT IS ASSESSED HERE: HOW YOU INCORPORATE NON- RATIONAL INFORMATION, INTUITIVE KNOWING, CREATIVITY AND IMAGINATION IN ORDER TO BALANCE RATIONAL THINKING, AND HOW YOU FEEL ABOUT IT.

What this tells you:

This graph shows only one dimension – cognitive - meaning that you have an intellectual understanding about this aspect. You are not necessarily engaging your feelings nor converting them into actions. You might use this information to explore your emotions related to this aspect of the sustainability mindset, and perhaps find ways to convert your understanding into actions.

YOUR SMI RESPONSES INDICATE THAT you have a clear understanding of the value of combining your logical and analytical thinking abilities with creative imagination.

You know that the human mind is capable of great accomplishments, as history has shown, when intuition and creative ideas are coupled with rational thinking and good strategies. You may

even trust that our sustainability problems could be addressed with a good balance of these abilities.

At the same time, **you feel most comfortable when** you can think things through and follow proven steps, organizing reality into priorities. You enjoy order and dislike the uncertainty of chaotic situations.

These preferences make you a great contributor of rational thinking when analyzing a problem. You may find yourself in the role of the defender of structure and stability, and the keeper of the status quo. You are careful to avoid what you consider as unnecessary risks.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

The sustainability challenges we are facing are largely new, and as COVID-19 taught us, increasingly situations arise for which we don't have previous experience or science on which to rely. We have become more aware of the complexity of our challenges, and we are skeptical of simplistic solutions.

However this also requires entry into uncharted territories. Resilience calls for flexibility in adapting to new situations, and this entails innovating and experimenting. Having no plans or blueprints to follow may be unsettling, and the only choice is to take some risks.

/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

These seem to be your current challenges: How can you feel more comfortable trying and experimenting without knowing?

/HOW ABOUT YOU TRY:

Here is a thought to consider: What are some situations in which you are creative, relaxed and playful? Perhaps cooking or gardening? Playing some team sports? Or around small children? Maybe planning a party?

If you can identify some of these creative and playful moments, in them you have a reservoir of imagination available to tap into. This can help you complement your strategic thinking and maximize your achievements for the benefit of all.

Resilience is based on constant creativity, innovation, and experimentation. When we neglect the non-rational wisdom we have in us, our solutions are missing critical information, and may create negative impacts on the ecosystem and society.

**/WHAT IS ASSESSED HERE:
HOW YOU NOTICE YOUR OWN PACE,
AND HOW YOU BALANCE RAPID
RESPONSE WITH MAKING TIME TO
PONDER AND REFLECT BEFORE
ACTING. AND HOW THIS MAKES
YOU FEEL.**

What this tells you:

This graph shows two dimensions, the behavioral and affective. This means that you connect emotionally with this aspect, and act upon it, perhaps without a full understanding of why it is important. You may find it interesting to deepen your understanding of this principle.

YOUR SMI RESPONSES INDICATE THAT you see the importance of swift actions in a world that you believe is unforgiving of slow-movers. You know that the present day pace is fast or highly accelerated, depending upon who you ask.

However, you are comfortable when you can periodically pause and seek to explore what might be at stake in a decision, or check the assumptions at play before acting. This

behavior, seemingly at odds with how you think “the world works”, must have given you good results in the past, which reinforced it and now keeps you decelerating in critical moments. Congratulations if this is the case, since you are helping to avoid many problems in the future. A valuable and timely contribution!

**/THINK ABOUT HOW YOU CAN
FURTHER LEVERAGE YOUR
STRENGTHS AND MANAGE SOME
OF THE LIMITATIONS WHICH MAY
BE HOLDING YOU BACK:**

It seems that your very nature seeks a slower pace of life. It makes you feel better, more relaxed or lowers your stress levels. All of this, however, is at odds with speed. We cannot both act fast and ponder carefully!

The question becomes: Is decisiveness and fast action coming at an expensive price for us, the next generations, and the ecosystem? What might be new ways of combining urgently needed actions with careful exploration of their impacts?

What role could you see there for you? Do you think you could be more vocal and perhaps find more courage to offer an unconventional perspective?

**/THOUGHTS TO PONDER WHEN YOU
CONSIDER THE SM:**

Since we are looking at these aspects from the perspective of a sustainability mindset, let’s pause and think about what behaviors might be most effective as well as much needed.

While there is a call for urgent action about climate change and the related social and environmental problems, many modern

sustainability challenges are actually the result of overlooked prior potential impacts. For decades, well-intended decisions were largely made by quickly identifying the best option.

But today we are understanding better that problems are complex, that solutions impact a multiplicity of future stakeholders, and that there are always consequences.

Of course, it is not possible to anticipate all scenarios, but pausing and checking assumptions can be very useful to avoid future problems.

For example, what can we learn to avoid or repeat from past experiences? Can we identify, in hindsight, something that was at stake and overlooked because we were trying to act fast? When we have more information we can better weigh alternatives.

According to your answers, you seem to be gifted with an intuition that something is not quite right. Does it ever happen to you that you wish you could relax more, slow down and do nothing? Does your body, your mind or perhaps your soul call for a break, less stress?

/HOW ABOUT YOU TRY:

What message may be there for you, waiting to be heard and acted upon? And how can you more confidently share this different way of being and living with others?

Food for thought!

Reflective practices help to pause, and to ponder the situation and its implications before jumping into action.

/WHAT IS ASSESSED HERE: HOW AWARE YOU ARE ABOUT THE ANCHORS OF YOUR IDENTITY AND YOUR VALUES; HOW YOU FEEL AND ACT IN CONSEQUENCE.

What this tells you:

This graph shows that your approach to the assessed topic is both cognitive and affective. We don't enough have data to report about your behaviors and whether or how your understanding and feelings are converted into actions.

YOUR SMI RESPONSES INDICATE THAT you believe the paradigm we have long been living with is due for a revision, because values like growth and progress may be linked to an assumption of unlimited resources, which may not be realistic.

We cannot comment on how your thinking and feelings impact your behaviors, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

A VALUABLE (AND UNCOMFORTABLE) TENSION:

But it seems that you experience an uncomfortable feeling of misalignment between some of the things you do and how you would prefer to see yourself. You may have been taught certain values, like being a winner, not being a loser, remaining rational at all times, having more to be more. And you became these values.

Then something has begun to shift and these values don't feel entirely OK any longer. This may make you feel confused, perhaps a bit guilty at times. You may even feel more grateful or indebted to others for their help in your achievements than stubbornly proud of being a self-made person.

Well, this is a very important moment of awareness, because change starts with our noticing some discomfort about something, and we want to do something about it to feel better (or at least less bad). In this case, you seem to have achieved this very important step. Of course it can be overwhelming to think about the complex problems. But what if you start small?

/THINK ABOUT HOW YOU CAN LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

Your understanding and intuition are not mainstream, and thus very important to drive much needed change. How happy are you with how you are sharing your valuable perspectives with others? Do you feel you are doing it as much as you could?

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

Let's pause for a moment.

This survey was designed around the Sustainability Mindset, which is a way of thinking and being, to optimally adapt to the moment in which we are living. This Mindset focuses on using our natural gifts to shape a better future, for ourselves and for all, the ecosystem included.

Research has proven that what may sound overwhelming, actually can be broken down into small, realistic ways to contribute to the greater good, and feel great at the same time. The first step is taking a fresh look at what surrounds us.

Undoubtedly, there are social and environment related challenges everywhere. Some happen locally, others across borders. Science has been linking many of these issues to human behaviors, such as consumption of unhealthy foods, depletion of natural resources, pollution or contamination of air, soil and water. And we are left to deal with the consequences today, trapped in a paradigm that prioritizes values that have a negative impact, such as thoughtless consumption.

/HOW ABOUT YOU TRY:

Have you identified some of your activities that may not live up to your personal expectations of living in a 'sustainable' way? In what new ways could you make some changes? Sometimes we do not have the power to control a situation, but we always have unlimited power to influence, with our words, attitudes, talking or writing.

How about exploring a few of your unused possibilities?

Another suggestion is that you explore the roots of some values that are important for you, such as

success, winning, and outperforming others. Where can you trace their origins? Perhaps in your upbringing, or in your current context? What do they represent for you, which makes them important? Are they authentically yours, or are they perhaps inherited, adopted without giving much thought to it?

When we explore our personal values, beliefs, assumptions and motivations, we gain greater control over our actions and we can see new alternative behaviors.

/SPIRITUAL INTELLIGENCE

The spiritual orientation to Nature, to ourselves and to others are key factors for a Sustainability Mindset, as they impact the quality of our actions.

**/WHAT IS ASSESSED HERE:
HOW YOU EXPERIENCE NATURE,
HOW YOU UNDERSTAND THE
HUMAN RELATIONSHIP WITH
NATURE, AND YOUR RELATED
FEELINGS AND BEHAVIORS.**

What this tells you:

This graph shows that your approach to the assessed topic is both cognitive and affective, but you are not necessarily translating what you know and feel into actions. You might use this information to explore new habits and daily changes for a sustainability purpose.

YOUR SMI RESPONSES INDICATE THAT you think of Nature as an experience that offers more wisdom than we can intellectually grasp. This understanding may be the result of some special moments, when you stood in awe admiring Nature, your heart perhaps filled with joy and some kind of wordless experience of beauty.

You see the limitations of pure rationality, and realize that the intellectual capability is valuable for building scientific knowledge, but also frequently overstated. Our comprehension of the

natural world, including our bodies, has advanced over time, but in the history of science findings are always within the constraints of available instruments, paradigms or assumptions. It is clear to you that over time, the development of more precise measurement techniques or revolutionary thinking has certainly revealed the myopic or biased conclusions of the past!

However, you are also comfortable acting with a utilitarian approach to natural resources, considering the rights granted by our belief in “human superiority”.

With no doubt, many scientific discoveries and improvements of our quality of life have shown the power of the human mind. Yet you may have also noticed that some betterments have come at a cost for the environment or society, and we are collectively paying that price, for example, soil erosion or waterway contamination from chemical crop fertilizers meant to enhance soil productivity.

The human-centric paradigm that we collectively adopted and believe has begun to show some shortcomings, inviting us to revisit our place and role in the larger ecosystem.

What are some undesirable consequences of human progress that you have personally experienced? What message may be in this for you?

/THINK ABOUT HOW YOU CAN LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:

The combination of your choices in this instrument seem to show a disconnect between what you believe and value, and your actions. You have been blessed with some powerful experiences of

oneness with Nature that give you an empathic disposition, yet they don't seem to manifest in how you act. It may be a way of blending into a context that rewards rational thinking and intellectual capabilities.

But is that who you really are?

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

According to a 2018 United Nations study, over 55% of the world's population lives in urban areas, a proportion that is expected to increase to 68% by 2050. As a result, for many of us, the disconnection from Nature is rather "natural."

Hectic life in large cities makes it difficult for us to remember that we are more than individuals moving through traffic and buildings. The common associations with the word "Nature" may be vacation time, a park or a documentary. What about our food? Our body? The materials of every object we use?

We rely on and praise scientific progress, but history has demonstrated that scientific findings are always within the constraints of available instruments, paradigms or assumptions and many myopic or biased conclusions have been revealed with the passage of time, the development of more precise measurement techniques and revolutionary thinking. Biomimicry, a discipline studying how Nature solves problems, has been highlighting the wisdom of billions of years of evolution, and suggesting that we may find more answers in Nature than through our human intellect.

In fact, indigenous people have demonstrated a more resilient lifestyle, based on an intuitive connection to Nature.

This disconnection from Nature leads to a utilitarian relationship: Nature is reduced to instrumental resources for human needs and wants, causing not only spiritual alienation, but is the root cause for many unsustainability

behaviors. What impacts do you see from having a utilitarian relationship with Nature?

When we understand something we start caring for it. Understanding that we are one with Nature, a species within species, is a profound experience that can shape behaviors leading to a more harmonic relationship with the self, with each other and with all beings.

You seem to have experienced it: a sensorial, intuitive understanding. It is not something to be learned, but rather an experience that we allow to happen, and which makes us remember something we have always known, but had forgotten.

/HOW ABOUT YOU TRY:

Sometimes we realize that our thinking, feeling and acting are not aligned. When we notice it, we may feel discomfort and tension- something out of sync. A sustainability mindset is not just harmony with the ecosystem, but it starts within ourselves.

Is there something you need to revise, to feel more authentically who you are? What part of you is still clinging to an old paradigm, and why might that be so?

Understanding that we are one with Nature, a species within species, is a powerful spiritual experience that can shape behaviors leading to a more harmonious relationship with each other and all beings.

**/WHAT IS ASSESSED HERE:
HOW YOU THINK ABOUT THE
MEANING, ROLE AND VALUE OF
MINDFULNESS AND ITS PRACTICE,
AND HOW YOU FEEL ABOUT IT.**

What this tells you:

This graph shows the affective dimension, meaning that you connect emotionally with this aspect. We don't have data to report if or how these feelings relate to your understanding and behaviors.

YOUR SMI RESPONSES INDICATE THAT when your reality is challenging and poses a high demand on your physical, emotional and psychological systems, you try to manage the best you can and seek to gain inner peace.

It is not clear from the information you shared what, if any, strategies you have found that work to help you lower your stress or find some balance.

We cannot comment on how you think and behave in relation to this topic, since you indicated (by choosing "neither") that you did not feel represented by any of the available options.

**/THINK ABOUT HOW YOU CAN
FURTHER LEVERAGE YOUR
STRENGTHS AND MANAGE SOME
OF THE LIMITATIONS WHICH MAY
BE HOLDING YOU BACK:**

Here are some questions for you to contemplate. Has it ever occurred to you that the fact that “everyone lives like this” may not necessarily make it ideal? Studies show the physical and emotional consequences of a constant focus on doing while overlooking the more profound dimensions of ‘being,’ such as reflection, spiritual or religious practices, time to recharge and find ourselves, and time to connect with our deeper self.

Have you ever reflected on the high value our world gives to consumption, linking “who we are” with “what we have or own”? Have you ever felt like being trapped in a race to pursue a perhaps elusive and short-lived happiness?

Individuals that balance their tasks with contemplative practices realize the positive impact this has on their peace of mind, how they relate to others and even on their health. It may be as simple as going for a walk, listening to your preferred music dancing, practicing a sport, playing with children or your pet, gardening or creating art.

If these are some of the activities that help you unwind, you are on the right path already. They are called “contemplative practices” because they engage a different part of our brain, creating a “buffer zone” that permits the release of tensions, after which, often we end up seeing our challenges in a different light.

**/THOUGHTS TO PONDER WHEN YOU
CONSIDER THE SM:**

From the perspective of a sustainability mindset, mindfulness is both a key practice and an amazing result. Research has shown a direct link between

individuals that have some contemplative practices not just with their physical and psychological health, but also with the emergence of feelings of empathy and compassion.

This creates a disposition towards positive social and environmental actions, and the resulting satisfaction feeds a positive reinforcing loop. In other words, the better we feel about something we've done, the more we seek to repeat the experience.

When we access and display a more balanced version of ourselves, we convey an unspoken message to the people with whom we interact, not just by what we say or how we behave, but through our attitude and energy. This has a proven positive influence on others, as science has identified with the phenomenon of "emotional contagion."

In other words, when we develop a sense of peace for ourselves, we are also radiating a gift of peace to the world.

You already know that.

/HOW ABOUT YOU TRY:

What is mindfulness for you today: Is it a practice or a does it form a part of your lifestyle?

What would need to be true for you to take it to the next level, and what might that look like for you?

How easy is it for you to "catch yourself" in the moment when you are not fully present, not mindfully listening, or letting your emotional reactions control you, as opposed to your wiser self?

Mindfulness is being fully present, experiencing connectedness with all that is. Mindfulness enhances awareness and compassion, and predisposes to social and environmental actions.

**/WHAT IS ASSESSED HERE:
WHAT YOU THINK ABOUT HAVING A
PURPOSE IN LIFE, PARTICULARLY
SOMETHING THAT IS IN SERVICE TO
OTHERS; HOW THIS FITS YOUR
REALITY AND HOW YOU FEEL ABOUT
IT.**

What this tells you:

This graph shows two dimensions, the behavioral and affective. This means that you connect emotionally with this aspect, and act upon it, perhaps without a full understanding of why it is important. You may find it interesting to deepen your understanding of this principle.

YOUR SMI RESPONSES INDICATE THAT you have a good understanding of the demands of our times. You realize that we live in a context where there seem to be more obligations and things we are expected to take care of, than hours in a day.

Knowing how to set priorities is key, and what is urgent needs attention before what sounds important, to include thinking about what is our purpose in life. At the same time, you actually state that you may have found it, through actions that serve others.

A noteworthy finding:

Your choices in the questionnaire also indicate that there is something that doesn't feel quite right. A part of you wishes you would find something truly meaningful that makes a difference in the world, which would give your life some larger purpose.

**/THINK ABOUT HOW YOU CAN
FURTHER LEVERAGE YOUR
STRENGTHS AND MANAGE SOME
OF THE LIMITATIONS WHICH MAY
BE HOLDING YOU BACK:**

It is possible that part of your obligations and responsibilities are to serve others, to attend to their needs or expectations. Your work, family, perhaps relationships, form part of your reality and may use up your available energy – and you perceive this as your service. How does this make you feel? Do these activities feel like your “calling”, or like an obligation that lands upon you?

Sometimes we don't see that we had a choice, and that may place an extra burden on us, which is perceived very differently than when we intentionally decide and choose where and how to “serve”.

/A GREAT SIGNAL

While your feelings are mixed, this is actually a great start. When we sense a tension between what we are doing and what we would like to do, something has already begun to shift and we are on the path of growth and transformation.

Research has shown that individuals who engage in activities of service to the community, volunteering or some kind of initiative for the greater good have a higher sense of wellbeing than those who do not. This includes benefits to health, feelings of joy, increased self-esteem, and personal satisfaction.

In contrast, you may have personally experienced that focusing on the extreme demands of your life sometimes takes a toll on your health, your mood, creating tension or anxiety, disrupts your sleep or impacts how you interact with others.

Perhaps you don't feel happy with yourself or with others. Have you asked yourself what you could do to feel better, to lower your stress? Perhaps you have, but the answer you found may have been that as long as your demands remain high, there is not much you can do.

So here, again, some thoughts to evaluate:

Which of the activities that you engage in are a necessity, a "must-do," and which ones represent a choice? Who would do these activities if it were not you? What would it take to let go of some activities, or perhaps of "how" you do them?

These questions have an agenda: to help you free up some time and space to try out a different experience, one that consists of something you do for others outside your inner circle.

/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:

The research regarding core aspects for a sustainability mindset identified the role of activities intentionally done for the "greater good." The state of our planet is such that it requires each of us to step up and play an active role in shaping a better world.

The actions needed, whether large or small, share a similar result: they provide us with a feeling of joy, which then we want to replicate in order to feel good again, thus creating a reinforcing loop.

Interestingly, we tend to think that we need to take care of ourselves first, before helping others, but the facts show that when we do small acts of kindness for others, we feel much better ourselves.

/HOW ABOUT YOU TRY:

With this in mind, what are some new experiments you can try? What are some different things for the greater good that you already did, and perhaps could repeat, do regularly, or improve? Which of your natural gifts and skills could you put into service for the greater good, in a cause for which you have a passion?

Don't get intimidated by grandiose words like 'changing the world' or having a life mission or purpose. In fact, each small action of kindness has already an impact that we may never be able to imagine. That is also changing the world, one interaction at a time.

Defining our purpose provides an unconscious compass, and when it is grounded in values of our higher self, we actively shape a better world.
