

Sustainability  
Mindset  
Indicator<sup>®</sup>

**/REPORT  
PREPARED FOR:  
Leila S Lamoureux  
29/Jul/2024**

*If for every dollar in minute that we invest in AI, we invest another dollar in developing our own consciousness, our own mind, we will be ok. Yuval Noah Harari*

# FOOD FOR THOUGHT.

How ready do you feel you are to deal with the complexity we are living in? How do you respond to the increasing polarization, to the need to expand our attention to stakeholders impacted by our daily decisions? How comfortable are you planning and yet letting go of your plans as you consider the feedback that reality is giving you? How easy is it for you to adapt, revisit your assumptions, unleash your creativity, and innovate?

**These are some of the key indicators of resilience.**

We find comfort in our plans, in the 'known and tried out' ways of doing things. Yet this may also be the obstacle that slows us down when we need to find new ways of acting that have a better impact on the world. While much is talked about the future that awaits us, it's easy to forget that it is *us*, each one of us, who is shaping this future with our daily decisions and actions. Yet, rushed as we all live in these demanding times, we may not take the moment to pause, observe where we are, what our most precious goals and values are, and how our day, today, is reflecting those values, leading us to those goals. And what course corrections we may want to do!

**This is the Era of Purpose.** How mindful are you of your larger purpose? Setting a purpose becomes the compass offering certainty in a world filled with uncertainty. Are you giving yourself the gift of a pause, to ask yourself what your larger, higher purpose could be?

You may recognize in these lines some aspects that were addressed in the statements offered to you in the Sustainability Mindset Indicator, as you were invited to reflect and choose which best represented you. This report constitutes a picture, a map of your personal journey towards a resilient, purposeful, creative mindset for flourishing as an individual, making a difference in the world. Which is sustainability at its best.

Let this report be a gift for your soul.

Welcome to your Personalized Report. This Report is based on your selections on the SMI. It is meant to be a personal development tool, to highlight aspects of your understanding, behaviors and feelings related to your Sustainability Mindset (SM).

You will find observations that you may identify with, others that you vaguely recognize, and others that perhaps don't resonate with you. Keep what you need and what makes sense to you.

You will also find questions to consider, suggestions for things you can try, and information related to the aspects covered in this report, and how these are related to the Sustainability Mindset.

Take your time reading your Report. Pause, take notes, and reflect. It is all about you, and for you. There were no wrong answers in the survey. Only good options and perhaps some that you hadn't thought of.

# /WHAT YOU WILL FIND IN THE FOLLOWING PAGES

This Personalized Report is organized into several sections. The first section contains a graph, displaying how the different aspects assessed compare to each other, according to your choices in the survey. Those that occupy a larger area are your stronger ones and the narrower or missing ones are aspects of the Sustainability Mindset that are less developed or absent for you, as inferred from the combination of your answers.

The next section presents personalized descriptions of where you find yourself on your journey towards a Sustainability Mindset, in four clusters: Ecological Worldview, Systems Perspective, Emotional Intelligence, and Spiritual Intelligence.

Within each of these clusters you will find what aspects were assessed, and a graph for each aspect displaying how you connect to this topic, whether intellectually, through your actions and behaviors and/or by engaging your emotions.

If you see some areas missing within the graph, it means that either you selected “neither” for that question and therefore we don’t have information to report on, or your answers suggest you don’t engage in one or more areas (cognitive, behavioral, or affective). Similarly, if you selected “neither” for all the questions within one Sustainability Mindset Principle, we don’t include a graph, since we don’t have information to report on.

Each graph is accompanied by a box with a brief explanation, and you will find much more information in the text to include what your choices suggest, why this Principle is key for a sustainability mindset, and questions to ponder and suggestions to try.

***Enjoy your journey into the realm of the Sustainability Mindset - a place where you can be your best, for yourself and for the World.***

*The SMI Team*

**/ Your overall SUSTAINABILITY  
MINDSET PROFILE**

The graph below shows your personal profile, indicating how – relatively to each other – you have developed your Sustainability Mindset. The wider sections indicate your stronger areas, and vice versa.

# /ECOLOGICAL WORLDVIEW

An ECOLOGICAL WORLDVIEW is the result of having an intellectual and affective broad understanding of the planetary challenges, how they are interrelated, and how we are contributing to them.

## /WHAT IS ASSESSED HERE: HOW YOU UNDERSTAND THE ENVIRONMENTAL AND SOCIAL CHALLENGES, AND HOW YOU FEEL ABOUT IT, AND THE IMPACT ON YOUR BEHAVIORS.

### What this tells you:

**This graph shows the two dimensions of cognitive and behavioral, meaning that you have an intellectual understanding of this aspect, and you also act upon it. We don't have enough data to report if or how you connect with your feelings related to this item.**

**YOUR SMI RESPONSES INDICATE THAT** you have a good understanding of the complexity of the planetary challenges we are facing, and how they are interrelated.

**/YOU ARE COMFORTABLE WHEN** you act in ways that can minimize your ecological or social footprint, and/or help the sustainability of our planet with your daily decisions. We cannot comment on your feelings, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

**/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

We are definitely living in a time of information overload. It is challenging to stay on top of all that is happening, while keeping up with our own obligations and activities. Furthermore, sustainability news tends to be on the negative side, creating doomsday scenarios and scary prophecies that can trigger anxiety, make us feel bad, sad, or worried.

Yet we tend to underestimate our own power and influence in shaping a better world. As a matter of fact, if the challenges we are currently experiencing are a product of past problematic behaviors, then we are also positively shaping the future of the planet with our current mindful decisions and restorative actions. That opens an interesting path.

You understand the scope of the sustainability challenges, from the environmental and social perspective; you notice linkages, relationships and connections.

The other powerful path is in our emotions. When we allow ourselves to connect from the heart with the reality of the news and find small ways to change our behavior, we are more present and don't need to live with our divided selves.

This can be more fulfilling.

### /HOW ABOUT YOU TRY:

Here are some suggestions to ponder: What are things you are good at that you aren't incorporating into your sustainability contributions? Who could benefit and where from your gifts and talents and possibly your passion?

*Understanding the state of the planet allows us to be more fully aware of the challenges, the complexity of how they are linked to each other, and to explore what it means to us.*

*This page is here for you to note your reflections, insights, and questions.*

**/WHAT IS ASSESSED HERE:  
HOW YOU SEE THE RELATION  
BETWEEN INDIVIDUAL DECISIONS  
AND PLANETARY CHALLENGES, HOW  
YOU FEEL ABOUT IT AND THE  
IMPACT ON YOUR PERSONAL  
BEHAVIORS.**

*When we identify the ways in which we are unintentionally contributing to the problems, we have a chance to do something about them. It also expands our consciousness and develops social sensitivity.*

*We cannot comment on your thinking, behaviors, or feelings about this topic since you indicated (by choosing "neither") that you did not find yourself represented by any of the available options.*

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

Thinking of how we are personally contributing to the planetary challenges may not be something we do daily. Our demanding lives have many obligations and don't leave much time for reflecting on this. We are busy getting things done!

Yet when analyzing the current un-sustainability of our planet, science has clearly established a link between human behaviors in past decisions and the current problems we face. Much attention is now focused on how to repair the damage done, and how to restore damaged, depleted, or endangered resources. Scientists and entrepreneurs study how to minimize current or future problems at the environmental or social level, and how to innovate to avoid negative impacts into the future.

If we collectively influenced the place, we find ourselves in now (with all its problems), that means we also hold the key to influence where we will collectively be in the future – we: meaning humankind at large, or, from a closer perspective, our families, children, and grandchildren.

*This page is here for you to note your reflections, insights, and questions.*

# /SYSTEMS PERSPECTIVE

When analyzing information and making decisions a SYSTEMS  
PERSPECTIVE has a major impact on the sustainability of our actions.

**/WHAT IS ASSESSED HERE:  
HOW YOU THINK ABOUT THE LONG-TERM IMPACT WHEN ANALYZING AND MAKING DECISIONS, COMPLEMENTING SHORT-TERM THINKING; HOW YOU FEEL ABOUT IT, AND THE IMPACT ON YOUR BEHAVIORS.**

**What this tells you:**

This graph shows the two dimensions of cognitive and behavioral, meaning that you have an intellectual understanding of this aspect, and you also act upon it. We don't have enough data to report if or how you connect with your feelings related to this item.

**YOUR SMI RESPONSES INDICATE THAT** you have a good understanding of the long-term sustainability impacts that our decisions may have, even the simple and daily ones, not to mention behaviors commonly accepted in our society.

**/YOU ARE COMFORTABLE** thinking of "what ifs" and the long-term consequences of possible decisions before taking them. This may not always be welcome in a team setting, but from the perspective of shaping a sustainable world, this contribution is a great asset

to yourself and to your working groups. Your perspective will likely enrich actions, as they result from considering potential impacts in the longer term.

We cannot comment how you feel about this, since you indicated (by choosing "neither") that you did not feel represented by either of the available options.

**/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE THOSE STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

So how do you relate to others, who don't see it like you? Does it happen sometimes to you that you cannot understand why others passionately resist your long-term thinking?

If that is the case you might want to remember the emotional weight of uncertainty. You might feel a bit of anxiety or fear of the unknown yourself, if you would check on your feelings.

**/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

There is a tacit pressure to act promptly and focus on that which needs immediate attention. This is very important, and there are many circumstances where this way of responding is the optimal, or even the only one that matters. A fire in the house, for example. We can sense the urgency and it is not a good idea to pause and reflect on the long-term implications of the fire. But for many daily decisions, the context is different, and yet we still prioritize short term thinking, often without even pondering any medium- or long-term impacts of what we are doing. The stream of life, our colleagues, perhaps everyone with whom we interact takes for granted that we "all" act this way.

On the other hand, with greater understanding of the social and environmental problems we are facing, it has become clear that the law of cause-and-effect is always at play, even if not immediately obvious. In other words, the consequences of our daily actions do have impacts - some over time, some just in a different geography, and many on both.

As with other aspects which are key for a sustainability mindset, it is not a question of choosing one over the other, but a matter of balancing both views and taking both time horizons into account.

This mental habit expands our consciousness, as we become more aware of the way we are impacting others and the world. Not thinking about this doesn't stop it from happening. Stretching our imagination to consider potential impacts across time helps us make better decisions, and play a more active role in shaping a better world.

This is something about which you seem to know quite a lot.

### **/HOW ABOUT YOU TRY:**

Empathy and understanding go hand in hand, and smooth out our interactions. Is this something you remember when you are in a conversation? Or something you would like to keep in mind?

*Every action has consequences that are not immediately visible. Considering the long-term when analyzing situations and making decisions has a positive impact on global sustainability.*

**/WHAT IS ASSESSED HERE:  
HOW YOU THINK ABOUT AND DEAL  
WITH AMBIGUITY AND PARADOXES,  
HOW YOU RECOGNIZE DIVERSITY,  
FEEL ABOUT IT AND ACT TOWARDS  
IT.**

**What this tells you:**

**This graph shows only one dimension – behavioral - indicating that you are action- oriented without much engagement of your feelings. You might use this information to explore your emotions.**

**We don't have enough data to report on your understanding about this aspect.**

**YOUR SMI RESPONSES INDICATE THAT** you might frequently ask yourself how other people arrive at their opinions and perspectives, puzzling as they may look to you. It is possible that you even become curious and engage in conversations to better understand them.

We cannot comment on your thinking related to this topic, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

**/THINK ABOUT HOW YOU CAN FURTHER LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

However, your choices in the questionnaire indicate that being understanding with others' perspectives doesn't always come easy to you and sometimes you may feel frustrated or impatient. Do you sometimes wonder if your impatience may be perceived as being not inclusive? If this is the case, you may feel a certain amount of tension, as you do your best to be understanding, but your heart remains true to values you were taught and respect.

Of course, you wish there would be a solution that might make everyone happy, one that accommodates diverse ways of seeing the economy, ecosystems, humans, and the planet, but you don't think this is as simple as it sounds.

**/HOW ABOUT YOU TRY:**

Here is a question to consider: Can you think of an event or situation, however minor, where someone with a different opinion was able to step into your shoes? How did it make you feel? How did it impact your attitude and your behavior? What if we could shape a world that makes room for different perspectives, where people acknowledge others' points of view, the way you frequently include theirs?

Now, in what areas does empathy and inclusion come easier to you, and which situations are more challenging? This is your work.

Since we cannot control what others think or do but do have control over our own way of thinking, there may be an interesting path worth exploring here. Your behavior is role modeling it, and this is very valuable. Are you aware of it? Do you help others notice it, particularly the benefits of inclusion?

## **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

It seems that today, more than ever, we are collectively being confronted with paradoxes and ambiguity. Increased transparency and access to information from around the world makes us aware of very different ways of thinking, being and acting with which we may not agree or be comfortable.

Challenging as this may be, there is a benefit to it: We are becoming aware of our own worldviews just by realizing that there are other ways of seeing and feeling. This is an evolutionary insight of great value, the foundation for more peaceful societies. In a way, life is prompting us to expand our understanding and our scope of caring, which go hand in hand.

When we understand something, we can begin caring. This is the start of a better world for all.

*Both+and thinking allows us to understand paradoxes and calls for creative solutions that are inclusive of all stakeholders.*

**/WHAT IS ASSESSED HERE:  
HOW YOU BALANCE YOUR CAPACITY  
TO ANALYZE AND PLAN WITH THE  
UNDERSTANDING OF NATURAL  
CYCLES, AND MAKE THEM PART OF  
YOUR MINDSET.**

**YOUR SMI RESPONSES INDICATE THAT** you see the challenges life presents as opportunities to find intelligent solutions.

Indeed, intellectual abilities are important for you, as they permit to control difficult situations by crafting plans and setting goals to measure progress. You strongly believe and trust in human ingenuity to figure out solutions for our environmental or social problems and rely on those who are capable of solving them. This is how you think about this topic.

**/THINK ABOUT HOW YOU CAN FURTHER  
LEVERAGE THOSE STRENGTHS AND  
MANAGE SOME OF THE LIMITATIONS  
WHICH MAY BE HOLDING YOU BACK:**

We cannot comment on how this understanding impacts your behaviors, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

However it seems that plans make you feel empowered and in control, which is a nice feeling, particularly as it avoids the stress of uncertainty. You seem to enjoy making plans and implementing them, and derive a sense of fulfillment and satisfaction when you achieve the goals you set for yourself.

While planning is a way to feel in control of situations, you may be aware that it is constantly challenged, since life - with its countless variables - is too complex

to be managed. Do you experience frustration at times when things don't work out as you planned, or expected? How do you react? Do you let go of your plans and observe what the events are telling you, or do you use persistence and incremental efforts to stay on top of your planned course?

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

You may be wondering why planning is related to several key aspects for a sustainability mindset. The connection is not in the planning as an activity per se, but in the way we think and process information when we plan. Planning is about organizing and structuring in order to control outcomes. Planning is linear by definition -one step after the other - and it assumes cause-effect relationships. But what about multi-effects, multi-causes, and feedback loops?

Contrast this with the sustainability problems we are facing. To begin with, they are complex and multidimensional by their very nature. Many are the result of our linear thinking, for example we believe that we can pursue unlimited growth, yet depletion of natural resources shows us this is not possible.

Our reliance on the human mind can create a collective assumption that we are in control, but a "small" manifestation like Covid-19 arrives as a surprise to debunk the myth of our own superiority.

**/HOW ABOUT YOU TRY:**

Planning in itself is not the problem but rather, excessive reliance on carefully crafted steps. How do you incorporate the cycles of nature into your planning? As an example, do you accept phases of growth and decline - aging and impermanence, along with endings and mortality followed by new beginnings and birth? How do you incorporate humanity as part of Nature, rather than its controller? Many implications to think about, indeed.

*Here are a few thoughts to ponder. Do you see yourself balanced in terms of making and letting go of plans? How do you balance structure and flow, organization and flexibility?*

Relaxing your grip on plans may cause uncertainty, yet like swimming along with the river's current, it can also increase your speed, and reduce the stress of resisting obstacles. Worth a try.

*There are no linear processes in Nature: Everything flows in cycles of birth, growth, death, and rebirth.*

*Many aspects of man-made unsustainability of the planet are a result of the misconception that we are not governed by this law of Nature.*

**/WHAT IS ASSESSED HERE:  
HOW YOU UNDERSTAND AND  
EXPERIENCE INTERCONNECTEDNESS,  
VERSUS VALUES LIKE AUTONOMY  
AND INDEPENDENCE.**

**YOUR SMI RESPONSES INDICATE THAT** you enjoy the adrenaline of the challenges; they motivate you!

**You are also comfortable** winning or outperforming others. It is a great feeling for you, and you find the pursuit of success very exciting.

Recognition may be a reward, but it is not always external: it can also be for your personal satisfaction and sense of accomplishment. You feel proud of your achievements and perceive them as a validation of your autonomy and personal capabilities in action. It is important for you to be self-sufficient as much as possible.

**/THINK ABOUT HOW YOU CAN  
FURTHER LEVERAGE YOUR  
STRENGTHS AND MANAGE SOME  
OF THE LIMITATIONS WHICH MAY  
BE HOLDING YOU BACK:**

This combination of aspects can come at a price. It is not always possible to live up to other people's expectations, not to mention our own, which often are even higher!

Furthermore, in many settings where teamwork or collaboration is expected, it may be challenging to balance your individual performance with the collective contributions, and your personal efforts, gifts or skills may go unrecognized, or possibly even unappreciated.

We cannot comment further on how you think or behave in relation to this topic, since you indicated (by choosing "neither") that you did not find yourself represented by any of the available options.

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

You may not have given it much thought, but the polarities of independence vs. interconnectedness and competition vs. collaboration are of particular relevance when focusing on sustainability. To begin with, the environmental and social challenges are complex and multidimensional, making it impossible for any one person to solve on their own. It is only through collective thinking, action and the collaboration of multiple stakeholders that we will be able to develop alternatives. (This, by the way, makes sustainability a great opportunity for contributing personal skills to a larger cause).

While certain cultures have a collectivistic framework, most of the western-northern culture - widely exported and globalized - is individualistic and celebrates personal achievement. However, is this realistic and even feasible?

**/HOW ABOUT YOU TRY:**

Let's pause for a moment: Can you name one achievement that was purely and authentically your own without another person playing any role in it?

We invite you to explore what autonomy means for you. What are the roots of this value for you, perhaps in your upbringing or in your current context? Is this authentically a priority for you, or is it something automatically inherited, or adopted without giving it much thought?

*When we see interconnectedness,  
we understand the importance of  
diversity, and our decisions and  
actions become more inclusive,  
which contributes to the  
sustainability of the whole.*

# /EMOTIONAL INTELLIGENCE

Understanding ourselves through the anchors of our identity, the pace of our life, and how we consider our intuitive wisdom are key for a sustainability mindset.

## **/WHAT IS ASSESSED HERE: HOW YOU INCORPORATE NON- RATIONAL INFORMATION, INTUITIVE KNOWING, CREATIVITY AND IMAGINATION IN ORDER TO BALANCE RATIONAL THINKING, AND HOW YOU FEEL ABOUT IT.**

### **What this tells you:**

**This graph shows only one dimension – cognitive - indicating that you have knowledge about this aspect, without necessarily connecting it with your behaviors. You might use this information to seek ways to convert your understanding into action.**

**We don't have enough data to report about your feelings on this topic.**

**YOUR SMI RESPONSES INDICATE THAT** you have a clear understanding of the value of combining your logical and analytical thinking abilities with creative imagination.

You know that the human mind is capable of great accomplishments, as history has shown, when intuition and creative ideas are coupled with rational thinking and good strategies. You may even trust that

our sustainability problems could be addressed with a good balance of these abilities.

At the same time, **you feel most comfortable** being the contributor of rational thinking when analyzing a problem. You may find yourself in the role of the defender of structure and stability, and the keeper of the status quo. You are careful to avoid what you consider as unnecessary risks.

We cannot comment on your feelings about this topic, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

How well do you balance your strategic thinking with some creative imagination?

## **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

The reason for this question is that the sustainability challenges we are facing are largely new, and as COVID-19 taught us, increasingly situations arise for which we don't have previous experience or science on which to rely.

We have become more aware of the complexity of our challenges, and we are skeptical of simplistic solutions. This requires entry into uncharted territories. Resilience calls for flexibility in adapting to new situations, and this entails innovating and experimenting. Having no plans or blueprints to follow may be unsettling, and the only choice is to take some risks.

**/THINK ABOUT HOW YOU CAN FURTHER  
LEVERAGE YOUR STRENGTHS AND  
MANAGE SOME OF THE LIMITATIONS  
WHICH MAY BE HOLDING YOU BACK:**

How comfortable do you feel when experimenting without knowing? Here is a thought to consider: What are some situations in which you are creative, relaxed and playful? Perhaps cooking or gardening? Playing some team sports? Or around small children? Maybe planning a party?

If you can identify some of these creative and playful moments, in them you have a reservoir of imagination available to tap into. This can help you complement your strategic thinking and maximize your achievements for the benefit of all.

*Resilience is based on constant creativity, innovation, and experimentation. When we neglect the non-rational wisdom we have in us, our solutions are missing critical information, and may create negative impacts on the ecosystem and society.*

**/WHAT IS ASSESSED HERE:  
HOW YOU NOTICE YOUR OWN PACE,  
AND HOW YOU BALANCE RAPID  
RESPONSE WITH MAKING TIME TO  
PONDER AND REFLECT BEFORE  
ACTING. AND HOW THIS MAKES  
YOU FEEL.**

**What this tells you:**

**This graph shows the affective dimension, meaning that you connect emotionally with this aspect. We don't have data to report if or how these feelings relate to your understanding and behaviors.**

We cannot comment on your thinking or behaviors about this topic, since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options. **However, certain choices in your questionnaire** point at something **noteworthy**. It seems that when you are reminded to slow down, you are really appreciative. It makes you feel better, more relaxed or lowers your stress levels. If this is the case, it is a valuable experience that may be the portal to a more peaceful pace.

**/THINK ABOUT HOW YOU CAN  
LEVERAGE YOUR STRENGTHS AND  
MANAGE SOME OF THE  
LIMITATIONS WHICH MAY BE  
HOLDING YOU BACK:**

According to your answers, you seem to be gifted with an intuition that something is not quite right. Do you ever wish you could relax more, slow down and do nothing? Does your body, your mind or perhaps your soul call for less stress, or even a break? What message may be there for you, waiting to be heard and acted upon?

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

Because we are looking at these aspects from the perspective of a sustainability mindset, let's pause and think about what behaviors might be most effective as well as much needed.

While there is a call for urgent action about climate change and the related social and environmental problems, many modern sustainability challenges are actually the result of overlooked potential impacts. For decades, well-intended decisions were largely made by quickly identifying the best option.

But today we are understanding better that problems are complex, that solutions impact a multiplicity of future stakeholders, and that there are always consequences. Of course, it is not possible to anticipate all scenarios, but pausing and checking assumptions can be very useful to avoid future problems.

## /HOW ABOUT YOU TRY:

For example, what can you learn to avoid or repeat from past experiences? Can you identify in hindsight, what was at stake? When we have more information we can better weigh alternatives. All of this, however, is at odds with speed. We cannot both act fast and ponder carefully.

The question becomes: Is decisiveness and fast action coming at an expensive price for you and others, us, the next generations, and the ecosystem?

Food for thought!

*Reflective practices help to pause, and to ponder the situation and its implications before jumping into action.*

## **/WHAT IS ASSESSED HERE: HOW AWARE YOU ARE ABOUT THE ANCHORS OF YOUR IDENTITY AND YOUR VALUES; HOW YOU FEEL AND ACT IN CONSEQUENCE.**

### **What this tells you:**

**This graph shows the two dimensions of cognitive and behavioral, meaning that you have an intellectual understanding of this aspect, and you also act upon it. We don't have enough data to report if or how you connect with your feelings related to this item.**

**YOUR SMI RESPONSES INDICATE THAT** you believe the paradigm we have long been living with is due for a revision, because values like growth and progress may be linked to an assumption of unlimited resources, which may not be realistic.

You have been noticing that many of your automatic behaviors are actually not very environmentally friendly, or perhaps have some kind of negative social impact.

**You are comfortable** trying to make some changes, but this probably has been somewhat challenging and might not have left you very satisfied. We cannot comment on your feelings related to this topic since you indicated (by choosing "neither") that you did not find yourself represented by either of the available options.

## **/THINK ABOUT HOW YOU CAN LEVERAGE YOUR STRENGTHS AND MANAGE SOME OF THE LIMITATIONS WHICH MAY BE HOLDING YOU BACK:**

Your understanding and actions are not mainstream, and thus very important to drive much needed change. Undoubtedly, there are social and environment related challenges everywhere. Some happen locally, others across borders. You understand science has been linking many of these issues to human behaviors, such as consumption of unhealthy foods, depletion of natural resources, pollution or contamination of air, soil and water. And we are left to deal with the consequences today, trapped in a paradigm that prioritizes values that have a negative impact, such as thoughtless consumption.

How happy are you with how you are sharing your valuable perspectives with others? Do you feel you are doing it as much as you could?

## **/THOUGHTS TO PONDER WHEN YOU CONSIDER THE SM:**

Let's pause for a moment. This survey was designed around the Sustainability Mindset, which is a way of thinking and being, to optimally adapt to the moment in which we are living. This mindset focuses on using our natural gifts to shape a better

future, for ourselves and for all, the ecosystem included.

Research has proven that what may sound overwhelming, actually can be broken down into small, realistic ways to contribute to the greater good, and feel great at the same time. The first step is taking a fresh look at what surrounds us.

## **/HOW ABOUT YOU TRY:**

Have you identified some of your activities that may not live up to your personal expectations of living in a 'sustainable' way? In what new ways could you make some changes? Sometimes we do not have the power to control a situation, but we always have unlimited power to influence, with our words, attitudes, talking or writing.

How about exploring a few of your unused possibilities?

Another suggestion is that you explore the roots of some values that are important for you, such as success, winning, and outperforming others. Where can you trace their origins? Perhaps in your upbringing, or in your current context? What do they represent for you, which makes them important? Are they authentically yours, or are they perhaps inherited, adopted without giving much thought to it?

*When we explore our personal values, beliefs, assumptions, and motivations, we gain greater control over our actions, and we can see new alternative behaviors.*

# /SPIRITUAL INTELLIGENCE

The spiritual orientation to Nature, to ourselves and to others are key factors for a Sustainability Mindset, as they impact the quality of our actions.

**/WHAT IS ASSESSED HERE:  
HOW YOU EXPERIENCE NATURE,  
HOW YOU UNDERSTAND THE  
HUMAN RELATIONSHIP WITH  
NATURE, AND YOUR RELATED  
FEELINGS AND BEHAVIORS.**

**What this tells you:**

**This graph shows only one dimension – cognitive - meaning that you have an intellectual understanding about this aspect. We don't have enough data to report on your behaviors or feelings about this topic.**

**YOUR SMI RESPONSES INDICATE THAT** you think of Nature as an experience that offers more wisdom than we can intellectually grasp.

We cannot comment on how this understanding impacts your behaviors or feelings since you indicated (by choosing "neither") that you did not find yourself represented by any of the available options.

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

According to a 2018 United Nations study, over 55% of the world's population lives in urban areas, a proportion that is expected to increase to 68% by 2050. As a result, for many of us, the disconnection from Nature is rather "natural." Hectic life in large cities makes it difficult for us to remember that we are more than individuals moving through traffic and buildings. The common associations with the word "Nature" may be vacation time, a park, or a documentary. What about our food? Our body? The materials of every object we use? This disconnection from Nature leads to a utilitarian relationship: Nature is reduced to instrumental resources for human needs and wants.

What consequences do you see from having a utilitarian relationship with Nature?

You know it well: We need to re-connect with Nature and re-establish the experience of oneness that has been lost, causing not only spiritual alienation but also the artificial separation from the ecosystem. It has been found related not only to spiritual alienation but is the root cause for many unsustainability behaviors.

When we understand something, we start caring for it. Understanding that we are one with Nature is a sensorial, intuitive experience. It is not something to be learned, but rather something that we allow to occur, and which makes us remember the sense of oneness we have always known but had forgotten.

**/HOW ABOUT YOU TRY:**

Sometimes we realize that our thinking, feeling, and acting are not aligned. When we notice it, we may feel discomfort and tension- something out of sync. A sustainability mindset is not just harmony with the ecosystem, but it starts within us.

It is impossible to guess your particular context, and your current priorities. But we invite you to give

yourself an unusual gift: Spend an hour in Nature, on your own, without looking at your phone, and with no books, pets, or other people. If you have never experienced this, you are up for a very special treat!

*Understanding that we are one with Nature, a species within species, is a powerful spiritual experience that can shape behaviors leading to a more harmonious relationship with each other and all beings*

**/WHAT IS ASSESSED HERE:  
HOW YOU THINK ABOUT THE  
MEANING, ROLE AND VALUE OF  
MINDFULNESS AND ITS PRACTICE,  
AND HOW YOU FEEL ABOUT IT.**

*We cannot comment on your thinking, behaviors or feelings about this topic, since you indicated (by choosing "neither") that you did not find yourself represented by any of the available options.*

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

From the perspective of a sustainability mindset, mindfulness is both a key practice and an amazing result. Research has shown a direct link between individuals that have some contemplative practices not just with their physical and psychological health, but also with the emergence of feelings of empathy and compassion. This creates a disposition towards positive social and environmental actions, and the resulting satisfaction feeds a positive reinforcing loop. In other words, the better we feel about something we've done, the more we seek to repeat the experience.

When we access and display a more balanced version of ourselves, we convey an unspoken message to the people with whom we interact, not just by what we say or how we behave, but through our attitude and energy. This has a proven positive influence on others, which science has identified with the phenomenon of "emotional contagion."

In other words, when we develop a sense of peace for ourselves, we are also radiating a gift of peace to the world.

Do you want to give it a try?

*Mindfulness is being fully present, experiencing connectedness with all that is. Mindfulness enhances awareness and compassion, and predisposes to social and environmental actions.*

*This page is here for you to note your reflections, insights and questions*

**/WHAT IS ASSESSED HERE:  
WHAT YOU THINK ABOUT HAVING A  
PURPOSE IN LIFE, PARTICULARLY  
SOMETHING THAT IS IN SERVICE TO  
OTHERS; HOW THIS FITS YOUR  
REALITY AND HOW YOU FEEL ABOUT  
IT.**

**/THOUGHTS TO PONDER WHEN YOU  
CONSIDER THE SM:**

Research has shown that individuals who engage in activities of service to the community, volunteering or some kind of initiative for the greater good have a higher sense of wellbeing than those who do not. This includes benefits to health, feelings of joy, increased self-esteem, and personal satisfaction.

In contrast, focusing on the extreme demands of our life sometimes takes a toll on our health, our mood, creating tension or anxiety, disrupts our sleep or impacts how we interact with others.

The research regarding core aspects for a sustainability mindset identified the role of activities intentionally done for the "greater good." The state of our planet is such that it requires each of us to step up and play an active role in shaping a better world.

The actions needed, whether large or small, share a similar result: they provide us with a feeling of joy, which then we want to replicate to feel good again, thus creating a reinforcing loop. Interestingly, we tend to think that we need to take care of ourselves first, before helping others, but the facts show that when we do small acts of kindness for others, we feel much better ourselves.

Don't get intimidated by grandiose words like 'changing the world' or having a life mission or purpose. In fact, each small action of kindness already has an impact that we may never be able to imagine. That is also changing the world, one interaction at a time.

*Defining our purpose provides an  
unconscious compass, and when it is  
grounded in values of our higher self,  
we actively shape a better world.*
